Author guidelines for Journal of Endocrinology

The scope of the journal

Journal of Endocrinology publishes original molecular, biochemical and physiological studies concerned with the structure and function of the endocrine and endocrine-related systems. Papers are primarily considered if they provide new substantial and mechanistic advances in the science of endocrinology. Clinical studies are normally more appropriate for a clinical journal and we do not publish clinical case reports.

Types of papers

Original research papers, short reviews and commentaries are considered. The journal will also consider the submission of research on novel/hypothetical topics.

Commentaries

The Editor-in-Chief reserves the right to invite commentaries or critiques on articles accepted for publication.

Ethics

All authors must abide by the standards outlined in our ethical guidelines (http://www.endocrinology-journals.org/misc/Ethical_guidelines.dtl). In particular, please note the need to avoid duplicate submission, plagiarism and self-plagiarism.

The Society for Endocrinology is a member of CrossCheck (http://www.crossref.org/crosscheck/crosscheck_for_researchers.html). CrossCheck is a multi-publisher initiative to screen published and submitted content for originality. Manuscript submissions will be screened against the CrossCheck database.

Open archiving and online repositories

Please note the Society's policy (http://www.endocrinology-journals.org/misc/archiving_policy.dtl) on self-archiving. Acceptance of this policy is a condition of publication.

Copyright

Articles are considered on the understanding that if they are accepted for publication the entire copyright shall pass to the Society for Endocrinology. All authors are asked to sign a copyright agreement (http://joe.endocrinology-journals.org/misc/SfE_Copyright_form.pdf) to this effect. To facilitate the processing of your manuscript please print out the agreement, and submit the completed form and accompanying notes with your paper. For information on how to request permission to reproduce any part of a paper published in Society for Endocrinology's journals see the permissions and commercial reprints page (http://www.endocrinology-journals.org/misc/permissions_commercial_reprints.dtl).

Online submissions

Submit online using the Manuscript Central system (http://www.endocrinology-journals.org/misc/onlinesub_man.shtml). This enables you to monitor the progress of your submission.

It also means that your paper can be included in the Accepted Preprint service (http://joe.endocrinology-journals.org/pap.dtl).

If you are unable to submit online, please contact us (http://joe.endocrinology-journals.org/cgi/feedback) for further information.

There is no charge for submitting papers nor is there any subsequent page charges.

Please prepare the content of your article as described in detail at http://joe.endocrinology-journals.org/misc/ifora.shtml

General instructions

Include a cover letter briefly indicating the substance of the paper.

For original research articles, please state the novelty of the findings and why they represent a meaningful advance in the field. The letter should state that the work has not been, and will not be, submitted for publication elsewhere until the journal has reached a decision on whether to publish the paper. If rejected the authors are free to submit elsewhere; if accepted the assurance automatically extends indefinitely.

It will be assumed that submitted manuscripts carry the approval of all the authors.

Papers quoted as ‘In Press’ (particularly those concerned with methodology) must be provided as additional electronic files.

Preparation of manuscripts

Arrange your manuscript as follows: Title page, Abstract, Introduction, Materials and methods, Results, Discussion, Declarations of interest, funding, author contributions and acknowledgements, References, Figure legends, Figures and Tables. Detailed guidelines on how to prepare manuscripts for submission can be found online at http://joe.endocrinology-journals.org/misc/ifora.shtml#preparation

Gene and protein nomenclature

Manuscripts should be prepared in accordance with accepted gene nomenclature given in our guidelines at http://joe.endocrinology-journals.org/misc/ifora.shtml#genom

Declaration of interest, funding, author contributions and acknowledgements

Please insert before the reference list. More information can be found at http://joe.endocrinology-journals.org/misc/ifora.shtml#interest

Colour

The cost of colour reproduction over and above that for black and white will be charged to the authors. This must be paid by credit card before publication. Please see colour charges form (http://www.endocrinology-journals.org/misc/colourack.pdf).

Supplementary data

- Supplementary data too large for print publication or exceeding the bounds of the manuscript may be suitable for online publication
- Supplementary data files intended for online publication should be submitted online to Manuscript Central as a ‘Supplemental File for Review’, and referred to as supplementary data in the text
- Supplementary information will be reviewed as part of the manuscript, evaluated for its importance and relevance, and if accepted should be referenced in the text of the article, directing readers to the web site
- There is a charge to the author of £100 for the first file and £20 for subsequent files

Offprints

A free PDF will be emailed to the corresponding author. Offprints can be ordered on the form accompanying the proof.
Assignment of Copyright
to the Society for Endocrinology

In order to publish your article we need your agreement in writing. Please take a moment to read the terms of this assignment, sign the form and return it to us as quickly as possible.

