Index
Adrenal gland, clear cell adenoma of, conversion of pregnenolone and pregnenolone sulphate in *vivo* by, man (Griffiths et al.) 49

genetic variation in, mouse (Shire & Spickett) 215

steroid secretion by, foetal and neonatal sheep (Alexander et al.) 1

steroid synthesis *in vitro* by, anencephalic infant (Shahwan et al.) 29

Adrenalectomy, prolonged gestation in ewes after foetal (Drost & Holm) 293

Adrenocortical control, effect of, patients with Cushing's disease (James et al.) 15

Age, influence on thyrocalcitonin secretion, sheep (Care et al.) ix

Aldosterone, double isotope assay of, human peripheral plasma (Fraser & James) 59

Androgen, concentrations in plasma and testis, developing rat (Resko et al.) 485

induction and prevention of male homosexuality by, rat (Dörner & Hinz) 387

Androstenedione, relation to puberty and growth, male calf (Skinner et al.) 261

Assay, biochemical, of oestrogen, rat (Jellinck & Garland) 131

double isotope of aldosterone, corticosterone and cortisol, human peripheral plasma (Fraser & James) 59

of fish prolactin (Ensor & Ball) iii

ovarian ascorbic acid depletion, comparison of LH from different species using (Hutchinson et al.) 231

ventral prostate, comparison of LH from different species using (Hutchinson et al.) 231

Autotransplantation of ovary and uterus to neck, effect on ovarian function, sheep (Harrison et al.) xiii

Behaviour, sexual, female rhesus monkey (Zumpe & Michael) 117

Bird, effect of cortisol on growth and uric acid excretion, chick (Adams) 145

secretory activity of pancreatic delta cells, young chick and chick embryo (Machino & Sakuma) 129

Blastoeyost, effect of ovarian hormones on shedding of zona pellucida, rat (Dickmann) 393

Blood, puerperal, oxytocin-like activity in, man (Coch et al.) 137

Carbohydrate metabolism, effect of fasting on, man (Jackson et al.) 259

effect of LH and TSH on, prepubertal rat ovary *in vitro* (Major & Armstrong) 73

Carcass fat content, relation to 'Lee index', rat (Bernardis & Patterson) 527

Cattle, androstenedione in relation to puberty and growth, male calf (Skinner et al.) 261

detection of oxytocin release in response to conditioned stimuli (Cleverley) ii

progesterone in plasma of cow (Gupta & Pope) xii

Chlordiazepoxide, given with or without dexamphetamine, effect on human plasma cortisol (Butler et al.) 391

Corpus luteum, lysosomal function in, sheep (Dingle et al.) 325

Corticosterone, double isotope assay of, human peripheral plasma (Fraser & James) 59

localization and binding in rat liver (Sanyal & Snart) xvi

Corticotrophin (ACTH), plasma, response to insulin hypoglycaemia, lysine-vasopressin and metyrapone, pig (Donald et al.) v

Cortisol, bound and unbound, kinetics of exchange between, human plasma (Dixon) 457

distribution of, sheep (Paterson & Harrison) 37

double isotope assay of, human peripheral plasma (Fraser & James) 59

effect on growth and uric acid excretion, chick (Adams) 145

plasma, changes in, induced by dexamphetamine and/or chlordiazepoxide, man (Butler et al.) 391

Cryptorchidism, effect on fertilizing capacity of rabbit spermatozoa (Cummins & Glover) viii

Cushing's disease, defect of adrenocortical control in, man (James et al.) 15

Delta cells, pancreatic, secretory activity of, young chick and chick embryo (Machino & Sakuma) 129

Dexamphetamine, given with or without chlordiazepoxide, effect on human plasma cortisol (Butler et al.) 391

Egg transport, acceleration after induced ovulation, pregnant rabbit (Adams) 101

Elasmobranchii, corticosteroid 1α-hydroxylase in interrenal of (Truscott & Idler) 615

