NUMBER 1 OCTOBER 2013

REVIEWS

Cartilage to bone transitions in health and disease
K A Staines, A S Pollard, I M McGonnell, C Farquharson & A A Pitsillides R1–R12

The apelin receptor APJ: journey from an orphan to a multifaceted regulator of homeostasis
Anne-Marie O’Carroll, Stephen J Lola, Louise E Harris & George R Pope R13–R35

RESEARCH

The effect of ACTH upon faecal glucocorticoid excretion in the koala
Nicole Davies, Amber Gillett, Clive McAlpine, Leonie Seabrook, Greg Baxter, Daniel Lunney & Adrian Bradley 1–12

Serum anti-Müllerian hormone (AMH) levels correlate with infrarenal aortic diameter in healthy older men: is AMH a cardiovascular hormone?
Nicola A Dennis, Gregory T Jones, Yih Harn Chong, Andre M van Rij & Ian S McLennan 13–20

Vitamin A regulates hypothalamic-pituitary-adrenal axis status in LOU/C rats
Nathalie Marissal-Arvy, Rachel Hamiani, Emmanuel Richard, Marie-Pierre Moisan & Véronique Pallet 21–27

Effects of running wheel training on adult obese rats programmed by maternal prolactin inhibition
G Boaventura, G Casimiro-Lopes, C C Pazos-Moura, E Oliveira, P C Lisboa & E G Moura 29–37
Gastric estradiol-17β (E₂) and liver ERα correlate with serum E₂ in the cholestatic male rat
Hiroto Kobayashi, Saori Yoshida, Ying-Jie Sun, Nobuyuki Shirasawa & Akira Naito 39–49

Mice deficient in PAPP-A show resistance to the development of diabetic nephropathy
Jessica R Mader, Zachary T Resch, Gary R McLean, Jakob H Mikkelsen, Claus Oxvig, Ronald J Marler & Cheryl A Conover 51–58

Optimal bone mechanical and material properties require a functional glucagon-like peptide-1 receptor
Guillaume Mabilleau, Aleksandra Mieczkowska, Nigel Irwin, Peter R Flatt & Daniel Chappard 59–68

Triiodothyronine induces lipid oxidation and mitochondrial biogenesis in rat Harderian gland
A Santillo, L Burrone, S Falvo, R Senese, A Lanni & G Chieffi Baccari 69–78

CB1 receptor mediates the effects of glucocorticoids on AMPK activity in the hypothalamus
Miski Scerif, Tamás Füzesi, Julia D Thomas, Blerina Kola, Ashley B Grossman, Csaba Fekete & Márta Korbonits 79–88

NUMBER 2 NOVEMBER 2013

REVIEW

Growth hormone and Klotho
Christoph Schmid, Marian C Neidert, Oliver Tschopp, Lisa Sze & René L Bernays R37–R57

RESEARCH

Blunted HPA axis response in lactating, vasopressin-deficient Brattleboro rats
Anna Fodor, Ottó Pintér, Ágnes Domokos, Kristina Langnaese, István Barna, Mario Engelmann & Dóra Zelena 89–100

Metformin increases the novel adipokine adipolin/CTRP12: role of the AMPK pathway
Bee K Tan, Jing Chen, Raghu Adya, Manjunath Ramanjaneya, Vanlata Patel & Harpal S Randeva 101–108

Pioglitazone does not improve insulin signaling in mice with GH over-expression
Adam Gesing, Andrzej Bartke & Michal M Masternak 109–117
Evidence for a role of sterol 27-hydroxylation in glucocorticoid metabolism in vivo
Isabelle Vögeli, Hans H Jung, Bernhard Dick, Sandra K Erickson, Robert Escher, John W Funder, Felix J Frey & Geneviève Escher 119–129

Neonatal overnutrition in mice exacerbates high-fat diet-induced metabolic perturbations
Zhiguo Liu, Chun Yan Lim, Michelle Yu-Fah Su, Stephanie Li Ying Soh, Guangzhou Shui, Markus R Wenk, Kevin L Grove, George K Radda, Weiping Han & Xiaqiu Xiao 131–143

