CONTENTS
VOLUME 217 NUMBER 3

COMMENTARY
Beyond the male sex hormone: deciphering the metabolic and vascular actions of testosterone
Hong-Yo Kang C1–C3

REVIEWS
Testosterone: a metabolic hormone in health and disease
Daniel M Kelly & T Hugh Jones R25–R45
Testosterone: a vascular hormone in health and disease
Daniel M Kelly & T Hugh Jones R47–R71

RESEARCH
Activin A, exendin-4, and glucose stimulate differentiation of human pancreatic ductal cells
Hyo-Sup Kim, Seung-Hyun Hong, Seung-Hoon Oh, Jae-Hyeon Kim, Myung-Shik Lee & Moon-Kyu Lee 241–252

Cortisol regulates epithelial permeability and sodium losses in zebrafish exposed to acidic water
Raymond W M Kwong & Steve F Perry 253–264

A role of prostaglandin transporter in regulating PGE2 release from human bronchial epithelial BEAS-2B cells in response to LPS
Yoshiyuki Shirasaka, Megumi Shichiri, Taku Kasai, Yasuhito Ohno, Takeo Nakashiki, Kazuyuki Kayashii, Akio Nishihara & Ikumi Tamai 265–274

Intrauterine growth restriction alters term fetal baboon hypothalamic appetite peptide balance
Cun Li, Thomas J McDonald, Guoyao Wu, Mark J Nijland & Peter W Nathanielsz 275–282

A superactive leptin antagonist alters metabolism and locomotion in high-leptin mice
Nava Chapnik, Gill Solomon, Yoni Genzer, Ruth Miskin, Arieh Gertler & Oren Froy 283–290
Readers are invited to submit their endocrinology images for entry into the Journal of Endocrinology cover art competition. Winners will be selected by the Editor-in-Chief and will have their imagery featured on the cover of an issue of Journal of Endocrinology, both in print and online. Winners will be cited in the journal and will receive a professionally printed copy of the journal cover featuring their scientific image.

To enter the competition please email your images to joe@endocrinology.org accompanied with a short caption of 25-30 words explaining what the image depicts, its magnification and who should be acknowledged for its production. Images should be of high quality and resolution of at least 300 dpi at the final published size 220 mm (W) × 100 mm (H).

By submitting an image you warrant that you own the copyright and agree that images may be used in promotional material. Images not selected for use may still be used by the Society for Endocrinology and Bioscientifica for promotional purposes.

Fluorescent labeling of microtubules in FRTL-5 rat thyroid cells. Cells were grown on coverslips, fixed, and stained with a monoclonal anti-alpha-tubulin antibody.

Credit: Maurizio Bifulco & Chiara Laezza, School of Pharmacy, University of Salerno, Fisciano, Italy

The Society for Endocrinology is one of the world’s leading authorities on hormones. Established in 1946, the Society’s aims are to support the advancement of scientific and clinical knowledge and increase research in endocrinology for the public benefit. It also plays a vital role in promoting and supporting endocrinology worldwide.

The Society for Endocrinology offers a range of journals including Journal of Endocrinology, Journal of Molecular Endocrinology, Endocrine-Related Cancer, Endocrine Connections (open access) and Clinical Endocrinology.

For more information visit www.endocrinology.org

Contents continued from outside back cover

Combination therapy with melatonin and dexamethasone in a mouse model of traumatic brain injury
Michela Campolo, Akbar Ahmad, Rosalia Crupi, Daniela Impellizzeri, Rossana Morabito, Emanuela Esposito & Salvatore Cuzzocrea
291–301

Saturated fat-rich diet increases fetal lipids and modulates LPL and leptin receptor expression in rat placentas
M B Mazzucco, R Higa, E Capobianco, M Kurtz, A Jawerbaum & V White
303–315

The Society for Endocrinology offers a range of journals including Journal of Endocrinology, Journal of Molecular Endocrinology, Endocrine-Related Cancer, Endocrine Connections (open access) and Clinical Endocrinology.
