Forthcoming papers

Role of prolactin in the photoperiodic control of moult in the mink (Mustela vison). L. Martinet, D. Allain & C. Weiner.

Properties and ontogeny of the glucocorticoid receptor in the placenta and fetal lung of the sheep. A. P. F. Flint & R. D. Burton.

Ovarian-splenic autotransplantation: evidence that oestrogen does not inhibit hepatic somatomedin generation. R. G. Clark & A. T. Holder.

Effects of hypobaric hypoxia on the Leydig cell population of the testis of the rat. J. R. Gosney.

Corticosterone availability in male rats at rest and during shock avoidance: differences among individuals, temporal patterns and effects of dexamethasone. S. Wade.

Central effects of photoperiod on reproduction in the ram revealed by the use of a testosterone clamp. G. A. Lincoln.

Secretion of corticotrophin releasing factor-like activity by a human bronchial carcinoid cell line. S. C. Kirkland & M. L. Ellison.

Announcements

Meeting on Recent Advances in Methodology and Aromatization

The Hormone Group (of the Biochemical Society and Society for Endocrinology) will hold a 1-day meeting on Friday 30 November 1984 at the Royal Free Hospital School of Medicine, London, on Recent Advances in Methodology and Aromatization. Topics will include: Cell separation by elutriation; electrically induced cell fusion; photoaffinity labelling of receptors; use of monoclonal antibodies to screen tissues for specific antigens; immunofluorescence hormone analysis; mechanism of aromatization, aromatization in ovarian follicles; aromatization in breast tissue; peripheral aromatization. The speakers will be: D. Knook (The Netherlands), J. A. Lucy (U.K.), A. Eberle (Switzerland), R. King (U.K.), R. Ekins (U.K.), A. Brodie (U.S.A.), J. Richards (U.S.A.), W. Miller (U.K.) and V. H. T. James (U.K.).

Further details are available from Professor B. A. Cooke, Department of Biochemistry and Chemistry, Royal Free Hospital School of Medicine, Rowland Hill Street, London NW3 2PF.

Bayliss and Starling Society

A meeting of the Bayliss and Starling Society will take place on 18–19 December 1984 at the University of Surrey in Guildford. The programme will include two symposia, one on the Enteroinsular Axis and the other on Growth Factors. There will be a distinguished panel of speakers including E. Samols, S. Bloom, V. Marks, L. Morgan, E. R. Froesch, M. Waterfield and D. Teale. One day will be devoted to free communications on all aspects of regulatory neuropeptides. The deadline for receipt of abstracts is 1 October 1984.

For further details and abstract forms please contact: Professor Vincent Marks, Division of Clinical Biochemistry, Department of Biochemistry, University of Surrey, Guildford, Surrey GU2 5XH. Tel: (0483) 571281 Ext. 639.

Control and Manipulation of Animal Growth

The 43rd Easter School of the University of Nottingham School of Agriculture will be held from 15 to 18 April 1985. Invited speakers from a range of countries will consider topics which have relevance to established and potential methods of growth enhancement in animals. These will include cell growth and differentiation, tissue growth factors, the potential for growth manipulation, the growth of bone and adipocytes, neuroendocrine control of metabolism, the influence of specific hormones (e.g. the steroids, prostaglandins, growth hormone, the somatomedins), the integration of metabolism and fetal growth. The
current and potential use of the immune response, steroid and steroid-like anabolic agents, gut active agents and β-agonists will also be considered.

Facilities will be available for the presentation of relevant submitted original communications as posters and encouragement for younger research workers to attend will be given in the way of reduced registration fees.

The conference organisers are Dr P. J. Buttery, Dr N. B. Haynes and Professor D. B. Lindsay. For further details please contact Dr P. J. Buttery, Department of Applied Biochemistry and Food Science, University of Nottingham School of Agriculture, Sutton Bonington, Loughborough LE12 5RD. Tel: (0602) 506101.

