Cover
The image shows confocal laser scanning microscopy findings of enhanced green fluorescent protein (EGFP) under excitation light in pituitary cells of chimeric mice. EGFP-positive and -negative cells appear in a geographical pattern. Original magnification: 1200×. This image is published in an article in this volume by Ma et al, titled "Polyclonal origin of hormone-producing cell populations evaluated as a direct in situ demonstration in EGFP/BALB/C chimeric mice". The full article can be accessed at: http://dx.doi.org/10.1677/JOE-10-0184
