<tr>
<td>Growth hormone-releasing factor expression is discordantly regulated in the hypothalamus and testis of streptozotocin-diabetic rats</td>
<td>D Olchovsky, J F Bruno &amp; M Berelowitz</td>
<td>189–192</td>
</tr>
<tr>
<td>Effects of TRH, prolactin and TSH on cell proliferation in the intermediate lobe of the rat pituitary gland</td>
<td>T Pawelczyk, M Pawlikowski &amp; J Kunert-Radek</td>
<td>193–196</td>
</tr>
<tr>
<td>The effects of GH-releasing peptide-6 (GHRP-6) and GHRP-2 on intracellular adenosine 3',5'-monophosphate (cAMP) levels and GH secretion in ovine and rat somatotrophs</td>
<td>D Wu, C Chen, J Zhang, C Y Bowers &amp; I J Clarke</td>
<td>197–205</td>
</tr>
<tr>
<td>Effects of hormone replacement therapy on platelet membrane fatty acid composition</td>
<td>L R Ranganath, J A Christofides, J W Wright &amp; V Marks</td>
<td>207–212</td>
</tr>
<tr>
<td>Inhibin and activin differentially regulate androgen production and 17α-hydroxylase expression in human ovarian thecal-like tumor cells</td>
<td>C Sawetawan, B R Carr, E Mcgee, I M Bird, T L Hong &amp; W E Rainey</td>
<td>213–221</td>
</tr>
<tr>
<td>Relationship between calbindin-D28K levels in the A and B cells of the rat endocrine pancreas and the secretion of insulin and glucagon: influence of vitamin D₃ deficiency and 1,25-dihydroxyvitamin D₃</td>
<td>P-M Bourlon, A Faure-Dussert, B Billauel, B Ch J Sutter, G Tramu &amp; M Thomasset</td>
<td>223–232</td>
</tr>
<tr>
<td>Possible mechanism for the first response to short captivity stress in the water frog, <em>Rana esculenta</em></td>
<td>A Gobbetti &amp; M Zerani</td>
<td>233–239</td>
</tr>
<tr>
<td>Characterisation of acyltransferase activity in ovine placental tissue during pregnancy and at the time of labour</td>
<td>M H Wong &amp; G E Rice</td>
<td>241–247</td>
</tr>
<tr>
<td>Ontogeny of GH receptor and GH-binding protein in the pig</td>
<td>S Schnoebelen-Combes, I Louveau, M-C Postel-Vinay &amp; M Bonneau</td>
<td>249–255</td>
</tr>
<tr>
<td>Vitamin A is involved in estrogen-induced cell proliferation but not in cytodifferentiation of the chicken oviduct</td>
<td>Y Ninomiya, Y Arao, T Kometani, S Hiwatashi, T Yamasaki, T Erikawa, H Yamaguchi, T Hasegawa, S Masushige &amp; S Kato</td>
<td>257–265</td>
</tr>
<tr>
<td>Development and application of a two-site enzyme immunoassay for the determination of 'total' activin-A concentrations in serum and follicular fluid</td>
<td>P G Knight, S Muttukrishna &amp; N P Groome</td>
<td>267–279</td>
</tr>
<tr>
<td>Peripheral and ovarian IGF-I concentrations during the ovine oestrous cycle</td>
<td>B R Leeuwenberg, N L Hudson, L G Moore, P R Hurst &amp; K P McNatty</td>
<td>281–289</td>
</tr>
<tr>
<td>Prolactin- and testosterone-induced inhibition of LH secretion after orchidectomy: role of catecholaminergic neurones terminating in the diagonal band of Broca, medial preoptic nucleus and median eminence</td>
<td>S-K Park, D A Strouse &amp; M Selmanoff</td>
<td>291–301</td>
</tr>

</table>
Pressor doses of angiotensin II increase hepatic glucose output and decrease insulin sensitivity in rats  
R H Rao  
311–318

Identification of epidermal growth factor-secreting cells in the anterior pituitary of lactating female rats  
A Mouihate, D Verrier & J Lestage  
319–324

Studies on the role of TRH and corticosterone in the regulation of prolactin and thyrotrophin secretion during lactation  
G A C van Haasteren, H van Toor, W Klootwijk, B Handler, E Linkels, P van der Schoot, J van Ophemert, F H de Jong, T J Visser & W J de Greef  
325–336

Regulation of type 1 insulin-like growth factor (IGF) receptors and IGF-I mRNA by age and nutrition in ovine skeletal muscles  
337–346

Characterization of the hypothalamo-pituitary-IGF-I axis in rats made obese by overfeeding  
L Cattaneo, V De Gennaro Colonna, M Zoli, E E Müller & D Cocchi  
347–353

Transcriptional and post-translational regulation of insulin-like growth factor-binding protein-5 in rat articular chondrocytes  
T Matsumoto, S E Gargosky, Y Oh & R G Rosenfeld  
355–369

Mediation by the central nervous system is critical to the in vivo activity of the GH1 secretagogue L-692,585  
371–380

**Forthcoming papers and Announcements**

**Directions to contributors**

---

**Number 3  ·  March 1996**

Commentary: Signal transduction systems employed by synthetic GH-releasing peptides in somatotrophs  
C Chen, D Wu & I J Clarke  
381–386

Commentary: Aldosterone action, sodium channels and inherited disease  
P J Fuller & S Lim-Tio  
387–390

Glucose tolerance and insulin secretion after adrenalectomy in mice made obese with gold thioglucose  
S C Blair, I D Caterson & G J Cooney  
391–398

Why so much oestriol? A comparison of the aromatisation of androstenedione and 16α-hydroxyandrostenedione when incubated alone or together with human placental microsomes  
Y S H Othman & R E Oakey  
399–407

Characteristics of BRIN-BG5 and BRIN-BG7, two novel glucose-responsive insulin-secreting cell lines produced by electrofusion  
N H McClenaghan, C R Barnett, F P M O'Harte, S K Swanston-Flatt, E Ah-Sing & P R Flatt  
409–417
