The Society for Endocrinology is one of the world’s leading authorities on hormones. Established in 1946, the Society’s aims are to support the advancement of scientific and clinical knowledge and increase research in endocrinology for the public benefit. It also plays a vital role in promoting and supporting endocrinology worldwide.

The Society for Endocrinology offers a range of journals including Journal of Endocrinology, Journal of Molecular Endocrinology, Endocrine-Related Cancer, Endocrine Connections (open access) and Clinical Endocrinology.

Contents continued from outside back cover

gp130 in late osteoblasts and osteocytes is required for PTH-induced osteoblast differentiation 181–190
Therese Standal, Rachelle W Johnson, Narelle E McGregor, Ingrid J Poulton, Patricia W H Ho, T John Martin & Natalie A Sims

Seasonal effects of GnIH on basal and GnRH-induced goldfish somatotrope functions 191–202
M Moussavi, M Wlasichuk, J P Chang & H R Habibi

Decorin induced by progesterone plays a crucial role in suppressing endometriosis 203–216
Yoshifumi Joshua Ono, Yoshito Terai, Akiko Tanabe, Ahtushi Hayashi, Masami Hayashi, Yoshiki Yamashita, Satoru Kyo & Masahide Ohmichi

Readers are invited to submit their endocrinology images for entry into the Journal of Endocrinology cover art competition. Winners will be selected by the Editor-in-Chief and will have their imagery featured on the cover of an issue of Journal of Endocrinology, both in print and online. Winners will be cited in the journal and will receive a professionally printed copy of the journal cover featuring their scientific image.

To enter the competition please email your images to joe@endocrinology.org accompanied with a short caption of 25–30 words explaining what the image depicts, its magnification and who should be acknowledged for its production. Images should be of high quality and resolution of at least 300 dpi at the final published size 220 mm (W) × 100 mm (H).

By submitting an image you warrant that you own the copyright and agree that images may be used in promotional material. Images not selected for use may still be used by the Society for Endocrinology and Bioscientifica for promotional purposes.
CONTENTS

VOLUME 223 NUMBER 2

THEMATIC REVIEW

ANIMAL MODELS OF DISEASE: Feline hyperthyroidism: an animal model for toxic nodular goiter
Mark E Peterson

REVIEWS

Oestrogen, ocular function and low-level vision: a review
Claire V Hutchinson, James A Walker & Colin Davidson

Treatment of Cushing’s disease: a mechanistic update
Daniel Cuevas-Ramos & Maria Fleseru

Interplay between the immune system and adipose tissue in obesity
Mark A Eslay, Laura Hand, Donal O’Shea & Lydia Lynch

RESEARCH

Resveratrol and curcumin enhance pancreatic β-cell function by inhibiting phosphodiesterase activity
Michael Rouse, Antoine Younks & Josephine M Egan

Thiazolidinedione-induced lipid droplet formation during osteogenic differentiation
M van de Vyver, E Andrag, L L Cockburn & W F Fiore

The role of dipeptidyl peptidase 4 (DPP4) in the preservation of renal function: DPP4 involvement in hemoglobin expression
Youichi Sato, Takandu Kamada & Aiko Yamauchi

Urocortin 3 activates AMPK and AKT pathways and enhances glucose disposal in rat skeletal muscle
Manon M Roustit, Joan M Vaughan, Pauline M Jameson & Mark E Cleasby

Serum cholesterol selectively regulates glucocorticoid sensitivity through activation of JNK
Nan Yang, Giorgio Caratti, Louise M Ince, Toryn M Poolman, Peter J Trebble, Catty M Holt, David W Ray & Laura C Matthews

Extracellular matrix modulates the biological effects of melanin in mesenchymal stem cells
Fan He, Xiaochun Liu, Fe Xiong, Sijin Chen, Long Zhou, Wenguo Cui, Guoqing Fan, Zong-Ping Luo, Ming Pei & Yihong Gong
