|--|---|---------|
| REVIEW: Back to the future: a new look at 'old' vitamin D | Rene F Chun, John S Adams & Martin Hewison | 261-269 |
| MafA is a dedicated activator of the insulin gene <i>in vivo</i> | Isabella Artner, Yan Hang, Min Guo, Guoqiang Gu & Roland Stein | 271-279 |
| <i>Etv5</i> , an ETS transcription factor, is expressed in granulosa and cumulus cells and serves as a transcriptional regulator of the cyclooxygenase-2 | Jinwon Eo, Kyuyong Han, Kenneth M Murphy, Haengseok Song & Hyunjung Jade Lim | 281-290 |
| Evidence for a role of the amyloid precursor protein in thyroid carcinogenesis | Kerstin Krause, Stefan Karger, Sien-Yi Sheu, Thomas Aigner, Romy Kursawe, Oliver Gimm, Kurt-Werner Schmid, Henning Dralle & Dagmar Fuhrer | 291-299 |
| Acrylamide does not induce tumorigenesis or major defects in mice <i>in vivo</i> | Ling Jin, Vanessa Chico-Galdo, Claude Massart, Christine Gervy, Viviane De Maertelaere, Marvin Friedman & Jacqueline Van Sande | 301-307 |
| Antagonism of central melanin-concentrating hormone 1 receptor alleviates steatohepatitis in mice | Makoto Ito, Akira Gomori, Jun Suzuki, Shigeharu Tsujioka, Minoru Sasaki, Masao Matsuda, Maria A Bednarek, Masahiko Ito, Akane Ishihara, Hisashi Iwaasa, Douglas J MacNeil & Akio Kanatani | 309-315 |

Continued overleaf

| | | |
|--|--|---------|
| Transgenic mice overexpressing GH exhibit hepatic upregulation of GH-signaling mediators involved in cell proliferation | Johanna G Miquet, Lorena González, Marina N Matos, Christina E Hansen, Audreen Louis, Andrzej Bartke, Daniel Turyn & Ana I Sotelo | 317–330 |
| Prolactin inhibition at the end of lactation programs for a central hypothyroidism in adult rat | Isabela Teixeira Bonomo, Patrícia Cristina Lisboa, Magna Cottini Fonseca Passos, Simone Bezerra Alves, Adelina Martha Reis & Egberto Gaspar de Moura | 331–337 |
| Characterization of obestatin in rat and human stomach and plasma, and its lack of acute effect on feeding behavior in rodents | Muhtashan S Mondal, Koji Toshinai, Hiroaki Ueno, Keiichi Koshinaka & Masamitsu Nakazato | 339–346 |
| The effect of acute exercise session on thyroid hormone economy in rats | Rodrigo Soares Fortunato, Daniele Leão Ignácio, Álvaro Souto Padron, Ramon Peçanha, Michelle Porto Marassi, Doris Rosenthal, João Pedro Saar Werneck-de-Castro & Denise Pires Carvalho | 347–353 |
| Leptin modulates the expression of its receptors in the hypothalamic–pituitary–ovarian axis in a differential way | M P Di Yorio, M G Bilbao, M C Pustovrh, J P Prestifilippo & A G Faletti | 355–366 |
| Prolonged interleukin-6 administration enhances glucose tolerance and increases skeletal muscle PPAR α and UCP2 expression in rats | Anna G Holmes, Jose L Mesa, Bronwyn A Neill, Jason Chung, Andrew L Carey, Gregory R Steinberg, Bruce E Kemp, Robert J Southgate, Graeme I Lancaster, Clinton R Bruce, Matthew J Watt & Mark A Febbraio | 367–374 |
| Phosphatidylinositol 3-kinase-dependent insulin regulation of long-chain fatty acid (LCFA) metabolism in L6 muscle cells: involvement of atypical protein kinase C- ζ in LCFA uptake but not oxidation | Karen R Kelly, Chin K Sung, Marcia J Abbott & Lorraine P Turcotte | 375–384 |
| Ptgs2 activation by endotoxin mediates the decrease in <i>Igf1</i> , but not in <i>Igfbp3</i> , gene expression in the liver | A I Martín, M López-Mendiña, E Castellero, M Granada, M A Villanúa & A López-Calderón | 385–394 |
| Effects of long-term treatment with 8-prenylnaringenin and oral estradiol on the GH–IGF-1 axis and lipid metabolism in rats | Martina Böttner, Julie Christoffel & Wolfgang Wuttke | 395–401 |
| Corticosteroid receptors involved in stress regulation in common carp, <i>Cyprinus carpio</i> | Ellen H Stolte, Aurélia F de Mazon, Karen M Leon-Koosterziel, Maria Jęsiak, Nic R Bury, Armin Sturm, Huub F J Savelkoul, B M Lidy Verburg van Kemenade & Gert Flik | 403–417 |

| | | |
|---|---|---------|
| Cardiac corticosteroid receptors mediate the enlargement of the ovine fetal heart induced by chronic increases in maternal cortisol | Seth A Reini, Garima Dutta, Charles E Wood & Maureen Keller-Wood | 419–427 |
| Identification and biological activity of ovine and caprine calcitonin receptor-stimulating peptides 1 and 2 | Christopher J Charles, Takeshi Katafuchi, Timothy G Yandle & Naoto Minamino | 429–437 |
