Cover
The cover image shows that ESR1-labelled cells (green) do not colocalise with cells expressing α-SMA (red) in ovariectomised mice and the ducts in these mice are surrounded by a continuous layer of myoepithelial cells, detected by α-SMA. This myoepithelial layer lost continuity in aged mice, more dramatically, if exposed to elevated prolactin or estrogen. Original magnification: 600 X. This image was published in an article by Arendt et al. titled ‘Ovarian hormones are not required for PRL-induced mammary tumorigenesis, but estrogen enhances neoplastic processes’. The full article can be accessed at http://dx.doi.org/10.1677/JOE-09-0221.

Forthcoming papers
Abstracts of papers in future issues of Journal of Endocrinology can be viewed online free of charge via the ‘New! Accepted Preprints’ link at http://joe.endocrinology-journals.org/

Forthcoming meetings
A calendar of world events is available on the Society for Endocrinology website at http://www.endocrinology.org/meetings/world.html

Accepted Preprints
Subscribers can also access the Accepted Preprints, a new improved service where authors’ manuscripts are posted online immediately upon acceptance, prior to copyediting, page layout and proofing.
