Cover

The cover depicts immunofluorescent analysis of protein expression in insulin producing cells by confocal microscopy. Cultured pancreatic cells double-labelled with anti-CK-19 antibody (red) and TOTO-3 nuclear stain (blue). This image was published in an article by Shyu et al. titled ‘Alleviation of hyperglycemia in diabetic rats by intraportal injection of insulin-producing cells generated from surgically resected human pancreatic tissue’. The full article can be accessed at http://dx.doi.org/10.1677/JOE-10-0352