Endocrinology for Physicians
A specialist short course will be held at the Royal Postgraduate Medical School, Hammersmith Hospital, from 5 to 9 November 1984. The course organizers are Professor S. R. Bloom, Mr J. A. Lynn and Dr G. F. Joplin. Further details and application forms are available from: School Office (SSC), Royal Postgraduate Medical School, Du Cane Road, London W12 0HS.

The 4th Joint Meeting of British Endocrine Societies
This meeting will be held in Oxford from 25 to 29 March 1985. Symposia will cover the following topics:

Corrigendum
Jean-Faucher et al. 102, 103–107.

hormones and prostatic cancer; genetics and in-vitro fertilization; glucocorticoid hormone action: recent developments; update in paediatric endocrinology; action of releasing hormones on the anterior pituitary; the endocrinology of calcium metabolism; insulin action: events following receptor binding. There will also be a number of plenary lectures as well as free communications and posters.

Information will be mailed to all members of participating Societies in October and others interested may obtain information and abstract forms from The Administrative Assistant, Society for Endocrinology, 23 Richmond Hill, Bristol BS8 1EN. Tel: 0272 734662. Deadline for receipt of abstracts is 3 December 1984.

Adipose tissue, prolactin and, during extended lactation, rat (Flint et al.) 231
Adrenal gland, adrenalectomy and skin glucocorticoid receptor, rat (Smith & Shuster) 161
changes in, hypothyroid mouse (Shire & Beamer) 277
Adrenocorticotropic (ACTH), release, from rat pituitary cells, gastrin releasing peptide and (Hale et al.) R1
release, from rat pituitary gland, corticosteroid and (Mahmoud et al.) 33
Alphaxalone, anaesthesia, and LH secretion, rat (Dyer & Mansfield) 27
Anaesthesia, with alphaxalone, and LH secretion, rat (Dyer & Mansfield) 27
Analogue, of PTH, bioassay of, in sheep parotid gland (Wright et al.) 375
Androgen, and glucocorticoid receptors, in rat perineal muscle (DuBois & Almon) 225
receptors, activation of, rat brain and pituitary and prostate glands (Greenstein) 181
B-cell, intra-, inter- and transcellular relationships in islet of Langerhans (Orci) 3
Bioassay, of PTH, in sheep parotid gland (Wright et al.) 375
Body weight, effect of oestradiol and somatomedin-C on, premenarchial rhesus monkey (Wilson et al.) 311
Brain, activation of androgen receptors in, rat (Greenstein) 181
testosterone metabolism in, quail embryo (Balthazar & Ottinger) 77
Bromocriptine, and mammary gland development, ewes and heifers (Schams et al.) 121
and maternal behaviour, male rat (Södersten & Eneroth) 115
and oestrous cycle, after interruption of persistent oestrus, rat (Everett) 271
and pituitary GnRH receptors, rat (Clayton & Bailey) 215
Calcitonin, and cytoplasmic spreading of osteoclasts, rat (Chambers et al.) 281
and salivary phosphorus and calcium, sheep (Matsuura et al.) 365
Calcium, plasma, parathyroidectomised and, rat (Perris et al.) 257
salivary, calcitonin and, sheep (Matsuura et al.) 365
Cattle, hormones and mammary gland development (Schams et al.) 121
oxygen secretion during milking (Schams et al.) 337
seasonal differences in ovarian activity (McNatty et al.) 189
Cloacal gland, testosterone metabolism in, quail embryo (Balthazar & Ottinger) 77
Colour, change, MCH and, eel (Gilham & Baker) 237
Corticotroproid, and ACTH release, from pituitary gland, rat (Mahmoud et al.) 33
Corticosterone, and free fatty acid uptake, by duck hepatocytes (Gross & Mialhe) 381
and skin glucocorticoid receptor, adrenalectomized rat (Smith & Shuster) 161
Corticotrophin releasing factor (CRF), and ACTH release, from pituitary gland, rat (Mahmoud et al.) 33
mediated ACTH release, from rat pituitary cells, effect of gastrin releasing peptide (Hale et al.) R1
Cortisol, plasma, pheromone-like signal and, lemur (Schilling et al.) 143
Cryptorchidism, and Leydig cell function, rat (Sharpe et al.) 319
Cyproterone acetate, and sexual maturation, male mouse (Jean-Faucher et al.) 103

