Forthcoming papers

A novel class of inactive steroid-binding sites in female rat liver nuclei. D. M. Bechet & B. N. Perry.

Relationship between the vitamin D content of maternal milk and the vitamin D status of nursing women and breast-fed infants. L. Cancela, N. Le Boulch & L. Miravet.

Control of leucocyte infiltration into the deciduized mouse uterus. C. A. Finn & M. Pope.

Effects on growth and body composition of androgen deprivation by castration or autoimmunization to LH-releasing hormone in the male rat under conditions of controlled food intake. J. M. Fletcher, G. E. Lobley & A. Connell.

Differential potency of oestradiol-17β and diethylstilboestrol on separate groups of responses in the rat uterus. G. Grunert, M. Porcia & A. N. Tchernitchin.

Ontogeny of prolactin receptors in rat decidual tissue: binding by a locally produced prolactin-like hormone. P. G. Jayatilak & G. Gibori.

Effects of hypohysectomy and growth hormone infusion on rat hepatic carbonic anhydrases. S. Jeffery, C. A. Wilson, A. Mode, J.-Å. Gustafsson & N. D. Carter.

Somatostatin immunoneutralization stimulates thyroid function in fowl. S.-K. Lam, S. Sam, H. Harvey, T. R. Hall & G. S. G. Spencer.

Superior cervical gangliectomy prevents gonadal regression and increased plasma prolactin concentrations induced by long days in goats. K.-I. Maeda, Y. Mori & Y. Kano.

Plasma testosterone-binding globulin-binding capacity in the male lesser mouse lemur (Microcebus murinus): relationship to seasonal and social factors. M. Perret.

Effects of histamine H₁ and H₂-receptor antagonists on thyrotrophin secretion in the rat. E. R. Ulloa & A. A. Zaninovich.

Anouncements

Xth International Symposium on Neurosecretion

This meeting will be held in Bristol from 31 August to 5 September 1987. It will be centered on the secretion of neuropeptides, and will consider studies of the whole Animal Kingdom. For each topic there will be a number of invited speakers, together with free poster sessions. The programme will ensure generous time for display and discussion of posters. Topics will include: Molecular and Cellular Biology of Neuropeptide Secretion; Regulation of Neuropeptide Release; Co-localization of Neuropeptides and Morphological Techniques for Studying Neuropeptide Production.

Further information is available from Neurosecretion Symposium Secretary, Department of Anatomy, Medical School, University of Bristol, Bristol BS8 1TD.

American Narcolepsy Association

The American Narcolepsy Association announces the availability of funds for new research projects in narcolepsy (animal studies excluded). Grants of up to $70 000 for each study are available. Studies may be of 1 to 3 years duration.

To apply, submit a two-page research proposal outline including (1) specific aims, (2) significance, (3) methods, and (4) budget, and investigator's curricula vitae. This should be sent to American Narcolepsy Association, P.O. Box 1187, San Carlos, California 94070, U.S.A., by 1 June, 1986.

After the review of all two-page summaries, selected applicants will be invited to submit formal proposals. Final awards are expected to be made on or before 31 December 1986.
Indexes to volume 109

The titles given below are abbreviated or modified. Full titles are given in the contents of volume 109. Rapid Communications appearing in the final issue of volume 108 appear in these lists.

