PROCEEDINGS OF THE SOCIETY FOR ENDOCRINOLOGY

EDITOR: KATHLEEN HALL

Meeting of 9 May 1962. Eighty-seventh (General) Meeting

BAKER, J. LESLEY, CLITHEROE, H. J. and PICKLES, V. R. The menstrual stimulant in primary dysmenorrhoea .......................................................... i

STERN, MARGARET I. and BARWELL, JANE O. H. The urinary excretion of 3β-hydroxy-D5 steroids with particular reference to the Stein Leventhal syndrome .......................................................... ii

EAYRS, J. T. and HOLMES, R. L. Endocrine changes caused by neonatal hyper‐thyroidism in the rat .......................................................... iii

CLARKE, J. R. and CHITTY, HELEN. Changes in the adrenal gland of the vole (Microtus agrestis) associated with pregnancy .................................................. iv

CARGILL THOMPSON, HELEN E. C. Some observations on the specificity of the 'Tibial test' for growth hormone .................................................. iv
Perry, J. S. and Rowlands, I. W. The effect of hypophysectomy on the ovarian cycle of the guinea-pig .......................................................... v

Butt, W. R., Crooke, A. C., Morris, R. and Palmer, R. Simmonds's disease treated with human pituitary follicle-stimulating hormone and chorionic gonadotrophin ........................................................................................................ vi

Mills, I. H. and Brooks, R. V. Effect of oestrogen on the metabolism of cortisone in hypopituitarism and the adrenogenital syndrome .......... vii

Renwick, A. G. C. Hypopituitarism as a cause of hypoglycaemia in children vii

Kirkham, K. E. and Stockwell-Hartree, A. A new 'in vitro' technique for the bioassay of thyrotrophin and its application to the measurement of TSH in extracts of human pituitary tissue ........................................................................ viii

Coyle, Mary G. The urinary excretion of oestrogen in four cases of anencephaly and one case of foetal death from cirrhosis of the liver .......... viii

Thomas, Picton. A case of adrenal hyperplasia ........................................ ix

Spickett, S. G. Forms of genetic variation in endocrine function ................ x

Munro, Donald S. Genetic influences in disorders of thyroid function .... xiii

Blank, C. E. Human cytogenetics and developmental anomalies of sex—an introduction ................................................................. xv

Clarke, C. A. Genetic variability and endocrine function. Problems in genetics and clinical medicine ....................................................... xvii
