INDEX

The titles given under subject headings are abbreviated or modified. The full title of any paper is given under the heading of the first author’s name

| Absorption, from subcutaneously implanted hormone tablets (Cowie & Folley) | 375 |
| Adrenalectomy, and gastric secretion (Tuerkischer & Wertheimer) | 143 |
| Androgens, stimulating gonads in hypophysectomized pigeons (Chu & You) | 431 |
| Basal Androgens, Absorption, | |
| Barcroft, Sir J. The preparation and biological effects of iodinated proteins. 1. Introduction | 219 |
| Basal metabolism, unaffected by consumption of milk from cows fed iodinated protein (Robertson) | 300 |
| Blood, of rat and sex hormones (Korenchesky & Hall) | 103 |
| Bones, fracture of pelvis in oestrogen-treated bovines (Cowie) 19 |
| Bottomley, A. C. Logistic dose-response curves: a theoretical approach | 399 |
| Bovines, see bones see also lactation |
| Casein, iodinated, see iodinated proteins |
| Cattle, induced lactation and other effects of oestrogen treatment (Hammond & Day) | 53 |
| see also lactation |
| Chu, J. P. The influence of the thyroid on pregnancy and parturition in the rabbit 109 |
| Chu, J. P. & You, S. S. Gonad stimulation by androgens in hypophysectomized pigeons 431 |
| The role of thyroid gland and oestrogen in the regulation of gonadotrophic activity of the anterior pituitary 115 |
| Corpus luteum and uterine function (Chu, Lee & You) 393 |
| Cowie, A. T. Fracture of the pelvic bones in bovines implanted with tablets of synthetic oestrogens 19 |
| Cowie, A. T. & Folley, S. J. Some factors affecting the absorption rate of subcutaneously implanted hormone tablets 375 |
| Cows, see lactation |
| Day, F. T., see Hammond, J. Jr. |
| Deanesly, R., Emmett, J. & Parkes, A. S. The preparation and biological effects of iodinated proteins. 7. Use of Rana temporaria tadpoles for the assay of thyroidal activity 312 |
| Deanesly, R., Folley, S. J. & Parkes, A. S. Further observations on the formation of ‘ghosts’ in subcutaneously implanted tablets 422 |
| Deanesly, R. & Parkes, A. S. The preparation and biological effects of iodinated proteins. 8. Use of Xenopus tadpoles for the assay of thyroidal activity 324 |
| 9. Biological activity of iodinated proteins 356 |
| Diabetogenic and pancreotropic actions of anterior pituitary extract (Ogilvie) 152 |
| Dose-response relations, logistic (Bottomley) 399 of galactopoietic action (Folley & Young) 194 |
| Eggs, fertilization of, in hypophysectomized rats (Rowlands & Williams) 417 |
| Emery, F. E. & Joyce, H. E. Enterohepatic circulation of oestrogens 371 |
| Emmett, J., see Deanesly, R. |
| Enterohepatic circulation, of oestrogens (Emery & Joyce) 371 |
| Fawns, H. T., Folley, S. J. & Young, F. G. Galactopoietic action of pituitary extracts in lactating cows. 2. The response during the peak of lactation 205 |
| Ferret, oestrous cycle and hormonal control (Marshall & Hammond) 159 |
| Fertilization of eggs in hypophysectomized rats (Rowlands & Williams) 417 |
| Folley, S. J. & Malpress, F. H. The artificial induction of lactation in bovines by oral administration of synthetic oestrogens 23 |
| The artificial induction of lactation in the bovine by the subcutaneous implantation of synthetic oestrogen tablets 1 |
| The chemical composition of bovine mammary secretions induced by the subcutaneous implantation or oral administration of synthetic oestrogens 37 |
| Folley, S. J., Malpress, F. H. & Young, F. G. Induction of lactation in goats and cows with synthetic oestrogens and anterior-pituitary extracts 181 |
| Folley, S. J., Stewart, D. L. & Young, F. G. Experiments on the use of tablets containing 50 % hexestrol for the artificial induction of lactation in the bovine 43 |
| Folley, S. J. & Young, F. G. The galactopoietic action of pituitary extracts in lactating cows. 1. Dose-response relations and total yields during declining lactation 194 3. Comparison of extracts of pituitary glands from different species 212 |
| see also Fawns, H. T. see also Cowie, A. T. see also Deanesly, R. |
| Galactopoietic action of pituitary extracts in lactating cows (Fawns, Folley & Young) 205; (Folley & Young) 194, 212 |
| Gastric secretion, after adrenalectomy (Tuerkischer & Wertheimer) 143 |
| ‘Ghost’ formed in subcutaneously implanted tablets (Deanesly, Folley & Parkes) 422 |
| Glover, R. E., see Parkes, A. S. |
Goats, induced lactation with synthetic oestrogens and anterior-pituitary extracts (Folley, Malpress & Young) 181

Gonad stimulation, by androgens in hypophysectomized pigeons (Chu & You) 431

see also ovarian stimulation

Gonadotrophic activity of pituitary, regulated by thyroid and oestrogen (Chu & You) 115

Gonadotrophin, endogenous, role in response to serum gonadotrophin (Williams) 137

Gonadotrophin, serum, biological action of (Williams) 127, 131, 137

use in inducing ovulation in anoestrous sheep (Hammond) 169

Growth, after thyroidectomy in rats (Rowlands) 305

in relation to diabetogenic and pancreotrophic actions of anterior pituitary extract (Ogilvie) 152

HALL, K., see KORENCEVSKY, V.