Subject index

Acetylcholine, synergistic interactions of, and GH release, cattle (Ingram & Bicknell) 67
Actinomycin D, and lipogenic effect of oestrogen, rat pretubal gland (Alves et al.) 1
Adrenal, perfused flow rate in, rat (Hinson et al.) 279
purification of zona glomerulosa cells, rat (Chu & Hyatt) 351
steroid secretion from, ACTH and, guinea-pig (Robertson et al.) 399
Adrenaline, in MBH of oestrogen-stimulated infant female rat (Clement et al.) 45
Adrenergic activity, central, oestrogen-stimulated, infant female rat (Clement et al.) 45
Adrenocortical cells, stimulation of, by ACTH fragments, rat (Vinson et al.) 275
Adrenocorticotropic (ACTH), and steroid secretion from adrenal, guinea-pig (Robertson et al.) 399
and zona glomerulosa cells, rat (Chu & Hyatt) 351
effect on flow rate and steroid output, rat perfused adrenals (Hinson et al.) 279
fragments of, adrenocortical stimulation by, rat (Vinson et al.) 275
Age, and serum gonadotrophins and cholesterol, female rabbit (YoungLai) 287
Aldosterone, output and flow rate, perfused adrenals, rat (Hinson et al.) 279
plasma, dopamine and, man (Connell et al.) 339
production of, and ACTH fragments, rat adrenal (Vinson et al.) 275
secretion of, by zona glomerulosa cells, rat (Chu & Hyatt) 351
Androgen, receptor for, in cryptorchid testis, rat (Winters) 427
receptor for, regulation of, quail uroplagial gland (Amet et al.) 299
Androgens, binding to feather follicles, chicken (Kovács et al.) 187
Androstenedione, adrenal secretion of, ACTH and, guinea-pig (Robertson et al.) 399
Angiotensin II amide, and flow rate, perfused adrenals, rat (Hinson et al.) 279
Antibody, monoclonal, to ovarian inhibin, rat (Lee et al.) 379
Arginine vasopressin, and release of oxytocin, rabbit (Tindal & Blake) 405
Arginine vasotocin, and glycoegenolysis in liver, axolotl (Janssens et al.) 75
Aromatase, brain, photoperiod and, dove (Hutchison et al.) 371
ATP, and cortisol metabolism, mononuclear cells, man (Klein et al.) 181
and potassium channels, insulin-secreting cell line, rat (Sturgess et al.) 201
Atrial natriuretic peptide (ANP), atrial distension and, dog (Knapp et al.) R5
plasma, blood volume expansion and, rat (Anderson et al.) 9
Atrium, distension of, and ANP, dog (Knapp et al.) R5
Axolotl, regulation of glycoegenolysis in liver (Janssens et al.) 75
Calcium, and milk production, mouse (Caulfield & Bolander) 29
and regulation of glycoegenolysis in liver, axolotl (Janssens et al.) 75
low dietary, and response to hypoglycaemia, pig (Maunder et al.) 101
Calcium-binding protein, plasma, hypoglycaemia and, pig (Maunder et al.) 101
Calcium ions, and potassium channels, insulin-secreting cell line, rat (Sturgess et al.) 201
Calmodulin, in rabbit myometrium (Matsui et al.) 97
Carbon, colloidal, and oestrogen-induced uterine eosinophilia, rat (López et al.) 89
Carotilage, condylar, effect of cyclic AMP and glucocorticoids on, mouse (Kraiem et al.) 209
Catecholamines, and glycoegenolysis in liver, axolotl (Janssens et al.) 75
Cattle, granulosa-theca interaction and oxytocin secretion (Jungclas & Luck) R1
male, long-term LHRH-A infusion and testosterone secretion (von Rechenberg et al.) R9
mammary lactogenic hormone receptors (Kazmer et al.) 175
synergistic interactions and GH secretion (Ingram & Bicknell) 67
Cerebellum, mRNA from, sexual dimorphism of, neonatal rat (Adcock & Greenstein) 23
Cholesterol, serum, age and, female rabbit (YoungLai) 287
Circadian rhythm, oestrogen stimulated, of PNMT activity, MBH of infant female rat (Clement et al.) 45
Clover disease, oestrogen receptors in, sheep (Tang & Adams) 251
Corpus luteum, and placenta interactions, rabbit (Nowak et al.) 107
Corticosterone, binding to feather follicles, chicken (Kovács et al.) 187
output, and flow rate, perfused adrenals, rat (Hinson et al.) 279
plasma, dopamine and, man (Connell et al.) 339
production of, and ACTH fragments, rat adrenal (Vinson et al.) 275
secretion of, by zona glomerulosa cells, rat (Chu & Hyatt) 351
serum, effect of age, sex and strain, mouse (Faict et al.) 141
Cortisol, adrenal secretion of, ACTH and, guinea-pig (Robertson et al.) 399
metabolism of, in mononuclear cells, man (Klein et al.) 181
plasma, dopamine and, man (Connell et al.) 339
plasma, effect of prolactin and GH on, newborn lamb (Kühn et al.) 215
plasma, hypoglycaemia and, pig (Maunder et al.) 101
Cyclic AMP, and thymidine incorporation into cartilage, mouse (Kraiem et al.) 209
and TSH secretion, rat (Davis & Sheppard) 365
-dependent protein kinase, activity of, rabbit myometrium (Matsui et al.) 97
Deoxycorticosterone, plasma, dopamine and, man (Connell et al.) 339
Deoxycorticosterol, plasma, dopamine and, man (Connell et al.) 339
Development, mammary gland, protein kinase C and, mouse (Caulfield & Bolander) 29
Dexamethasone, and thymidine incorporation into cartilage, mouse (Kraiem et al.) 209
Dibutyryl cyclic AMP, and effect of EGF on thyroid cell membrane potential, pig (Bourke et al.) 321
and TSH secretion, rat (Davis & Sheppard) 365
effect on flow rate and steroid output, rat perfused adrenals (Hinson et al.) 279
Dog, ANP during atrial distension (Knapp et al.) R5
Dopamine, and plasma 11-deoxycorticosteroids, man (Connell et al.) 339
and prolactin secretion, effect of opiates on, rat (Bentley & Wallis) 313
Dove, Barbary, photoperiod and brain aromatase (Hutchison et al.) 371