Dale Lecture 1983, Patterns of cellular and subcellular organization in the endocrine pancreas (Orci) 3

Dale Medallist 1984, C. Milstein, biographical note 393
Dehydration, and serum vasotocin, mesotocin and prolactin, domestic fowl (Nouwen et al.) 345
Dihydrotestosterone, effect on LH secretion and pituitary DNA synthesis, castrated rat (Romano et al.) 13
DNA, synthesis, in pituitary gland, LH secretion and, castrated rat (Romano et al.) 13
Domperidone, and maternal behaviour, male rat (Södersten & Eneroth) 115
and pituitary GnRH receptors, rat (Clayton & Bailey) 215
effect on prolactin and LH during lactation, rat (Södersten & Eneroth) 251
Dopamine, effect on prolactin and GH secretion, amphibian and reptilian pituitary gland (Hall & Chadwick) 175
regulation of pituitary GnRH receptors, rat (Clayton & Bailey) 215
Duck, insulin and free fatty acid uptake by hepatocytes (Gross & Mialhe) 381
Eel, MCH and colour change (Gilham & Baker) 237
Embryo, testosterone metabolism in, quail (Balthazar & Ottinger) 77
Eosinophilia, uterine, effects of oestrogen and progesterone on, rat (Grunert et al.) 295
Epidermal growth factor, and thyroid membranes, man and pig (Humphries et al.) 57
Equol, soya as a source of, man and rat (Axelson et al.) 49
Follicle-stimulating hormone, in serum and pituitary gland, prolactin and, rat (Clayton & Bailey) 215
plasma, effects of pinealectomy, oestradiol and melatonin on, ovariectomized sheep (Kenneaway et al.) 199
secretion, effects of opiates and gonadal steroids, rat (Bhanot & Wilkinson) 133
serum, oestrogen and, during ovarian cycle, rat (Döcke et al.) 287
Follicular fluid, bovine, inhibin preparation from, and ovulation rate, sheep (Henderson et al.) 305
Fowl, testosterone and pituitary gland (Hall et al.) 153
Fowl, domestic, nuclear progesterone receptor and LHRH neurones in hypothalamus of (Sterling et al.) 95
vasotocin, mesotocin and prolactin in (Nouwen et al.) 345
Free fatty acid, uptake, by duck hepatocytes, insulin and (Gross & Mialhe) 381
Frog, pituitary gland, effect of TRH, somatostatin and dopamine on (Hall & Chadwick) 175
testosterone production in (Pierantoni et al.) 387
Gastrin releasing peptide, and ACTH release, from rat pituitary cells (Hale et al.) R1
Glucagon, and thyroid hormone secretion, rat thyroid fragments (Attali et al.) 43
Glucocorticoid, receptor, in rat skin, adrenalectomy and (Smith & Shuster) 161
receptors, androgen and, in rat perineal muscle (DuBois & Almon) 225
Glucose, oxidation, insulin-stimulated, in pregnant rat adipocytes (Sutter-Dub et al.) 209
α-Glycerophosphate, production, by duck hepatocytes, insulin and (Gross & Mialhe) 381
Gonad, gonadectomy and gonadotrophin secretion, effect of opiates, rat (Bhanot & Wilkinson) 133
Gonadotrophin releasing hormone (GnRH), receptors, dopaminergic regulation of, rat pituitary gland (Clayton & Bailey) 215
testicular response to, during sexual cycle, frog (Pierantoni et al.) 387

Insulin, and free fatty acid uptake, by duck hepatocytes (Gross & Mialhe) 381
receptors, in mammary gland and adipose tissue, effect of prolactin, during extended lactation, rat (Flint et al.) 231
resistance, in pregnant rat adipocytes (Sutter-Dub et al.) 209
-secrating cell, intra- and transcellular relationships in islet of Langerhans (Orci) 3
serum, and body weight, premenarchial rhesus monkey (Wilson et al.) 311
Isoprenaline, and uterine smooth muscle, interaction with PGE, rat (Krall et al.) 329