Alendronate promotes bone formation by inhibiting protein prenylation in osteoblasts in rat tooth replantation model
Koichiro Komatsu, Akemi Shimada, Tatsuya Shibata, Satoshi Wada, Hisashi Ideno, Kazuhisa Nakashima, Norio Amizuka, Masaki Noda & Akira Nifuji 145–158

Pre- and postnatal nutrition in sheep affects β-cell secretion and hypothalamic control
Anna H Kongsted, Sanne V Husted, Malin P Thygesen, Viibeke G Christensen, Dominique Blache, Anders Tolver, Torben Larsen, Bjørn Quistorff & Mette O Nielsen 159–171

Cafeteria diet inhibits insulin clearance by reduced insulin-degrading enzyme expression and mRNA splicing

ERRATUM
The importance of the SIBLING family of proteins on skeletal mineralisation and bone remodelling
Katherine A Staines, Vicky E MacRae & Colin Farquharson X1

NUMBER 3  DECEMBER 2013

RESEARCH

Hyperthyroid monkeys: a nonhuman primate model of experimental Graves’ disease
Y Wang, L P Wu, J Fu, H J Lv, X Y Guan, L Xu, P Chen, C Q Gao, P Hou, M J Ji & B Y Shi 183–193

Chronic inflammation exacerbates glucose metabolism disorders in C57BL/6J mice fed with high-fat diet
Yu Wu, Tingting Wu, Jun Wu, Lei Zhao, Qing Li, Zac Varghese, John F Moorhead, Stephen H Powis, Yaxi Chen & Xiong Z Ruan 195–204

Early weaning PCB 95 exposure alters the neonatal endocrine system: thyroid adipokine dysfunction
R G Ahmed 205–215
### VOLUME CONTENTS

1. **Corticosteroid-binding globulin contributes to the neuroendocrine phenotype of mice selected for extremes in stress reactivity**
   - Gabriele E Mattos, Jan-Michael Heinzmann, Stefanie Norkowski, Jean-Christophe Helbling, Amandine M Minni, Marie-Pierre Moisan & Chadi Touma
   - Pages: 217–229

2. **β-cell adaptation in a mouse model of glucocorticoid-induced metabolic syndrome**
   - Liselotte Fransson, Stephanie Franzén, Victoria Rosengren, Petra Wolbert, Åke Sjöholm & Henrik Ortsäter
   - Pages: 231–241

3. **Effect of phytoestrogens on basal and GnRH-induced gonadotropin secretion**
   - Sergio A Arispe, Betty Adams & Thomas E Adams
   - Pages: 243–250

4. **Covariation between behaviour and physiology indicators of coping style in zebrafish (Danio rerio)**
   - Christian Tudorache, Marcel J M Schaaf & Hans Slabbekoorn
   - Pages: 251–258

5. **Developmental androgen excess disrupts reproduction and energy homeostasis in adult male mice**
   - Kazunari Nohara, Suhuan Liu, Matthew S Meyers, Aurélie Waget, Mathieu Ferron, Gérard Karsenty, Rémy Burcelin & Franck Mauvais-Jarvis
   - Pages: 259–268

6. **Estrogens downregulate urocortin 2 expression in rat uterus**
   - Kenichiro Watanabe, Takahiro Nemoto, Shigeo Akira, Toshiyuki Takeshita & Tamotsu Shibasaki
   - Pages: 269–278

7. **ChemR23 knockout mice display mild obesity but no deficit in adipocyte differentiation**
   - Laurie Rouger, G Raphaël Denis, Souphalone Luangsay & Marc Parmentier
   - Pages: 279–289
The Society for Endocrinology is one of the world’s leading authorities on hormones. Established in 1946, the Society’s aims are to support the advancement of scientific and clinical knowledge and increase research in endocrinology for the public benefit. It also plays a vital role in promoting and supporting endocrinology worldwide.