Enkephalin analogues, and prolactin secretion, rat (Bentley & Wallis) 313

Eosinophilia, oestrogen-induced uterine, colloidal carbon and, rat (López et al.) 89

Epidermal growth factor (EGF), and thyroid cell membrane potential, pig (Bourke et al.) 321

recombinant, properties of, man (Read et al.) 245

submandibular, oestrogen and, mouse (Kurachi & Oka) 221

transfer of, from blood into milk, goat (Brown et al.) 325

Eumelanin, hair, MSH and, mouse (Burchill et al.) 15

Feather follicles, steroid binding to, chicken (Kovács et al.) 187

Ferguson reflex, and oxytocin release, rat (Higuchi et al.) 149

Fetus, GH secretion in, sheep (Bassett & Gluckman) 307

IGF-binding proteins in, sheep (Butler & Gluckman) 333

renin substrates in, man (Tctlow & Broughton Pipkin) 257

Flow rate, in perfused adrenals, rat (Hinson et al.) 279

Follicle, granulosa-theca interaction and oxytocin secretion, cattle (Jungclas & Luck) R1

Follicle-stimulating hormone (FSH), and inhibin production, Sertoli cells, rat (Ultee-van Gessel et al.) 411

release of, GnRH and, ovine pituitary cells (McIntosh & McIntosh) 155

serum, age and, female rabbit (YoungLai) 287

Forskinol, and TSH secretion, rat (Davis & Sheppard) 365

Fowl, steroid binding to feather follicles (Kovács et al.) 187

Gestation, length of, relaxin apr, rat (Jones & Summerlee) 85

Glucagon, -producing cell lines, rat (Carrington et al.) 193

Glucocorticoids, and thyimidine incorporation into cartilage, mouse (Kjaeri et al.) 209

Glucose, and cortisol metabolism, mononuclear cells, man (Klein et al.) 181

Glycogenolysis, liver, regulation of, axolotl (Janssens et al.) 75

Goat, EGF transfer from blood into milk (Brown et al.) 325

Gonadotrophin, human chorionic (hCG), and microcirculation in testis, man (Widmark et al.) 419

Gonadotrophin-releasing hormone (GnRH), effect on LH and FSH, ovine pituitary cells (McIntosh & McIntosh) 155

Gonadotrophins, surge of, and central adrenergic activity, oestrogen-stimulated infant female rat (Clement et al.) 45

Gonadotrophins, pituitary, LHRH and granules, hpg and normal mice (Lewis et al.) 35

Granules, pituitary gonadotroph, LHRH and, hpg and normal mice (Lewis et al.) 35

Granulosa cells, and oxytocin secretion, cattle (Jungclas & Luck) R1

Growth, autocrine regulation of, by somatomedin C, human haemangiosarcoma cells (Pavelić et al.) 233

prenatal stress and, rat (Pollard) 239

Growth hormone (GH), and thyroid function, newborn lamb (Kühn et al.) 215

binding of, liver cytosol, rat (Herington et al.) 61

GRF responses to, thyroid hormones and, rat (Dieguez et al.) 53

lactogenic activity of, mouse (Thordarson et al.) 263

plasma, somatostatin and, starved rat (Hugues et al.) 169

secretion of, fetal sheep (Bassett & Gluckman) 307

secretion of, synergistic interactions and, cattle (Ingram & Bicknell) 67

Growth hormone-releasing factor (GRF), synergistic interactions of, and GH release, cattle (Ingram & Bicknell) 67

thyroid hormones and GH responses to, rat (Dieguez et al.) 53

Guinea-pig, effect of ACTH on steroid secretion from adrenal (Robertson et al.) 399

