Cover
The image depicts expression of estrogen receptor proteins in whole-neonatal mouse ovaries. This is a confocal section of a PND 1 mouse ovary labeled with an ESR2 antibody (green) and propidium iodide to visualize nuclei (red). Original magnification: 630X. This image was published in an article by Chen et al. titled 'Estrogen can signal through multiple pathways to regulate oocyte cyst breakdown and primordial follicle assembly in the neonatal mouse ovary'. The full article can be accessed at http://dx.doi.org/10.1677/JOE-09-0109
