REVIEW: Glucocorticoids and fatty acid metabolism in humans: fuelling fat redistribution in the metabolic syndrome	David P Macfarlane, Shareen Forbes & Brian R Walker	189–204
Real-time analysis of gene regulation by glucocorticoid hormones	A McMaster, T Chambers, Q-J Meng, S Grundy, A S I Loudon, R Donn & D W Ray	205–211
Expression of glucocorticoid receptor, mineralocorticoid receptor, and 11 $\beta$ -hydroxysteroid dehydrogenase 1 and 2 in the fetal and postnatal ovine hippocampus: ontogeny and effects of prenatal glucocorticoid exposure	Deborah M Sloboda, Timothy J M Moss, Shaofu Li, Stephen G Matthews, John R G Challis & John P Newnham	213–220
Sub-chronic stimulation of glucocorticoid receptor impairs and mineralocorticoid receptor protects cytosolic Ca <sup>2+</sup> responses to glucose in pancreatic $\beta$ -cells	Masaru Koizumi & Toshihiko Yada	221–229
Vasopressin potentiates corticotropin-releasing hormone-induced insulin release from mouse pancreatic $\beta$ -cells	Anne-Marie O'Carroll, Gillian M Howell, Emma M Roberts & Stephen J Lolait	231–239
Pancreatic $\beta$ -cells express hepcidin, an iron-uptake regulatory peptide	Hasan Kulaksiz, Evelyn Fein, Peter Redecker, Wolfgang Stremmel, Guido Adler & Yalcin Cetin	241–249
Prominent pancreatic endocrinopathy and altered control of food intake disrupt energy homeostasis in prion diseases	J D Bailey, J G Berardinelli, T E Rocke & R A Bessen	251–263
Beneficial effects of lipids and prolactin on insulin secretion and $\beta$ -cell proliferation: a role for lipids in the adaptation of islets of pregnancy	T Clark Brelje, Nicholas V Bhagroo, Laurence E Stout & Robert L Sorenson	265–276
Acute elevation of circulating fatty acids impairs downstream insulin signalling in rat skeletal muscle <i>in vivo</i> independent of effects on stress signalling	Georgia Frangioudakis & Gregory J Cooney	277–285

Continued overleaf

Antioxidants preserve redox balance and inhibit c-Jun-N-terminal kinase pathway while improving insulin signaling in fat-fed rats: evidence for the role of oxidative stress on IRS-1 serine phosphorylation and insulin resistance	R Vinayagamoorthi, Zachariah Bobby & M G Sridhar	287–296
A novel selective 11 $\beta$ -hydroxysteroid dehydrogenase type 1 inhibitor prevents human adipogenesis	I J Bujalska, L L Gathercole, J W Tomlinson, C Darimont, J Ermolieff, A N Fanjul, P A Rejto & P M Stewart	297–307
Endocrine gland-derived vascular endothelial growth factor in rat pancreas: genetic expression and testosterone regulation	Angélica Morales, Sumiko Morimoto, Lorenza Díaz, Guillermo Robles & Vicente Díaz-Sánchez	309–314
Chrysin, a natural flavonoid enhances steroidogenesis and steroidogenic acute regulatory protein gene expression in mouse Leydig cells	Kuladip Jana, Xiangling Yin, Randolph B Schiffer, Jau-Jiin Chen, Akhilesh K Pandey, Douglas M Stocco, Paula Grammas & Xingjia Wang	315–323
Monitoring leptin activity using the chicken leptin receptor	Gideon Hen, Sera Yosefi, Ana Ronin, Paz Einat, Charles I Rosenblum, Robert J Denver & Miriam Friedman-Einat	325–333
Chicken leptin receptor is functional in activating JAK–STAT pathway <i>in vitro</i>	Hiroshi Adachi, Yasumasa Takemoto, Takashi Bungo & Takeshi Ohkubo	335–342
Direct effects of prolactin and dopamine on the gonadotroph response to GnRH	Helen L Henderson, Julie Townsend & Domingo J Tortorella	343–350
Perinatal exposure of female rats to 2,3,7,8-tetrachlorodibenzo- <i>p</i> -dioxin induces central precocious puberty in the offspring	Masaki Kakeyama, Hideko Sone & Chiharu Tohyama	351–358
Differential distribution of VGF-derived peptides in the adrenal medulla and evidence for their selective modulation	Filomena D'Amato, Barbara Noli, Carla Brancia, Cristina Cocco, Giovanna Flore, Maria Collu, Paola Nicolussi & Gian-Luca Ferri	359–369
Orchidectomy increases the formation of non-endothelial thromboxane A <sub>2</sub> and modulates its role in the electrical field stimulation-induced response in rat mesenteric artery	L del Campo, A Sagredo, R Aras-López, G Balfagón & M Ferrer	371–379
IGF-II/mannose-6-phosphate receptor signaling induced cell hypertrophy and atrial natriuretic peptide/BNP expression via G $\alpha_q$ interaction and protein kinase C- $\alpha$ /CaMKII activation in H9c2 cardiomyoblast cells	Chun-Hsien Chu, Bor-Show Tzang, Li-Mien Chen, Chia-Hua Kuo, Yi-Chang Cheng, Ling-Yun Chen, Fuu-Jen Tsai, Chang-Hai Tsai, Wei-Wen Kuo & Chih-Yang Huang	381–390
Central and peripheral cardiovascular actions of adrenomedullin 5, a novel member of the calcitonin gene-related peptide family, in mammals	Y Takei, H Hashimoto, K Inoue, T Osaki, K Yoshizawa-Kumagaye, M Tsunemi, T X Watanabe, M Ogoshi, N Minamino & Y Ueta	391–400

High periostin expression correlates with aggressiveness in papillary thyroid carcinomas	Cinzia Puppini, Dora Fabbro, Mariavittoria Dima, Carla Di Loreto, Efsio Puxeddu, Sebastiano Filetti, Diego Russo & Giuseppe Damante	401–408
Epidermal growth factor receptor activation by protein kinase C is necessary for FSH-induced meiotic resumption in porcine cumulus–oocyte complexes	Xiufen Chen, Bo Zhou, Jun Yan, Baoshan Xu, Ping Tai, Junxia Li, Shiming Peng, Meijia Zhang & Guoliang Xia	409–419
Neuropeptide Y mediates the initial hypothalamic–pituitary–adrenal response to maternal separation in the neonatal mouse	Mathias V Schmidt, Claudia Liebl, Vera Sterlemann, Karin Ganea, Jakob Hartmann, Daniela Harbich, Stephanie Alam & Marianne B Müller	421–427
Plasma brain-derived neurotrophic factor daily variations in men: correlation with cortisol circadian rhythm	Silvia Begliuomini, Elena Lenzi, Filippo Ninni, Elena Casarosa, Sara Merlini, Nicola Pluchino, Valeria Valentino, Stefano Luisi, Michele Luisi & Andrea R Genazzani	429–435
Thyroid hormones promote cell differentiation and up-regulate the expression of the <i>seladin-1</i> gene in <i>in vitro</i> models of human neuronal precursors	S Benvenuti, P Luciani, I Cellai, C Deledda, S Baglioni, R Saccardi, S Urbani, F Francini, R Squecco, C Giuliani, G B Vannelli, M Serio, A Pinchera & A Peri	437–446
RAPID COMMUNICATION: The novel estrogen receptor G-protein-coupled receptor 30 is expressed in human bone	Terhi J Heino, Andrei S Chagin & Lars Sävendahl	R1–R6
