CONTENTS

VOLUME 219 NUMBER 2

REVIEW

Growth hormone and Klotho
Christoph Schmid, Marian C Neidert, Oliver Tichopp, Lisa Sze & René L Bernays

RESEARCH

Blunted HPA axis response in lactating, vasopressin-deficient Brattleboro rats
Anna Fodor, Ottó Pintér, Ágnes Domokos, Kristina Langnaese, István Barna, Mario Engelmann & Dóra Zelena
Metformin increases the novel adipokine adipolin/CTRP12: role of the AMPK pathway
Bee K Tan, Jing Chen, Raghu Adya, Manjunath Ramanjaneya, Vanlata Patel & Harpal S Randeva
Pioglitazone does not improve insulin signaling in mice with GH over-expression
Adam Gesing, Andrzej Bartke & Michal M Masternak

Evidence for a role of sterol 27-hydroxylase in glucocorticoid metabolism in vivo
Isabelle Vögeli, Hans H Jung, Bernhard Dick, Sandra K Erickson, Robert Escher, John W Funder, Felix J Frey & Geneviève Escher

Neonatal overnutrition in mice exacerbates high-fat diet-induced metabolic perturbations
Zhiguo Liu, Chun Yan Lim, Michelle Yu-Fah Su, Stephanie Li Ying Soh, Guanghou Shui, Markus R Wank, Kevin L Grove, George K Radda, Weiping Han & Xiaoqiu Xiao

Alendronate promotes bone formation by inhibiting protein prenylation in osteoblasts in rat tooth re plantation model
Koichiro Komatsu, Akemi Shimada, Tatsuya Shibata, Satoshi Wada, Hisashi Ideno, Kazuhisa Nakashima, Nisroo Amizuka, Masaki Noda & Akira Nifuji

Pre- and postnatal nutrition in sheep affects β-cell secretion and hypothalamic control of insulin secretion and postprandial suppression of ghrelin
Anna H Kongsted, Sanne V Husted, Malin P Thygesen, Vibeke G Christensen, Dominique Blache, Anders Tøller, Torben Larsen, Bjarn Quistorff & Mette O Nielsen

The Society for Endocrinology is one of the world’s leading authorities on hormones. Established in 1946, the Society’s aims are to support the advancement of scientific and clinical knowledge and increase research in endocrinology for the public benefit. It also plays a vital role in promoting and supporting endocrinology worldwide.

The Society for Endocrinology offers a range of journals including *Journal of Endocrinology*, *Journal of Molecular Endocrinology*, *Endocrine-Related Cancer*, *Endocrine Connections* (open access) and *Clinical Endocrinology*.

For more information visit [www.endocrinology.org](http://www.endocrinology.org)

The image depicts a laser scanning confocal image of primary osteoblasts from new-born mice stained with DAPI (blue) and phosphorylated STAT5 antibody (red) (60x magnification).

**Cover Art Competition**

Readers are invited to submit their endocrinology images for entry into the *Journal of Endocrinology* cover art competition. Winners will be selected by the Editor-in-Chief and will have their imagery featured on the cover of an issue of *Journal of Endocrinology*, both in print and online. Winners will be cited in the journal and will receive a professionally printed copy of the journal cover featuring their scientific image.

To enter the competition please email your images to joe@endocrinology.org accompanied with a short caption of 25-30 words explaining what the image depicts, its magnification and who should be acknowledged for its production. Images should be of high quality and resolution of at least 300 dpi at the final published size 220 mm (W) × 100 mm (H).

By submitting an image you warrant that you own the copyright and agree that images may be used in promotional material. Images not selected for use may still be used by the Society for Endocrinology and Bioscientifica for promotional purposes.

**This Issue’s Cover**

**Contents continued from outside back cover**

*Cafeteria diet inhibits insulin clearance by reduced insulin-degrading enzyme expression and mRNA splicing* 173–182

P Brandimarti, J M Costa-Júnior, S M Ferreira, A O Protzek, G J Santos, E M Carneiro, A C Boschero & L F Rezende

**ERRATUM**

The importance of the SIBLING family of proteins on skeletal mineralisation and bone remodelling

Katherine A Staines, Vicky E MacRae and Colin Farquharson