HAMMOND, J. Jr. Induced ovulation and heat in anoestrous sheep 169

see also MARSHALL, F. H. A.

HAMMOND, J. Jr. & DAY, F. T. Oestrogen treatment of cattle: induced lactation and other effects 53

Heat, induced in anoestrous sheep (Hammond) 169

Heifers, lactation induced by single injections of stilboestrol esters (Parkes & Glover) 90

see also lactation

Hexoestrol, see oestrogens

Hormonal control of oestrous cycle in ferret (Marshall & Hammond) 159

Hormone tablets, absorption from (Cowie & Folley) 375; (Parkes) 386

Hypophysectomized pigeons, gonad stimulation by androgens in (Chu & You) 431

Hypophysectomized rats, fertilization of eggs in (Rowlands & Williams) 417

ovarian stimulation by oestrogens in (Williams) 125

Hypophysectomy, and response to serum gonadotrophin (Williams) 127, 131

Implanted tablets, absorption from (Cowie & Folley) 375; (Parkes) 386

‘ghost’ formation in (Deanesly, Folley & Parkes) 422

see also lactation

Iodinated proteins, their preparation and biological effects

1. Introduction (Barcroft) 219

2. Preparation and properties (Pitt Rivers & Randall) 221

3 and 4. Effects on lactating cows (Blaxter) 237, 266

5. Harmless effect on milk composition (Robertson) 300

6. Effects on growth of rats after thyroidectomy (Rowlands) 305

7. Thyroidal activity assayed on Rana tadpoles (Deanesly, Emmett & Parkes) 312

8. Thyroidal activity assayed on Xenopus tadpoles (Deanesly & Parkes) 324

9. Biological activity (Deanesly & Parkes) 356

Iodine content, and biological activity of thyroid preparations (Parkes) 426

JOYCE, H. E., see EMERY, F. E.

KORENCEVSKY, V. & HALL, K. Effects of sex hormones on the blood in rats 103

Lactation, artificially induced in bovines

by implanted oestrogens (Folley & Malpress) 1

by oestrogens (Hammond & Day) 53

by orally administered oestrogens (Folley & Malpress) 23

by single injections of stilboestrol esters (Parkes & Glover) 90

by synthetic oestrogens and anterior-pituitary extracts (Folley, Malpress & Young) 181

by tablets containing 50 % hexoestrol (Folley, Stewart & Young) 43

effects of iodinated proteins on (Blaxter) 237, 266

galactopoietic action of pituitary extracts on (Fawns, Folley & Young) 205; (Folley & Young) 194, 212

LAWSON, W., STROUD, S. W. & WILLIAMS, P. C.

Oestrogen excretion in milk from oestrogenized cattle 83

LEE, C. C., see CHU, J. P.

Logistic dose-response curves (Bottomley) 399

MALPRESS, F. H., see Folley, S. J.

Mammary secretions, see lactation

see also milk

MARSHALL, F. H. A. & HAMMOND, J. Jr. Experimental control by hormone action of the oestrous cycle in the ferret 159

Metabolism, see basal metabolism

Milk, from oestrogenized cattle

chemical composition of (Folley & Malpress) 37

oestrogen excretion in (Lawson, Williams & Stroud) 83

from cows fed iodinated protein

effect on basal metabolism (Robertson) 300

Oestrogens, combined effect with anterior-pituitary extracts in inducing lactation (Folley, Malpress & Young) 181

effect on blood in rats (Korenchevsky & Hall) 103

effect on gonadotrophic activity of rabbit pituitary (Chu & You) 115

effect on response of hypophysectomized rats to serum gonadotrophin (Williams) 131

enterohepatic circulation of (Emery & Joyce) 371

excretion in milk from oestrogenized cattle (Lawson, Stroud & Williams) 83

fractures of pelvis caused by, in cattle (Cowie) 19

in experimental control of oestrous cycle in ferrets (Marshall & Hammond) 159

induced lactation and other effects in cattle (Hammond & Day) 53

inducing lactation in bovines (Folley & Malpress) 1, 23

lactation caused by single injections of stilboestrol esters (Parkes & Glover) 90

lactation caused by tablets containing 50 % hexoestrol (Folley, Stewart & Young) 43

stimulating ovary in absence of hypophysis, uterus, and adrenals (Williams) 125

used in induction of heat and ovulation in anoestrous sheep (Hammond) 169

Oestrous cycle, hormonal control of, in ferret (Marshall & Hammond) 159

OGILVIE, R. F. ‘Growth’ in relation to the diabetogenic and pancreotrophic actions of anterior pituitary extract 152

Ovarian response, to serum gonadotrophin after hypophysectomy (Williams) 127

in oestrogenized, hypophysectomized rats (Williams) 131

role of endogenous gonadotrophin (Williams) 137

Ovarian stimulation, by oestrogens in absence of hypophysis, uterus, and adrenals (Williams) 125

see also gonad stimulation
INDEX

Ovulation, induced in anoestrous sheep (Hammond) 169
Pancrrectopic action, of anterior pituitary extract in relation to growth (Ogilvie) 152
PARKES, A. S. Relation between iodine content and biological activity of thyroid preparations 426
Some factors affecting absorption from implanted tablets 386
see also DEANESELY, R.

