CONTENTS
VOLUME 223 NUMBER 3

REVIEWS
Glucocorticoid treatment and endocrine pancreas function: implications for glucose homeostasis, insulin resistance and diabetes  R49–R62
Alex Rafacho, Hannie Oort, Angel Nadal & Ivan Quevedo

Obesity-related hypertension: possible pathophysiological mechanisms  R63–R78
Ivana Vanečková, Lenka Malešáková, Michal Běhal, Veronika Nagelová, Josef Žicha & Jaroslav Kuneš

Obesity-related hypertension: possible pathophysiological mechanisms  R63–R78
Ivana Vanečková, Lenka Malešáková, Michal Běhal, Veronika Nagelová, Josef Žicha & Jaroslav Kuneš

RESEARCH
Central alarin ameliorated insulin resistance of adipocytes in type 2 diabetic rats  217–225
Lili Guo, Penghua Fang, Mei Yu, Mingyi Shi, Ping Bo & Zhenwen Zhang

Bone quality is affected by food restriction and by nutrition-induced catch-up growth  227–239
Rakefet Pando, Majdi Masarwi, Biana Shtaif, Anna Idelevich, Efrat Monsonego-Ornan, Ron Shalit, Moshe Philipp & Galia Gat-Yablonski

H4 histamine receptors inhibit steroidogenesis and proliferation in Leydig cells  241–253
Adriana María Belén Abiuso, Esperanza Benznaitze, Romina María Pagotto, Elba Nora Pereyra, Yanina Medina, Diego José Martínez Lamas, Marcos Besio Moreno, Omar Pedro Pignataro & Carolina Mondillo

Glucagon secretion after metabolic surgery in diabetic rodents  255–265
Hans Erckhoff, Teresa Loupa, Paulo Matafome, Raquel Sejia & Francisco Castro e Sousa

Absence of Shb impairs insulin secretion by elevated FAK activity in pancreatic islets  267–275
Ida Alenkovit, Oleg Dvychok, Heng Tian, Jia Li, Saba Mehlavanfar, Yang Jin, Brynild Bjørn, Anders Tengholm & Michael Welsh

RNase L contributes to experimentally induced type 1 diabetes onset in mice  277–287
Hongli Liu, Lin Zhang, Qiaoqun Zheng, Krishnamurthy Malathi, Ge Jin & Aimin Zhou

Reciprocal changes in leptin and NPY during nutritional acceleration of puberty in heifers  289–298
Rodolfo C Cardoso, Bruna R C Alves, Ligia D Prezotto, Jennifer F Thorson, Luis O Tedrochi, Duane H Reisler, Marcel Amstalden & Gary L Williams
The Society for Endocrinology is one of the world’s leading authorities on hormones. Established in 1946, the Society’s aims are to support the advancement of scientific and clinical knowledge and increase research in endocrinology for the public benefit. It also plays a vital role in promoting and supporting endocrinology worldwide.

The Society for Endocrinology offers a range of journals including *Journal of Endocrinology*, *Journal of Molecular Endocrinology*, *Endocrine-Related Cancer*, *Endocrine Connections* (open access) and *Clinical Endocrinology*.

For more information visit [www.endocrinology.org](http://www.endocrinology.org)

---

The image depicts the effects of food restriction and re-feeding on bone architectural features. 3D micro-CT images of cortical (top row) and trabecular bone (bottom row). Food restricted group bone (centre) illustrates smaller bone volume than controls (left) or catch-up refed group bone. From Pando et al. 2014 *Journal of Endocrinology* 223 227–239.