Haemangiosarcoma cells, autocrine growth regulation of, by somatomedin C, man (Pavelić et al.) 233

Hair, follicular melanocytes, MSH and, mouse (Burchill et al.) 15

Hemipituitary glands, prolactin secretion from, opiates and, rat (Bentley & Wallis) 313

25R-Hydroxycholesterol, and steroid production in Leydig cells, rat (Rommerts et al.) 111

3ß-Hydroxysteroid dehydrogenase, testicular, prenatal stress and, rat (Pollard) 259

Hyperthyroidism, and GH responses to GRF, rat (Dieguez et al.) 53

Hypoglycaemia, and plasma calcium-binding protein, cortisol and phosphate, pig (Maunder et al.) 101

Hypothalamic, LHRH in, testosterone metabolites and, rat (Zanisi et al.) 291

stimulation of, preoptic area, and prolactin secretion, rat (Dyer & Mansfield) 57

Hypothyroidism, and GH responses to GRF, rat (Dieguez et al.) 53

anterior pituitary gland of hyp mouse (Noguchi et al.) 163

in pyridoxine-deficient rat (Dakshinamurti et al.) 345

Hypoxia, hypobaric, effect on thyrotrhops and thyroid gland, rat (Gosney) 119

Inhibin, -like activity, production by Sertoli cells, rat (Ultee-van Gessel et al.) 411

ovarian, monoclonal antibody to, rat (Lee et al.) 379

Insulin, induced hypoglycaemia, and plasma calcium-binding protein, cortisol and phosphate, pig (Maunder et al.) 101

- producing cell lines, rat (Carrington et al.) 193

- secreting cell line, single potassium channels in, rat (Sturgess et al.) 20

Insulin-like growth factor (IGF), - binding proteins, fetal, neonatal and adult sheep (Butler & Gluckman) 333

α-Lactalbumin, synthesis of, placental lactogen and, mouse (Thordarson et al.) 263

Lactate, and cortisol metabolism, mononuclear cells, man (Klein et al.) 181

Lactation, and mammary lactogenic hormone receptors, cow (Kazmer et al.) 175

EGF transfer from blood into milk during, goat (Brown et al.) 325

oxytocin release during, relaxin and, rat (O’Byrne et al.) 393

Lactogen, placental, lactogenic activity of, mouse (Thordarson et al.) 263

Leydig cells, steroid production in, testicular fluid and, rat (Rommerts et al.) 111

Limbic system, mRNA from, sexual dimorphism of, neonatal rat (Adcock & Greenstein) 23

Lipids, preputial lipogenesis, oestrogen and, rat (Alves et al.) 1

Liver, prolactin-binding activity in, rat (Herington et al.) 61

regulation of glycolysis in, axolotl (Janssens et al.) 75

Luteinizing hormone (LH), and steroid production in Leydig cells, rat (Rommerts et al.) 111

plasma, testosterone and, photosensitive male tree sparrow (Wilson) 133

release of, GnRH and, ovine pituitary cells (McIntosh & McIntosh) 155

release of, pituitary gonadotrophs, LHRH and, hpg and normal mice (Lewis et al.) 35

serum, age and, female rabbit (YoungLai) 287

serum, effects of testosterone metabolites and oestrogen, rat (Zanisi et al.) 291

Luteinizing hormone-releasing hormone agonist (LHRH-A), and pituitary gonadotrophs, hpg and normal mice (Lewis et al.) 35

and steroid production in Leydig cells, rat (Rommerts et al.) 111

testosterone metabolites and, rat (Zanisi et al.) 291

Luteinizing-hormone-releasing hormone agonist (LHRH-A), and testosterone secretion, bull (von Rechenberg et al.) 9