The Society for Endocrinology offers a range of journals including *Journal of Endocrinology*, *Journal of Molecular Endocrinology*, *Endocrine-Related Cancer*, *Endocrine Connections* (open access) and *Clinical Endocrinology*.

For more information visit [www.endocrinology.org](http://www.endocrinology.org)

Crosstalk between adipose tissue and blood vessels is critical for both metabolic and vascular homeostasis. The inguinal mammary fat pad was stained with BODIPY (red) to detect lipid and CD31 (green) to visualize endothelial cells. Magnification 200x.

Credit: Lisa M Arendt, Tufts University, Boston, MA, USA

**THIS ISSUE’S COVER**

Readers are invited to submit their endocrinology images for entry into the *Journal of Endocrinology* cover art competition. Winners will be selected by the Editor-in-Chief and will have their imagery featured on the cover of an issue of *Journal of Endocrinology*, both in print and online. Winners will be cited in the journal and will receive a professionally printed copy of the journal cover featuring their scientific image.

To enter the competition please email your images to joe@endocrinology.org accompanied with a short caption of 25-30 words explaining what the image depicts, its magnification and who should be acknowledged for its production. Images should be of high quality and resolution of at least 300 dpi at the final published size 220 mm (W) × 100 mm (H).

By submitting an image you warrant that you own the copyright and agree that images may be used in promotional material. Images not selected for use may still be used by the Society for Endocrinology and Bioscientifica for promotional purposes.

**COVER ART COMPETITION**
CONTENTS

VOLUME 219 NUMBER 3

RESEARCH

Hyperthyroid monkeys: a nonhuman primate model of experimental Graves’ disease
Y Wang, L P Wu, J Fu, H J Lu, X Y Guan, L Xu, P Chen, C Q Gao, P Hou, M J Ji & B Y Shi

183–193

Chronic inflammation exacerbates glucose metabolism disorders in C57BL/6J mice fed with high-fat diet
Yu Wu, Tingting Wu, Jun Wu, Lei Zhao, Qing Li, Zac Varghese, John F Moorhead, Stephen H Powis, Yaxi Chen & Xiong Z Ruan

195–204

Early weaning PCB 95 exposure alters the neonatal endocrine system: thyroid adipokine dysfunction
R G Ahmed

205–215

Corticosteroid-binding globulin contributes to the neuroendocrine phenotype of mice selected for extremes in stress reactivity
Gabriele E Mattos, Jan-Michael Heinzmann, Stefanie Norkowski, Jean-Christophe Helbling, Amandine M Meni, Marie-Pierre Moisan & Chadi Touma

217–229

β-cell adaptation in a mouse model of glucocorticoid-induced metabolic syndrome
Liselotte Fransson, Stephanie Franzén, Victoria Rosengren, Petra Wolbert, Åke Sjöholm & Henrik Ortsäter

231–241

Effect of phytoestrogens on basal and GnRH-induced gonadotropin secretion
Sergio A Arispe, Betty Adams & Thomas E Adams

243–250

Covariation between behaviour and physiology indicators of coping style in zebrafish (Danio rerio)
Christian Tuborache, Marcel J M Schaaf & Hans Slabbeekorn

251–258

Developmental androgen excess disrupts reproduction and energy homeostasis in adult male mice
Kazunari Nohara, Suhuan Liu, Matthew S Meyers, Aurélie Wagat, Mathieu Perron, Gérard Karsenty, Rémy Burcelin & Franck Maouss-Jarvis

259–268

Estrogens downregulate urocortin 2 expression in rat uterus
Kenichiro Watanabe, Takahiro Nemoto, Shigeo Akira, Toshiyuki Takeshita & Tamotsu Shibasaki

269–278

ChemR23 knockout mice display mild obesity but no deficit in adipocyte differentiation
Laure Rouger, G Raphael Denis, Souphalone Luangsay & Marc Parmentier

279–289