Lactation, extended, prolactin and, rat (Flint et al.) 231
prolactin and LH during, rat (Södersten & Eneroth) 251
Lactogen, placental, and mammary gland development, ewes and heifers (Schams et al.) 121
Langerhans, islet of, intra- and transcellular relationships in islet of Langerhans (Orci) 3
Lemur, lesser mouse, pheromone-like sexual inhibition in (Schilling et al.) 143
Leydig cell, function, in cryptorchid testis, rat (Sharpe et al.) 319
Luteinizing hormone (LH), in serum and pituitary gland, prolactin and, rat (Clayton & Bailey) 215
interruption of persistent oestrus by, rat (Everett) 271
plasma, effects of pinealectomy, oestradiol and melatonin on, ovariectomized sheep (Kenny et al.) 199
plasma, seasonal differences in, cow (McNatty et al.) 189
receptor, in Leydig cell of heat-acclimatized rat (Bedrak & Chap) 167
secretion, alphaxalone anaesthesia and, rat (Dyer & Mansfield) 27
secretion, and pituitary DNA synthesis, castrated rat (Romano et al.) 13
secretion, effects of opiates and gonadal steroids, rat (Bhanot & Wilkinson) 133
serum, oestradiol and, during ovarian cycle, rat (Döcke et al.) 287
serum, sucking and, rat (Södersten & Eneroth) 251
-stimulated cyclic AMP, in Leydig cell of heat-acclimatized rat (Bedrak & Chap) 167
Luteinizing hormone releasing hormone (LHRH), neurones, and progesterone receptor, in hypothalamus of laying hen (Sterling et al.) R5

