CONTENTS

VOLUME 226 NUMBER 3

REVIEWS

Molecular and neuroendocrine mechanisms of cancer cachexia
Maria Carolina S Mendes, Gustavo D Pimentel, Felipe O Costa & José B C Carvalheira
R29–R43

Anti-Müllerian hormone is a gonadal cytokine with two circulating forms and cryptic actions
Ian S McLennan & Michael W Pankhurst
R45–R57

SCIENCE GUIDELINE

HORMONE MEASUREMENT GUIDELINES: Tracing lipid metabolism: the value of stable isotopes
Margot Umpleby
G1–G10

RESEARCH

Iron overload increases osteoclastogenesis and aggravates the effects of ovariectomy on bone mass
Wang Xiao, Fei Beibei, Shen Guangsi, Jiang Yu, Zhang Wen, Huang Xi & Xu Youjia
121–134

Enhanced intestinal epithelial cell proliferation in diabetic rats correlates with β-catenin accumulation
Tatiana Dorfman, Yulia Pollak, Rima Sohotnik, Arnold G Coran, Jacob Bajar & Igor Sukhotnik
135–143

Adrenocortical LDL receptor function negatively influences glucocorticoid output
Ronald J van der Sluis, Miranda van Eck & Menno Hoekstra
145–154

FGF23 gene regulation by 1,25-dihydroxyvitamin D: opposing effects in adipocytes and osteocytes
Ichiro Kaneko, Rimpi K Saini, Kristin P Griffin, G Kerr Whitfield, Mark R Haussler & Peter W Jurutka
155–166

Aging-related premature luteinization of granulosa cells is avoided by early oocyte retrieval
Yan-Guang Wu, David H Barad, Vitaly A Kushner, Emanuela Laizzi, Qi Wang, David F Albertini & Norbert Gleicher
167–180

Spatial and temporal expression of immunoglobulin superfamily member 1 in the rat
Sjoerd D Joustra, Onno C Meijer, Charlotte A Heinen, Isabel M Mol, El Housari Laghman, Rozemarijn M van Trotsenburg, Nienke R Biermasz, Arn M H van Poel, Geert Hamer & Gerry T M Wagenaar
181–191

Cardiometabolic and reproductive benefits of early dietary energy restriction and voluntary exercise in an obese PCOS-prone rodent model
Abdoulaye Diane, Maria Kupreeva, Faye Borthwick, Spencer D Proctor, W David Pierce & Donna F Vine
193–206

Contents continued on the inside back cover
The Society for Endocrinology is one of the world’s leading authorities on hormones. Established in 1946, the Society’s aims are to support the advancement of scientific and clinical knowledge and increase research in endocrinology for the public benefit. It also plays a vital role in promoting and supporting endocrinology worldwide.

The Society for Endocrinology offers a range of journals including Journal of Endocrinology, Journal of Molecular Endocrinology, Endocrine-Related Cancer, Endocrine Connections (open access) and Clinical Endocrinology.

For more information visit www.endocrinology.org

The images depict IGSF1 observed in rat Sertoli cells during certain stages of the seminiferous epithelium: during stage II-III (left) and IV (bottom right), but not during stage XII (top right). Magnification 40×.

Credit: SD Joustra, CA Heinen, AMM van Pett and G Hamer.

Readers are invited to submit their endocrinology images for entry into the Journal of Endocrinology cover art competition. Winners will be selected by the Editor-in-Chief and will have their imagery featured on the cover of an issue of Journal of Endocrinology, both in print and online. Winners will be cited in the journal and will receive a professionally printed copy of the journal cover featuring their scientific image.

To enter the competition please email your images to joe@endocrinology.org accompanied with a short caption of 25-30 words explaining what the image depicts, its magnification and who should be acknowledged for its production. Images should be of high quality and resolution of at least 300 dpi at the final published size 220 mm (W) × 100 mm (H).

By submitting an image you warrant that you own the copyright and agree that images may be used in promotional material. Images not selected for use may still be used by the Society for Endocrinology and Bioscientifica for promotional purposes.

Contents continued from outside back cover

Hepatic insulin resistance and increased hepatic glucose production in mice lacking Fgf21 207–217
João Paulo G Camporez, Mohamed Ashr, Dongyan Zhang, Marco Kahn, Varman T Samuel, Michael J Jurczak & François R Jornayvaz

Postnatal overnutrition programs the thyroid hormone metabolism and function in adulthood 219–226
Patricia C Lisboa, Ellen P S Conceição, Elaine de Oliveira & Egberto G Moura

ERRATUM
TWIST1 and TWIST2 regulate glycogen storage and inflammatory genes in skeletal muscle X1
Jonathan M Moody, Julie Massignar, Ferenc L M Szekeres & Anna Krook

THIS ISSUE’S COVER

The images depict IGSF1 observed in rat Sertoli cells during certain stages of the seminiferous epithelium: during stage II-III (left) and IV (bottom right), but not during stage XII (top right). Magnification 40×.
