CONTENTS

VOLUME 223 NUMBER 2

THEMATIC REVIEW

ANIMAL MODELS OF DISEASE: Feline hyperthyroidism: an animal model for toxic nodular goiter
Mark E Peterson T97–T114

REVIEWS

Oestrogen, ocular function and low-level vision: a review
Claire V Hutchinson, James A Walker & Colin Davidson R9–R18

Treatment of Cushing’s disease: a mechanistic update
Daniel Cuevas-Ramos & Maria Fleseru R19–R39

Interplay between the immune system and adipose tissue in obesity
Mark A Eslay, Laura Hand, Donal O’Shea & Lydia Lynch R41–R48

RESEARCH

Resveratrol and curcumin enhance pancreatic β-cell function by inhibiting phosphodiesterase activity
Michael Rouse, Antoine Younks & Josephine M Egan 107–117

Thiazolidinedione-induced lipid droplet formation during osteogenic differentiation
M van de Vyver, E Andrag, I L Cockburn & W F Ferri R119–R132

The role of dipeptidyl peptidase 4 (DPP4) in the preservation of renal function: DPP4 involvement in hemoglobin expression
Youshichi Sato, Takandbu Kamada & Akio Yamauchi 133–142

Urocortin 3 activates AMPK and AKT pathways and enhances glucose disposal in rat skeletal muscle
Manon M Roustit, Joan M Vaughan, Pauline M Jameson & Mark E Cleasby 143–154

Serum cholesterol selectively regulates glucocorticoid sensitivity through activation of JNK
Nan Yang, Giorgio Caratti, Louise M Ince, Tony N Poolman, Peter J Trebbile, Catty M Holf, David W Ray & Laura C Matthews 155–166

Extracellular matrix modulates the biological effects of melanin in mesenchymal stem cells 167–180
Fan He, Xiaochen Liu, K. Xiong, Silin Chen, Long Zhou, Wenguo Cui, Guoqing Fan, Zong-Ping Luo, Ming Pei & Yihong Gong

Contents continued on the inside back cover
The Society for Endocrinology is one of the world’s leading authorities on hormones. Established in 1946, the Society’s aims are to support the advancement of scientific and clinical knowledge and increase research in endocrinology for the public benefit. It also plays a vital role in promoting and supporting endocrinology worldwide.

The Society for Endocrinology offers a range of journals including Journal of Endocrinology, Journal of Molecular Endocrinology, Endocrine-Related Cancer, Endocrine Connections (open access) and Clinical Endocrinology.

For more information visit www.endocrinology.org

**Increased nuclear beta catenin in Shb knockout islet. Islets were stained for beta catenin (green) and DAPI (blue), the latter to visualize nuclei. Original magnification 200×.**