Mammary gland, development of, role of steroid hormones, prolactin and placental lactogen, ewes and heifers (Schams et al.) 121
prolactin and, during extended lactation, rat (Flint et al.) 231
Man, epidermal growth factor and thyroid membranes (Humphries et al.) 57
prolactin and zinc in prostate (Leake et al.) 73
salivary progesterone and ovarian function (Read et al.) 265
soya as a source of equol (Axelson et al.) 49
TSH receptors in pathological thyroid tissue (Kermode et al.) 369
Maternal behaviour, exposure to pups and, male rat (Södersten & Eneroth) 115
Medial preoptic area, and negative oestrogen feedback during ovarian cycle, rat (Döcke et al.) 287
Melanin-concentrating hormone (MCH), and colour change, eel (Gilmam & Baker) 237
Melanophore-stimulating hormone, and colour change, eel (Gilmam & Baker) 237
Melatonin, and plasma gonadotrophins, pinealectomized ovariectomized sheep (Kenny et al.) 199
Mesotocin, serum, effect of dehydration, haemorrhage and oviposition, domestic fowl (Nouwen et al.) 345
Metabolism, in mammary gland and adipose tissue, effect of prolactin, during extended lactation, rat (Flint et al.) 231
Met-enkephalin, analogue, and gonadotrophin secretion, effect of gonadal steroids, rat (Bhanot & Wilkinson) 133
Metoclopramide, and pituitary GnRH receptors, rat (Clayton & Bailey) 215
Milk, ejection, oxytocin secretion during, cow (Schams et al.) 337
Milstein, androgen and glucocorticoid receptors in, rat (DuBois & Almon) 225
Muscle, perineal, androgen and glucocorticoid receptors in, rat (DuBois & Almon) 225
uterine, effect of PGE and isoprenaline on, rat (Krall et al.) 329
Naloxone, and gonadotrophin secretion, effect of gonadal steroids, rat (Bhanot & Wilkinson) 133
Neurones, stria terminalis, hyperprolactinaemia and testosterone sensitivity of, rat (Kendrick & Dixon) 109
Oestradiol, and body weight, premenarchial rhesus monkey (Wilson et al.) 311
and gonadotrophin secretion, effect of opiates, rat (Bhanot & Wilkinson) 133
-17ß, and mammary gland development, ewes and heifers (Schams et al.) 121
and plasma gonadotrophins, pinealectomized ovariectomized sheep (Kenny et al.) 199
production, follicular, prolactin and, rat (Üilenbroek & van der Linden) 245
Oestrogen, binding, in rat granulosa cells (Kudolo et al.) 83
-binding species, second, in rat granulosa cells (Kudolo et al.) 93
equol, soya as a source of, man and rat (Axelson et al.) 49
interaction with progesterone, and uterine eosinophilia, rat (Grunert et al.) 295
metabolites, urinary, during ovarian cycle and pregnancy, marmoset (Eastman et al.) 19
negative feedback, during ovarian cycle, rat (Döcke et al.) 287
-stimulated LH surge, alphaxalone anaesthesia and, rat (Dyer & Mansfield) 27
Oestrous cycle, after interruption of persistent oestrus, rat (Everett) 271
urinary steroid metabolites during, marmoset (Eastman et al.) 19
Opiates, and gonadotrophin secretion, effect of gonadal steroids, rat (Bhanot & Wilkinson) 133
Orci, L., Dale Medalist 1983, biographical note 1
Osteoclast, cytoplasmic spreading of, effect of parathyroid hormone and calcitonin, rat (Chambers et al.) 281
Ovarian cycle, negative oestrogen feedback during, rat (Döcke et al.) 287
Ovary, activity of, seasonal differences in, cow (McNatty et al.) 189
follicular oestriadiol production, prolactin and, rat (Uilenbroek & van der Linden) 245
function of, salivary progesterone and, postmenarcheal girls (Read et al.) 265
granulosa cells, oestrogen binding in, rat (Kudolo et al.) 83
granulosa cells, second oestrogen-binding species in, rat (Kudolo et al.) 93
ovariectomy and body weight, premenarchial rhesus monkey (Wilson et al.) 311
ovariectomy and extended lactation, rat (Flint et al.) 231
Ovaposition, and serum vasotocin, mesotocin and prolactin, domestic fowl (Nouwen et al.) 345
Ovulation, immunization with inhibin and, sheep (Henderson et al.) 305
Oxazolone, response to, parathyroidectomy and, rat (Perris et al.) 257
Oxytocin, release, positive feedback control of, rat magnocellular nuclei (Moos et al.) 63
secretion, during milking, cow (Schams et al.) 337
Pancreas, patterns of organization in (Orci) 3
Parathyroid, parathyroidectomy and cell-mediated immunity, rat (Perris et al.) 257
Parathyroid hormone (PTH), and cytoplasmic spreading of osteoclasts, rat (Chambers et al.) 281
bioassay of, in sheep parotid gland (Wright et al.) 375
serum, calcitonin and, sheep (Matsu et al.) 365
Paraventricular nucleus, oxytocin and vasopressin release by, rat (Moos et al.) 63
Parotid gland, bioassay of PTH in, sheep (Wright et al.) 375
Perifusion, of rat thyroid fragments (Attali et al.) 43
Phenobarbitone, interruption of persistent oestrus by, rat (Everett) 271
Pheromone, -like sexual inhibition, lemur (Schilling et al.) 143
Phosphorus, salivary, calcitonin and, sheep (Matsu et al.) 365
Photoperiod, and plasma prolactin, male starling (Goldsmith & Nicholls) 353
Pig, epidermal growth factor and thyroid membranes (Humphries et al.) 57
Pineal gland, pinealectomy and plasma gonadotrophins, ovariecotized sheep (Kennaway et al.) 199
Pituitary cells, ACTH release from, effect of gastrin releasing peptide, rat (Hale et al.) R1
Pituitary factors, testicular response to, during sexual cycle, frog (Pierantoni et al.) 387
Pituitary gland, activation of androgen receptors in, rat (Greenstein) 181
anterior, ACTH release from, corticosteroid and, rat (Mahmoud et al.) 33
DNA synthesis in, LH secretion and, castrated rat (Romano et al.) 13
GH and prolactin secretion from, effect of TRH, somatostatin and dopamine, amphibia and reptiles (Hall & Chadwick) 175
GnRH receptors in, dopaminergic regulation of, rat (Clayton & Bailey) 215
testosterone and, fowl (Hall et al.) 153