Mammary gland, development of, protein kinase C and, mouse (Caulfield & Bolander) 29

epithelial cells of, placental lactogen and, mouse (Thordarson et al.) 263

Mammary tissue, lactogenic hormone receptors in, cow (Kazmer et al.) 175

Man, autocrine tumour growth regulation (Pavelić et al.) 233
cortisol metabolism in mononuclear cells (Klein et al.) 181
dopamine and plasma 11-deoxycorticosteroids (Connell et al.) 339
hCG and testicular microcirculation (Widmark et al.) 419
properties of recombinant EGF (Read et al.) 245
renin substrates in pregnancy (Tetlow & Broughton Pipkin) 257

Mediobasal hypothalamus (MBH), oestrogen-stimulated adrenergic activity in, infant female rat (Clement et al.) 45
Melanocytes, hair follicular, MSH and, mouse (Burchill et al.) 15
Melanocyte-stimulating hormone (MSH), and hair follicular melanocytes, mouse (Burchill et al.) 15
α-Melanocystimulating hormone (α-MSH), and adrenocortical stimulation, rat (Vinson et al.) 275

Membrane potential, thyroid cell, EGF and, pig (Bourke et al.) 321
Midbrain, role of, in inhibition of oxytocin release, rabbit (Tindal & Blake) 405

Milk, EGF in, comparison with recombinant EGF, man (Read et al.) 245
EGF transfer into, from blood, goat (Brown et al.) 325
production of, protein kinase C and, mouse (Caulfield & Bolander) 29

Mononuclear cells, cortisol metabolism in, man (Klein et al.) 181

Morphine sulphate, and prolactin secretion, rat (Bentley & Wallis) 313

Mouse, effect of age, sex and strain on serum transcortin and DBP (Faic et al.) 141
effect of cyclic AMP and glucocorticoids on cartilage (Kraiem et al.) 209
EGF from, comparison with recombinant human EGF (Read et al.) 245

hpG and normal, granule changes during LHRH priming (Lewis et al.) 35
hyp, anterior pituitary gland (Noguchi et al.) 163
lactogenic activity of placental lactogen (Thordarson et al.) 263
MSH control of hair follicular melanocytes (Burchill et al.) 15
oestrogen and submandibular EGF (Kurachi & Oka) 221
protein kinase C and mammary gland development (Caulfield & Bolander) 29

Myometrium, protein phosphorylation in, rabbit (Matsui et al.) 97
Myosin light chain kinase, activity of, rabbit myometrium (Matsui et al.) 97

NADH, and cortisol metabolism, mononuclear cells, man (Klein et al.) 181
NADPH, and cortisol metabolism, mononuclear cells, man (Klein et al.) 181

Naloxone, and effect of morphine on prolactin secretion, rat (Bentley & Wallis) 313

Natriuresis, atrial distension and, dog (Knapp et al.) R5

Neurohypophysis, release of oxytocin from, relaxin and, rat (O’Byrne et al.) 393

Oestradiol-17β, brain, photoperiod and, dove (Hutchison et al.) 371

Ostrogen, and hypothalamic LHRH/serum LH, rat (Zani et al.) 291
and preputial lipogenesis, rat (Alves et al.) 1
and submandibular EGF, mouse (Kurachi & Oka) 221
-induced eosinophilia, colloidal carbon and, rat (López et al.) 89
receptors in clover disease, sheep (Tang & Adams) 251
-stimulated central adrenergic activity, infant female rat (Clement et al.) 45

Ostrogens, binding of, to feather follicles, chicken (Kovács et al.) 187

Opiates, and prolactin secretion, rat (Bentley & Wallis) 313
Ovary, granulosa-theca interaction and oxytocin secretion, cattle (Jungclaus & Luck) R1
inhibin in, monoclonal antibody to, rat (Lee et al.) 379
ovariectomy and corpora lutea, rabbit (Nowak et al.) 107
ovariectomy and submandibular EGF, mouse (Kurachi & Oka) 221

Oxytocin, inhibition of release, rabbit (Tindal & Blake) 405
release of, pelvic-neurectomized rat (Higuchi et al.) 149
release of, relaxin and, rat (O’Byrne et al.) 393

