Contents

BELLAMY, D. Observations on cortisol-induced involution of the thymus ........ v

FOSTER, C. L., YOUNG, B. A. and CAMERON, E. Some preliminary observations on the ultrastructure of the adenohypophysis of the female rabbit .......... vi

WALL, P. G. The effect of X-irradiation on the post-natal development of the pituitary gland of the rat .................................................... vii

HERVEY, G. R. and HERVEY, ELIZABETH. Effects of progesterone on food intake and body composition in rats ........................................ vii

CROSS, B. A. and SILVER, I. A. Hypothalamic unit activity in pseudopregnant rats .... viii

DEANESLY, R. and PERRY, J. S. Corpus luteum control in hysterectomized guinea-pigs viii

HONEY, D. P., POULSON, EVELYN, ROBSON, J. M. and SULLIVAN, F. M. Reversal by antagonists of the placental and teratogenic effects of 5-hydroxytryptamine .......... viii

LUTWAK-MANN, C. and HAY, M. F. Effect of certain water-soluble oestrogens on rabbit blastocysts ................................................................. ix

FOLMAN, Y. and POPE, G. S. The inter-action of strong and weak uterotrophic-vagino-trophic agents in the immature mouse ........................................ x

ZAGNI, P. A. and BENSON, G. K. Further studies on the inhibition of lactation in the rat with ICI compound 33828 .................................................... xi

SCHMIDT-ELMENDORFF, H. and BUCHHOLZ, R. Some observations on comparative estimations of various gonadotrophins by biological and immunological assay methods .......................................................... xii

SCHMIDT-ELMENDORFF, H. An investigation of the specificity of the augmentation test in rats as a test for FSH activity ...................................... xiii