Pregnancy, insulin resistance during, rat (Sutter-Dub et al.) 209
progestosterone metabolism during, rat (Waddell & Bruce) 357
urinary steroid metabolites during, marmoset (Eastman et al.) 19
Progestosterone, and extended lactation, rat (Flint et al.) 231
and mammary gland development, ewes and heifers (Schams et al.) 121
and skin glucocorticoid receptor, adrenalectomized rat (Smith & Shuster) 161
interaction with oestrogen, and uterine eosinophilia, rat (Grunert et al.) 295
metabolism, in pregnant rat (Waddell & Bruce) 357
metabolites, urinary, during, ovariocytic cycle and pregnancy, marmoset (Eastman et al.) 19
plasma, seasonal differences in, cow (McNatty et al.) 189
receptor, and LHRH neurones, in hypothalamus of laying hen (Sterling et al.) R5
salivary, and ovarian function, postmenarcheal girls (Read et al.) 265
Prolactin, and extended lactation, rat (Flint et al.) 231
and follicular oestriadiol production, rat (Uilenbroek & van der Linden) 245
and mammary gland development, ewes and heifers (Schams et al.) 121
and oestrus cycle, after interruption of persistent oestrus, rat (Everett) 271
and regulation of pituitary GnRH receptors, rat (Clayton & Bailey) 215
and zinc, in human prostate (Leake et al.) 73
hyperprolactinaemia and testosterone-sensitive neurones, rat (Kendrick & Dixson) 109
plasma, effects of pinealectomy, oestriadiol and melatonin on, ovariecotized sheep (Kennaway et al.) 199
plasma, photoperiod and, male starling (Goldsmith & Nicholls) 353
plasma, seasonal differences in, cow (McNatty et al.) 189
release, testosterone and, fowl pituitary gland (Hall et al.) 153
secretion, effects of opiates and gonadal steroids, rat (Bhanot & Wilkinson) 133
secretion, from amphibian and reptilian pituitary gland, effect of TRH, somatostatin and dopamine (Hall & Chadwick) 175
serum, effect of dehydration, haemorrhage and oviposition, domestic fowl (Nouwen et al.) 345
serum, exposure to pups and, male rat (Södersten & Eneroth) 115
serum, suckling and, rat (Södersten & Eneroth) 251
Prostaglandin E₂ (PGE₂), and uterine smooth muscle, interaction with isoprenaline, rat (Krall et al.) 329
-stimulated prolactin and GH release, effect of testosterone, fowl pituitary gland (Hall et al.) 153
Prostate, activation of androgen receptors in, rat (Greenstein) 181
prolactin and zinc in, man (Leake et al.) 73
Puberty, cyproterone acetate and, male mouse (Jean-Faucher et al.) 103
Quail, Japanese, testosterone metabolism in embryo (Balthazar & Ottinger) 77

Rat, activation of brain androgen receptors (Greenstein) 181
adrenalectomy and skin glucocorticoid receptor (Smith & Shuster) 161
alphaxalone anaesthesia and LH secretion (Dyer & Mansfield) 27
androgen and glucocorticoid receptors in perineal muscle (DuBois & Almon) 225
behavioural effects of prolactin (Södersten & Eneroth) 115
corticosteroid and ACTH release (Mahmoud et al.) 33
cytoplasmic spreading of osteoclasts (Chambers et al.) 281
dopaminergic regulation of GnRH receptors (Clayton & Bailey) 215

