It is hoped to publish the following papers in a forthcoming issue of the Journal:

**Bailey, E.** The use of gas-liquid chromatography in the assay of some corticosteroids in urine.

**Saba, N.** The estimation of cortisol and cortisone in bovine and ovine plasma.

**Harden, R. McG.** Calcium excretion in thermal sweat in thyrotoxicosis.

**Szontágh, P. E., Varga, L., Bardóczy, Á. & Földi, M.** The effect of orally administered gestagen on the anaphylactic reactions in rats.

**Sneyd, J. G. T.** Pancreatic and serum insulin in the New Zealand strain of obese mice.

**Harrison, F. A., McDonald, I. R. & Paterson, J. Y. F.** Comparison of the apparent rate of cortisol turnover determined by isotope dilution and cortisol secretion rate.

**Paterson, J. Y. F.** The distribution and turnover of cortisol in sheep.

**Lee, Audrey, E. & Williams, P. C.** Oestrogen antagonists: assay by inhibition of vaginal cornification.

**Green, K. & Matty, A. J.** The effect of thyroidal hormones on water permeability of the isolated bladder of the toad *Bufo bufo*.

**Thornburn, C. C. & Matty, A. J.** The effect of thyroid hormones *in vitro* on the oxygen consumption of toad tissues.

**Short Communications**

**Harland, W. A. & Goldberg, I. J. L.** The effect of environmental temperature on hepatic uptake and clearance of thyroid hormone.

**Caie, Edmar & Klopper, A.** The urinary excretion of pregnanediol after the administration of an oral gestagen (progesterone cyclopentyl enol ether).

**Hall, Kathleen.** Investigation of the presence of chromaffin cells in the uterus of the mouse.