PARKES, A. S. & GLOVER, R. E. Induction of lactation in heifers by a single injection of esters of diethylstilboestrol 90

Parturition, in rabbits, effect of thyroid on (Chu) 109

Pelvic bones, fractures in oestrogenized cattle (Cowie) 19

Pigeons, hypophysectomized, gonad stimulation by androgens in (Chu & You) 431

PITT RIVERS, R. V. & RANDALL, S. S. The preparation and biological effects of iodinated proteins. 2. Preparation and properties of physiologically active iodinated proteins 221

Pituitary extracts, anterior galactopoietic action of, in declining lactation (Folley & Young) 194
galactopoietic action of, in peak lactation (Fawns, Folley & Young) 205
inducing lactation in combination with oestrogen (Folley, Malpress & Young) 181
pancreotropic and diabetogenic action in relation to growth (Ogilvie) 152
species difference in galactopoietic activity (Folley & Young) 212

Pituitary gonadotrophic activity, regulation by thyroid and oestrogen (Chu & You) 115
see also gonadotrophin, endogenous

Pregnancy, in rabbit, effect of thyroid on (Chu) 109

Pregnant mares' serum, see gonadotrophin, serum

Progesterone, in hormonal control of oestrous cycle in ferret (Marshall & Hammond) 159

Rabbit, pregnancy and parturition in, effect of thyroid (Chu) 109

Rana tadpoles used in assay of thyroidal activity (Deanesly, Emmett & Parkes) 312

RANDALL, S. S., see PITT RIVERS, R. V.

ROBERTSON, J. D. The preparation and biological effects of iodinated proteins 5. The effect on basal metabolism of milk fed with iodinated protein 300

ROWLANDS, I. W. The preparation and biological effects of iodinated proteins. 6. Further experiments on the restoration and maintenance of growth after thyroidectomy 305

ROWLANDS, I. W. & WILLIAMS, P. C. Fertilization of eggs in hypophysectomized rats 417

Serum gonadotrophin, see gonadotrophin, serum

Sex hormones, and blood of rats (Korenchevsky & Hall) 103

and regulation of oestrous cycle in ferret (Marshall & Hammond) 159
inducing ovulation and heat in anoestrous sheep (Hammond) 169
see also androgens, gonadotrophin and oestrogens
Sheep, anoestrous, induction of ovulation and heat in (Hammond) 169
STEWART, D. L., see FOLLEY, S. J.

Stillboestrol, see oestrogens

STROUD, S. W., see LAWSON, W.

Tablets, absorption from (Cowie & Folley) 375;
(Parkes) 386
containing 50% hexoestrol, lactation induced with (Folley, Stewart & Young) 43

‘ghost’ formation in (Deanesly, Folley & Parkes) 422

Tadpoles, Rana, for the assay of thyroidal activity (Deanesly, Emmett & Parkes) 312

Tadpoles, Xenopus, for the assay of thyroidal activity (Deanesly & Parkes) 324

Testosterone, see androgens

Thyroid extracts, relation between iodine content and biological activity (Parkes) 426

Thyroid gland, effect on pregnancy and parturition in rabbits (Chu) 109

effect on gonadotrophic activity of anterior pituitary (Chu & You) 115

Thyroidal activity, assayed in Rana tadpoles (Deanesly, Emmett & Parkes) 312

assayed in Xenopus tadpoles (Deanesly & Parkes) 324

Thyroidectomy, restoration and maintenance of growth after (Rowlands) 305

TUERKISCHER, E. & WERTHEIMER, E. Adrenalectomy and gastric secretion 143

Uterus, functional relation with corpus luteum (Chu, Lee & You) 392

ovarian stimulation by oestrogens in its absence (Williams) 125

WERTHEIMER, E., see TUERKISCHER, E.

WILLIAMS, P. C. Ovarian stimulation by oestrogens. 2. Simulation in the absence of hypophysis, uterus, and adrenal glands 123

Studies of the biological action of serum gonadotrophin. 1. Decline in ovarian response after hypophysectomy 127

2. Ovarian response after hypophysectomy and oestrogen treatment 131

3. Role of endogenous gonadotrophin 137
see also LAWSON, W., see also ROWLANDS, I. W.

Xenopus tadpoles, in the assay of thyroidal activity (Deanesly & Parkes) 324

YOU, S. S., see CHU, J. P.

YOUNG, F. G., see FAWNS, H. T.
