VOLUME 233  NUMBER 2

REVIEWS

FoxO integration of insulin signaling with glucose and lipid metabolism
Sojin Lee & H Henry Dong  R67–R79

Akt signaling as a mediator of cardiac adaptation to low birth weight

High-density lipoprotein (HDL) metabolism and bone mass
Nicholas I Papachristou, Harry C Blair, Kyriakos E Kypreos & Dionysios J Papachristou  R95–R107

Neurokinin B regulates reproduction via inhibition of kisspeptin in a teleost, the striped bass
Nilii Zmora, Ten-Tsao Wong, John Slabkefeld, Berta Leavai-Sivan & Yonathan Zohar  159–174

Attenuation of epidermal growth factor (EGF) signaling by growth hormone (GH)
Lorena Gonzalez, Johanna G Milner, Pabllo E Irene, M Eugenia Diaz, Soledad P Rossi, Ana J Solota, Monica B Frugeri, Cristal M Hill, Andrzej Bartke & Daniel Turyn  175–186

Mode of GH administration and gene expression in the female rat brain
Marion Walser, Linus Scholder, Jan Oscarsson, Maria A I Aberg, Ruth Wickelgren, Johan Svensson, Jorgen Isogaard & N David Aberg  187–196

Attenuation of epidermal growth factor (EGF) signaling by growth hormone (GH)
Lorena Gonzalez, Johanna G Milner, Pabllo E Irene, M Eugenia Diaz, Soledad P Rossi, Ana J Solota, Monica B Frugeri, Cristal M Hill, Andrzej Bartke & Daniel Turyn  175–186

Dynamos of progesterone and estrogen receptor alpha in the ventromedial hypothalamus
Susana I Sa & Bruno M Fonseca  197–207

RESEARCH

Gja1 acts downstream of Acvr1 to regulate uterine decidualization via Hand2 in mice
Hai-Fan Yu, Zhan-Peng Yue, Kai Wang, Zhan-Qing Yang, Hong-Liang Zhang, Shuang Geng & Bin Guo  145–157
The Society for Endocrinology is one of the world’s leading authorities on hormones. Established in 1946, the Society’s aims are to support the advancement of scientific and clinical knowledge and increase research in endocrinology for the public benefit. It also plays a vital role in promoting and supporting endocrinology worldwide.

The Society for Endocrinology offers a range of journals including Journal of Endocrinology, Journal of Molecular Endocrinology, Endocrine-Related Cancer, Endocrine Connections (open access) and Clinical Endocrinology.

For more information visit www.endocrinology.org

The images depict double immunofluorescence staining, revealing the deposition of type III collagen (left: red staining) and the presence of desmin-positive pericytes (right: red staining) in cultured rat anterior pituitary cells in the presence of S100-expressing folliculostellate cells (green staining). Removal of folliculostellate cells resulted in lower collagen synthesis and fewer desmin-positive pericytes. From Tsukada et al. 229 159-170.

Readers are invited to submit their endocrinology images for entry into the Journal of Endocrinology cover art competition. Winners will be selected by the Editor-in-Chief and will have their imagery featured on the cover of an issue of Journal of Endocrinology, both in print and online. Winners will be cited in the journal and will receive a professionally printed copy of the journal cover featuring their scientific image.

To enter the competition please email your images to joe@endocrinology.org accompanied with a short caption of 25-30 words explaining what the image depicts, its magnification and who should be acknowledged for its production. Images should be of high quality and resolution of at least 300 dpi at the final published size 220 mm (W) × 100 mm (H).

By submitting an image you warrant that you own the copyright and agree that images may be used in promotional material. Images not selected for use may still be used by the Society for Endocrinology and Bioscientifica for promotional purposes.