Receptor, rat, receptors, somatostatin, sheep, sexual

Soya, a source of equol, man and rat (Axelson et al.) 49

Starling, photoperiod and plasma prolactin (Goldsmith & Nicholls) 353

Suckling, effect on prolactin and LH, rat (Södersten & Eneroth) 251

Supraoptic nucleus, oxytocin and vasopressin release by, rat (Moos et al.) 63

Irrapin, pituitary gland, effect of TRH, somatostatin and dopamine on (Hall & Chadwick) 175

Testis, castration, effect on LH secretion and pituitary DNA synthesis, rat (Romano et al.) 13

Calcitonin, oestrogen, androgens, and other hormones (Humphries et al.) 13

Progesterone, and LH, 109

Pregnancy, LH, 109

PGE2, 329

Perifusion, insulin secretion, 357

Insulin, oestrogen and progesterone, during ovarian cycle (Döcke et al.) 287

Oestrogen, progesterone and uterine eosinophila (Grunert et al.) 295

Oestrogen binding in granulosa cells (Kudolo et al.) 83

Opiates, gonadal steroids and gonadotrophin secretion (Bhanot & Wilkinson) 133

Parathyroidectomy and cell-mediated immunity (Perris et al.) 257

Perifusion of thyroid fragments (Attali et al.) 43

Pituitary cells, CRF-mediated ACTH release from (Hale et al.) R1

Positive feedback control of oxytocin release (Moos et al.) 63

Pregnant, progesterone metabolism in (Waddell & Bruce) 357

Prolactin and extended lactation (Flint et al.) 231

Prolactin and follicular oestradiol production (Uilenbroek & van der Linden) 245

Prolactin and LH during lactation (Södersten & Eneroth) 251

Second oestrogen-binding species in granulosa cells (Kudolo et al.) 93

Soya as a source of equol (Axelson et al.) 49

Receptor, androgen, activation of, rat brain and pituitary and prostate glands (Greenstein) 181

For TSH, in pathological thyroid tissue, man (Kermode et al.) 369

Glucocorticoid, in rat skin, adenectomy and (Smith & Shuster) 168

Insulin, in pregnant rat adipocytes (Sutter-Dub et al.) 209

Progesterone, and LH, 109

Neurons, in hypothalamus of laying hen (Sterling et al.) 85

Receptors, GnRH, in pituitary gland, dopaminergic regulation of, rat (Clayton & Bailey) 215

Oestrogen, in rat granulosa cells (Kudolo et al.) 83

On thyroid membranes, epidermal growth factor and, man and pig (Humphries et al.) 57

5α-Reductase, activity, in quail embryo (Balthazart & Ottinger) 77

Saliva, phosphorus and calcium in, calcitonin and, sheep (Matsui et al.) 365

Progesterone in, and ovarian function, postmenarchal girls (Read et al.) 265

Sexual activity, pheromone-like signal and, lemur (Schilling et al.) 143

Sexual behaviour, exposure to pups and, male rat (Södersten & Eneroth) 115

Sexual maturation, cyproterone acetate and, male mouse (Jean-Faucer et al.) 103

Sheep, bioassay of PTH (Wright et al.) 375

Calcitonin and salivary phosphorus and calcium (Matsui et al.) 365

Ectopic calcitonin and salivary phosphorus and calcium (Matsui et al.) 365

Effector organs of penealectomy, oestradiol and melatonin on plasma gonadotrophins (Kennaway et al.) 199

Hormones and mammary gland development (Schams et al.) 121

Immunization with inhibin and ovolation rate (Henderson et al.) 305

Skin, glucocorticoid receptor in, adenectomy and, rat (Smith & Shuster) 161

Somatomedin-C, serum and body weight, premenarchal rhesus monkey (Wilson et al.) 311

Somatostatin, effect on prolactin and GH secretion, amphibian and reptilian pituitary gland (Hall & Chadwick) 175

Vasopressin, release, positive feedback control of, rat magnocellular nuclei (Moos et al.) 63

Vasotocin, serum, effect of dehydration, haemorrhage and oviposition, domestic fowl (Nouwen et al.) 345

Zinc, and prolactin, in human prostate (Leake et al.) 73