Pancreas, insulin-secreting cell line, potassium channels in, rat (Sturgess et al.) 201
islet β cells, insulin-producing cell lines, rat (Carrington et al.) 193
Parturition, length of, relaxin and, rat (Jones & Summerlee) 85
oxytocin release during, pelvic-neurectomized rat (Higuchi et al.) 149
Pelvic nerve, and oxytocin release during parturition, rat (Higuchi et al.) 149
Phaeoœlanin, hair, MSH and, mouse (Burchill et al.) 15
Phenylethanolamine-N-methyl transferase (PNMT), activity of, in MBH of oestrogen-stimulated infant female rat (Clement et al.) 45
Phenyletoïn, and prolactin mRNA, rat (Davis et al.) 359
Phosphate, inorganic, hypoglycaemia and, pig (Maunder et al.) 101
Phosphorylation, protein, in rabbit myometrium (Matsui et al.) 97
Photoperiod, and brain aromatase, dove (Hutchison et al.) 371
Photorefractoriness, in male tree sparrow (Wilson) 133
Pig, EGF and thyroid cell membrane potential (Bourke et al.) 321
plasma calcium-binding protein, cortisol and phosphate following hypoglycaemia (Maunder et al.) 101

Pituitary cells, cyclic AMP and TSH secretion, rat (Davis & Sheppard) 365
effect of GnRH on LH and FSH release, sheep (McIntosh & McIntosh) 155
GH secretion from, synergistic interactions and, cattle (Ingram & Bicknell) 67
prolactin mRNA in, effect of phenytoin and T₃ on, rat (Davis et al.) 359

Pituitary gland, anterior, hyp mouse (Noguchi et al.) 163
hormone secretion by, somatostatin and, starved rat (Huges et al.) 169
pyridoxine and pituitary-thyroid axis, rat (Dakshinamurti et al.) 345
thyrotrophins in, hypoxia and, rat (Gosney) 119
TRH and glycylsystained TSH, rat (Mori et al.) 227
Placenta, and corpora lutea interactions, rabbit (Nowak et al.) 107
Potassium, channels in insulin-secreting cell line, rat (Sturgess et al.) 201
Potassium ions, and flow rate, perfused adrenals, rat (Hinson et al.) 279
Pregnancy, renin substrates in, women (Tetlow & Broughton Pipkin) 257
Pregnenolone, production of, testicular fluid and, rat (Rommerts et al.) 111
Preoptic area, oestriadiol-17β in, photoperiod and, dove (Hutchison et al.) 371
Preputial gland, isolated cells of, lipogenesis in, oestrogen and, rat (Alves et al.) 1
Progesterone, binding to feather follicles, chicken (Kovács et al.) 187
plasma, prenatal stress and, rat (Pollard) 239
receptors for, in uterus, snapping turtle (Mahmoud et al.) 385
serum and luteal, pregnant rabbit (Nowak et al.) 107
Prolactin, and preoptic stimulation, rat (Dyer & Mansfield) 57
and thyroid function, newborn lamb (Kühn et al.) 215
-binding activity, liver cytosol, rat (Herington et al.) 61
lactogenic activity of, mouse (Thordarson et al.) 263
mRNA for, effect of phenytoin and T₃ on, rat (Davis et al.) 359

plasma, and parturition, cow (Kazmer et al. 175)
plasma, somatostatin and, starved rat (Hugues et al.) 169
secretion of, opiates and, rat (Bentley & Wallis) 313
serum, age and, female rabbit (YoungLai) 287
**Protein kinase C**, and mammary gland development, mouse (Caulfield & Bolander) 29

**Pyridoxine**, and pituitary-thyroid axis, rat (Dakshinamurthi et al.) 345

Quail, androgen receptor in uroplacental gland (Amet et al.) 299

**Rabbit**, female, gonadotrophins and cholesterol during maturation (YoungLai) 287
inhibition of oxytocin release (Tindal & Blake) 405
placebo and corpora lutea interactions (Nowak et al.) 107
protein phosphorylation in myometrium (Matsui et al.) 97

