EDITORIAL

20 YEARS OF LEPTIN: What we know and what the future holds... E1–E3
Steve O’Rahilly

THEMATIC REVIEWS

20 YEARS OF LEPTIN: Leptin at 20: an overview T1–T8
Jeffrey Friedman

20 YEARS OF LEPTIN: Insights into signaling assemblies of the leptin receptor T9–T23
Frank Peelman, Lennart Zabeau, Kedar Moharana, Savvas N Savvides & Jan Tavernier

20 YEARS OF LEPTIN: Connecting leptin signaling to biological function T25–T35
Margaret B Allison & Martin G Myers Jr

20 YEARS OF LEPTIN: Leptin and reproduction: past milestones, present undertakings, and future endeavors T37–T48
Farid F Chehab

20 YEARS OF LEPTIN: Role of leptin in energy homeostasis in humans T83–T96
Michael Rosenbaum & Rudolph L Leibel

20 YEARS OF LEPTIN: Role of leptin in energy homeostasis in humans T83–T96
Michael Rosenbaum & Rudolph L Leibel

20 YEARS OF LEPTIN: Role of leptin in energy homeostasis in humans T83–T96
Michael Rosenbaum & Rudolph L Leibel

20 YEARS OF LEPTIN: Role of leptin in energy homeostasis in humans T83–T96
Michael Rosenbaum & Rudolph L Leibel

THEMATIC RESEARCH

Morbid obesity attenuates the skeletal abnormalities associated with leptin deficiency in mice M1–M15
Russell T Turner, Kenneth A Philbrick, Carmen P Wong, Dawn A Olson, Adam J Branscum & Urszula T Iwaniec

Early-postnatal changes in adiposity and lipid profile by transgenerational developmental programming in swine with obesity/leptin resistance M17–M29
Antonio Gonzalez-Bulnes, Susana Astiz, Cristina Ovilla, Clemente J Lopez-Blote, Raul Sanchez-Sanchez, Maria L Perez-Solana, Laura Torres-Rovira, Mireia Ayuso & Jorge Gonzalez

UCP1 is present in porcine adipose tissue and is responsive to postnatal leptin M31–M38
Alison Mostyn, Linda Attig, Thibaut Larcher, Samir Dou, Pascale Chavatte-Palmer, Monia Boulouhri, Arieh Gertler, Joan Djiane, Michael E Symonds & Latifa Abdennabi-Najar

REVIEW

Thyroid hormone and the stunned myocardium R1–R8
Dimitri Novitzky & David K C Cooper

Contents continued on the inside back cover
The Society for Endocrinology is one of the world's leading authorities on hormones. Established in 1946, the Society's aims are to support the advancement of scientific and clinical knowledge and increase research in endocrinology for the public benefit. It also plays a vital role in promoting and supporting endocrinology worldwide.

The Society for Endocrinology offers a range of journals including Journal of Endocrinology, Journal of Molecular Endocrinology, Endocrine-Related Cancer, Endocrine Connections (open access) and Clinical Endocrinology.

For more information visit www.endocrinology.org

COVER ART COMPETITION

Readers are invited to submit their endocrinology images for entry into the Journal of Endocrinology cover art competition. Winners will be selected by the Editor-in-Chief and will have their imagery featured on the cover of an issue of Journal of Endocrinology, both in print and online. Winners will be credited in the journal and will receive a professionally printed copy of the journal cover featuring their scientific image.

To enter the competition please email your images to joe@endocrinology.org accompanied with a short caption of 25-30 words explaining what the image depicts, its magnification and who should be acknowledged for its production. Images should be of high quality and resolution of at least 300 dpi at the final published size 220 mm (W) × 100 mm (H).

By submitting an image you warrant that you own the copyright and agree that images may be used in promotional material. Images not selected for use may still be used by the Society for Endocrinology and Bioscientifica for promotional purposes.

THIS ISSUE’S COVER

The cover image depicts (left) an obese (ob/ob) mouse and a normal mouse, and (right) the X-ray crystallographic structure of human leptin W100E.

RESEARCH

Phthalate exposure in utero causes epigenetic changes and impairs insulin signalling 47-66
Parsanathan Rajesh & Karundev Balasubramanian

Gastrin induces ductal cell dedifferentiation and p-cell neogenesis after 90% pancreatectomy 67-78
Noelia Tillez & Eduard Montanya

Inhibitory roles of the mammalian GnIH ortholog RFRP3 in testicular activities in adult mice 79-91
Shabana Anjum, Amfabb Krishna & Kazuyoshi Tsutsui

Direct stimulation of bone mass by increased GH signalling in the osteoblasts of Socs2–/– mice 93-106
R Dobie, V F MacRae, C Huesa, R van’t Hof, S F Ahmed & C Farquharson
