The Society for Endocrinology is one of the world’s leading authorities on hormones. Established in 1946, the Society’s aims are to support the advancement of scientific and clinical knowledge and increase research in endocrinology for the public benefit. It also plays a vital role in promoting and supporting endocrinology worldwide.

The Society for Endocrinology offers a range of journals including Journal of Endocrinology, Journal of Molecular Endocrinology, Endocrine-Related Cancer, Endocrine Connections (open access) and Clinical Endocrinology.

**THIS ISSUE’S COVER**

The image depicts 3beta-HSD immunohistochemistry in mouse testis, revealing interstitial, perivascular and peritubular Leydig cells (brown). Seminiferous tubules were counterstained with hematoxylin.

Credit: Giulia Ricci (Second University of Naples, Naples, Italy) and Angela Catizone (Sapienza University of Rome, Rome, Italy)

Readers are invited to submit their endocrinology images for entry into the Journal of Endocrinology cover art competition. Winners will be selected by the Editor-in-Chief and will have their imagery featured on the cover of an issue of Journal of Endocrinology, both in print and online. Winners will be cited in the journal and will receive a professionally printed copy of the journal cover featuring their scientific image.

To enter the competition please email your images to joe@endocrinology.org accompanied with a short caption of 25-30 words explaining what the image depicts, its magnification and who should be acknowledged for its production. Images should be of high quality and resolution of at least 300 dpi at the final published size 220 mm (W) × 100 mm (H).

By submitting an image you warrant that you own the copyright and agree that images may be used in promotional material. Images not selected for use may still be used by the Society for Endocrinology and Bioscientifica for promotional purposes.
CONTENTS

VOLUME 220 NUMBER 2

EDITORIAL
Decoding insulin resistance and metabolic syndrome for promising therapeutic intervention
Shaodong Guo
E1–E3

THEMATIC REVIEWS
Insulin signaling, resistance, and metabolic syndrome: insights from mouse models into disease mechanisms
Shaodong Guo
T1–T23

Hypothalamic and brainstem neuronal circuits controlling homeostatic energy balance
Marc Schneeberger, Ramon Gomis & Marc Claret
T25–T46

Adipocytokines in obesity and metabolic disease
Haiming Cao
T47–T59

Fatty acid metabolism, energy expenditure and insulin resistance in muscle
Nigel Turner, Gregory J Cooney, Edward W Kraegen & Clinton R Bruce
T61–T79

RESEARCH
MCT8 expression in human fetal cerebral cortex is reduced in severe intrauterine growth restriction
Shiao Y Chan, Laura A Hancox, Azucena Martin-Santos, Laurence S Loubière, Merlin N M Walter, Ana-Maria González, Phillip M Cox, Ann Logan, Christopher J McCabe, Jayne A Franklyn & Mark D Kilby
85–95

Novel α-MSH analog causes weight loss in obese rats and minipigs and improves insulin sensitivity
Keld Fosgerau, Kirsten Raun, Cecilia Nilsson, Kirsten Dahl & Birgitte S Wulff
97–107

Role of the neural pathway from hindbrain to hypothalamus in interaction of GLP1 and leptin in rats
Sajaka Akieda-Asai, Paul-Emile Poleni, Kazuha Hasegawa & Yukari Date
109–116