**Rat**, adrenocortical stimulation by ACTH fragments (Vinson et al.) 275
androgen receptor in cryptorchid testis (Winters) 427
colloidal carbon and oestrogen-induced uterine eosinophilia (López et al.) 89
cyclic AMP and TSH secretion (Davis & Sheppard) 365
effect of phenytoin and T_{3} on prolactin mRNA (Davis et al.) 359
effect of prenatal stress on subsequent generations (Pollard) 239
flow rate in perfused adrenals (Hinson et al.) 279
infant female, oestrogen-stimulated central adrenergic activity in (Clement et al.) 45
inhibin production by Sertoli cells (Ulte-Van Gessel et al.) 411
insulin-producing cell lines (Carrington et al.) 193
monoclonal antibody to ovarian inhibin (Lee et al.) 379
neonatal, sexual dimorphism of brain mRNA (Adcock & Greenstein) 23
oestrogen and preputial lipogenesis (Alves et al.) 1
opiates and prolactin secretion (Bentley & Wallis) 313
pelvic-neurectomized, oxytocin release in (Higuchi et al.) 149
plasma release of ANP (Anderson et al.) 9
prolactin and preoptic stimulation (Dyer & Mansfield) 57
prolactin-binding activity in liver cytosol (Herington et al.) 61
purification of adrenal zona glomerulosa cells (Chu & Hyatt) 351
pyridoxine and pituitary-thyroid axis (Dakshinamurthi et al.) 345
relaxin and birth (Jones & Summerlee) 85
relaxin and oxytocin release (O’Byrne et al.) 393
single potassium channels in insulin-secreting cell line (Sturgess et al.) 201
somatostatin and pituitary secretion during starvation (Hugues et al.) 169
testicular fluid and steroid production (Rommerts et al.) 111
testosterone metabolites and LHRH (Zanisi et al.) 291
thyroid hormones and GH responses to GRF (Dieguez et al.) 53
thyroidophin and thyroid gland in hypoxia (Gosney) 119
TRH and glycosylated TSH (Mori et al.) 227

**Receptor**, androgen, in cryptorchid testis, rat (Winters) 427
androgen, regulation of, quail uroplacental gland (Amet et al.) 299
oestrogen, in clover disease, sheep (Tang & Adams) 251
progesterone, in uterus, snapping turtle (Mahmoud et al.) 385

Receptors, cytosol, in feather follicles, chicken (Kovács et al.) 187
mammary lactogenic hormone, cow (Kazmer et al.) 175
relaxin, and birth, rat (Jones & Summerlee) 85
and oxytocin release, rat (O’Byrne et al.) 393

Renin, substrates of, in pregnancy, women (Tetlow & Broughton Pipkin) 257

**Reproductive cycle**, protein kinase C in mammary gland during, mouse (Caulfield & Bolander) 29
testosterone sensitivity of seminal sacs during, tree sparrow (Wilson) 125

**Reticulo-endothelial system**, blockade of, and oestrogen-induced uterine eosinophilia, rat (López et al.) 89

**Reverse tri-iodothyronine**, plasma, effect of prolactin and GH on, newborn lamb (Kühn et al.) 215
mRNA, brain, sexual dimorphism of, neonatal rat (Adcock & Greenstein) 23
prolactin, effect of phentoyin and T_{3} on, rat (Davis et al.) 359

**Semenal sacs**, sensitivity of, to testosterone, tree sparrow (Wilson) 125

**Seminiferous tubule**, cryptorchid testis, androgen receptors in, rat (Winters) 427

**Sertoli cells**, inhibin production by, rat, (Ulte-Van Gessel et al.) 411

**Sexual dimorphism**, brain mRNA, neonatal rat (Adcock & Greenstein) 23
Sheep, dynamics of LH and FSH release (McIntosh & McIntosh) 155
female, neonatal anc. adult, IGF-binding protein in (Butler & Gluckman) 333
GH secretion in fetus (Bassett & Gluckman) 307
newborn, effect of prolactin and GH on thyroid function (Kühn et al.) 215

**Oestrogen receptors** in clover disease (Tang & Adams) 251

Somatomedin C, autocrine growth regulation by, haemangiosarcoma cells, men (Pavelić et al.) 233