Journal: Journal of Endocrinology
Title of article

Name(s) of author(s) ....................................................................................................................................................................................................

Name or copyright owner, if not author(s) ............................................................................................................................................................
Address of above copyright owner (if applicable) ............................................................................................................................................

• By signing this form, you (the author(s) or other copyright owner, such as your employer) agree to transfer to us (the Society for Endocrinology, the publisher) the copyright in the above article, thus giving us the exclusive right to reproduce, distribute and broadcast the above article (including the abstract) ourselves throughout the world in printed, electronic or any other medium, and in turn to authorize others (including Reproduction Rights Organisations such as the Copyright Licensing Agency and the Copyright Clearance Center) to do the same. You agree that we may publish your article in the journal named above, and that we may sell or distribute it within the journal, on its own, or with other related material.

• You confirm that all of the named authors contributed substantially to the article, and agree to take public responsibility for the validity of its content. You also confirm that all major sources of funding have been acknowledged in the text of the article, and that there is either (a) no conflict of interest that would prejudice its impartiality, or (b) a potential conflict of interest that is fully declared within the text of the article.

• You promise that the material in the above article (including the abstract) was not previously published, and is not currently under consideration by another journal. If it contains material (such as a previously published illustration) which is someone else’s copyright, you promise that you have obtained the unrestricted permission of the copyright owner (please attach evidence of this) and that the material is clearly identified and acknowledged within the text. You also promise that the article does not, to the best of your knowledge, contain anything which is libellous, illegal, or infringes anyone’s copyright or other rights.

• You promise that we will respect your rights as the author(s). That is, we will make sure that your name(s) is/are always clearly associated with the article and, while you do allow us to make necessary editorial changes, we will not make any substantial alteration to your article without consulting you. We will have your article reviewed by impartial referees, and will let you know the outcome as quickly as we can. If the article is accepted, we undertake to publish it as soon as we reasonably can. If it is rejected, this agreement is automatically cancelled and all the rights come back to you.

• We will do everything we reasonably can to maximize the visibility of the journal, and of your article within it. We will mount your article’s abstract on our web site within a few days of acceptance. On final publication, we will send you an Acrobat PDF file of your article in its final published form. You are free to use it in all the ways described in the next paragraph. We will also send you an order form to enable you to buy offprints.

• You remain free to use your own article for the internal educational or research purposes of your own institution or company and to use it, in whole or in part, as the basis for your own further research or spoken presentations, provided you neither sell it nor encourage others to infringe our copyright.

• You promise, if you have not paid the Free Access Fee, that you will not self-archive or otherwise deposit your final accepted manuscript on freely available institutional or other online repositories (such as PubMed Central), unless (i) the version deposited is the manuscript, as finally accepted by the relevant journal but prior to copy editing and page formatting; (ii) you ensure that it will not become publicly available until 12 months after publication in the journal; (iii) the manuscript made available in this way includes the Society’s standard disclaimer (see http://www.endocrinology-journal.org/misc/archiving_policy.dtl). Conditions (i–iii) above are waived if you have paid us the Free Access Fee in which case we will deposit the published version of your article in PubMed Central, and you are then also free to deposit on other free online repositories.

Note: every named author must sign this form, or a copy of it

Signature(s) of Author(s) ....................................................................................................................................................................................................

Signature of Copyright Owner, if different ....................................................................................................................................................

Upon acceptance, and prior to editing and typesetting, your manuscript will be made public online as an Accepted Preprint unless you tell us otherwise. Upon final publication, it will be replaced by the final edited and formatted version of your article. If you do not want your manuscript to be released in this way, please put a cross in this box.

Please return this form by post or fax to the Society for Endocrinology, 22 Apex Court, Woodlands, Bradley Stoke, Bristol BS32 4JT, UK. Fax +44 (0) 1454 642201. By submitting your article to this journal, you agree that we may store your details on its manuscript database. We may occasionally use these details to send you information about services we think will interest you. We will never pass your details to any other organization. If you would prefer not to receive any mailings from us, please write to us at the above address.