**Somatostatin**, and pituitary secretion during starvation, rat (Hugues et al.) 169

**Sparrow**, tree, photorefractoriness in male (Wilson) 133
tree, testosterone sensitivity of, seminal sacs (Wilson) 125

**Starvation**, and effect of somatostatin on pituitary secretion, rat (Hugues et al.) 169

**Stress**, prenatal, effect of subsequent generations, rat (Pollard) 239

**Submandibular gland**, EGF in, oestrogen and, mouse (Kurachi & Oka) 221

**Synergism**, and GH secretion, cattle (Ingram & Bicknell) 67

**Testis**, cryptorchid, androgen receptor in, rat (Winters) 427
inhibin production by Sertoli cells, rat (Ulte-Van Gessel et al.) 411
microcirculation in, hCG and, man (Widmark et al.) 419
testicular fluid and steroid production, rat (Rommerts et al.) 111

**Testosterone**, and brain aromatase activity, dove (Hutchison et al.) 371
and inhibin production, Sertoli cells, rat (Ulte-Van Gessel et al.) 411
and photorefractoriness in male tree sparrow (Wilson) 133
and stimulated prolactin secretion, rat (Dyer & Mansfield) 57
secretion of, LHRH-A and, bull (von Rechenberg et al.) 9
sensitivity of seminal sacs to, tree sparrow (Wilson) 125

**Testosterone metabolites**, and hypothalamic LHRH/serum LH, rat (Zanisi et al.) 291

**Theca**, and oxytocin secretion, cattle (Jungelas & Luck) R1

**Thyroid cells**, EGF and membrane potential, pig (Bourke et al.) 321

**Thyroid gland**, function of, effect of prolactin and GH on, newborn lamb (Kühn et al.) 215
hypoxia and, rat (Gosney) 119
pyridoxine and pituitary-thyroid axis (Dakshinamurthi et al.) 345

**Thyrotrophin (TSH)**, and effect of EGF on thyroid cell membrane potential, pig (Bourke et al.) 321
glycosylated, TRH and, rat (Mori et al.) 227
pituitary, pyridoxine and, rat (Dakshinamurthi et al.) 345
plasma, somatostatin and, starved rat (Hugues et al.) 169
secretion of, cyclic AMP and, rat (Davis & Sheppard) 365

**Thyrotrophin-releasing hormone (TRH)**, and glycosylated TSH, rat (Mori et al.) 227
binding of, in pituitary, pyridoxine and, rat (Dakshinamurthi et al.) 345
hypothalamic, T_{4} and, hyp mouse (Noguchi et al.) 163

synergistic interactions of, and GH release, cattle (Ingram & Bicknell) 67
Thyrotrophs, pituitary, hypoxia and, rat (Gosney) 119
Thyroxine (T₄), and anterior pituitary gland, hyp mouse (Noguchi et al.) 163
  plasma, effect of prolactin and GH on, newborn lamb (Kühn et al.) 215
  serum, pyridoxine and, rat (Dakshinamurti et al.) 345
Transcortin, serum, effect of age, sex and strain, mouse (Faict et al.) 141
Tri-iodothyronine (T₃), and prolactin mRNA, rat (Davis et al.) 359
  plasma, effect of prolactin and GH on, newborn lamb (Kühn et al.) 215
  serum, pyridoxine and, rat (Dakshinamurti et al.) 345
Turtle, snapping, uterine progesterone receptors in (Mahmoud et al.) 385
Tyrosine, skin activity of, MSH and, mouse (Burchill et al.) 15
Urine, EGF in, comparison with recombinant EGF, man (Read et al.) 245
Uropygial gland, androgen receptor in, quail (Amet et al.) 299
Uterus, oestrogen-induced eosinophilia in, colloidal carbon and, rat (López et al.) 89
  progesterone receptors in, snapping turtle (Mahmoud et al.) 385
Vitamin D-binding protein (DBP), serum, effect of age, sex and strain, mouse (Faict et al.) 141
Zona fasciculata, steroid secretion from, ACTH and, guinea-pig (Robertson et al.) 399
Zona fasciculata/reticularis cells, stimulation of, by ACTH fragments, rat (Vinson et al.) 275
Zona glomerulosa cells, purification of, rat (Chu & Hyatt) 351
  stimulation of, by ACTH fragments, rat (Vinson et al.) 275
Zona reticularis, steroid secretion from, ACTH and, guinea-pig (Robertson et al.) 399