Electrolytes, effect of low-iodine diet on urinary Na:K, rat (Pye & Matty) x

Electrophoresis, starch gel, of mouse pituitary gonadotrophins (Lloyd et al.) 313

Enzymes of lactose biosynthesis in hormonally stimulated rabbit mammary gland (Heitzman) 81

Epididymis, discrepancy in weight and blood flow before and after hypophysectomy, mouse (Bindon et al.) 385

17α-Ethynyl-19-nortestosterone, and related compounds, metabolism in man (Fotherby et al.) xv

Fish, elasmobranchs, corticosteroid 1α-hydroxylase in interrenal of (Truscott & Idler) 515

goldfish, modification by sex hormones of bulbar electrical activity (Oshima & Gorbman) 409

prolactin, bioassay of (Ensor & Ball) iii

Foetal membranes, hydroxyesteroid dehydrogenases in, mouse (Botte et al.) 189

Foetus, adrenalectomized, prolonged gestation in ewes after (Drost & Holm) 293
**Index**

**Foetus**, insulin concentration in plasma and fluids of, sheep (Alexander et al.) 389  
**lamb**, effects of electrocoagulation of hypophysis on growth (Liggins & Kennedy) 371  
**sheep**, adrenal steroid secretion by (Alexander et al.) 1

**Follicle-stimulating hormone** (FSH), counter-balancing effect of, on prolactin, newt (Mazzi & Vellano) 529  
effect on lipid and protein metabolism, toad (Pollett & Redshaw) 439  
**inhibitor**, monkey urine (Sairam et al.) 165  
interactions between ovary and, hamster (Grady & Greenwald) 85

**Fowl**, domestic, effect of cortisol on growth and uric acid excretion, chick (Adams) 145  
domestic, secretory activity of pancreatic delta cells, young chick and chick embryo (Machino & Sakuma) 129

**Gas chromatography**, analysis of unconjugated, neutral non-polar steroids, human term placenta (Chamberlain et al.) 91

**Genetic variation**, in adrenal structure, mouse (Shire & Spickett) 215

**Gestation**, prolongation after foetal adrenalectomy, ewe (Drost & Skinner) 353

**Glycogen**, action of ovarian steroids and relaxin on, hamster uterus (Hall & Salimi Khaligh) 353

**Goat**, milking stimulus and mammary growth in (Cowie et al.) 243  
plasma, prolactin levels in (Bryant et al.) iv

**Goldfish** (Carassius auratus), modification by sex hormones of bulbar electrical activity (Oshima & Gorbman) 409

**Gonadotrophic activity**, immunoassay of, serum of mare during early pregnancy (Allen) iii (T)

**Gonadotrophin**, human chorionic, ovarian response to, pregnant and post-parturient rabbit (Adams) 101  
human chorionic, response of oligospermic men to (de Kretser et al.) 107  
human pituitary, response of oligospermic men to (de Kretser et al.) 107  
mouse pituitary, starch-gel electrophoresis of (Lloyd et al.) 313

**Granulosa**, histochemistry of, opossum (Guraya) 237

**Growth**, androstenedione in relation to, male calf (Skinner et al.) 261  
effect of cortisol on, chick (Adams) 145  
effects of electrocoagulation of foetal hypophysis on, sheep (Liggins & Kennedy) 371  
mammary, milking stimulus and, goat (Cowie et al.) 243

**Growth hormone** (GH), intact, absence in urine as shown by radioimmunoassay, man (Girard & Greenwood) 493  
plasma levels, during fasts and after glucose, man (Hunter et al.) 297  
plasma, response to insulin, patients with Cushing's disease (James et al.) 15  
secretion, oral test for stimulation of, children (Jackson & Grant) i

**Guinea-pig**, oxytocin release after electrical stimulation of afferent path (Tindal et al.) 205  
progesterone in arterial plasma during oestrus cycle (Feder et al.) 505

**Hamster**, golden, interactions between ovary and FSH (Grady & Greenwald) 85  
inhibition by relaxin of spontaneous contractions of uterus in vitro (Salimi Khaligh) 125  
uterus, action of ovarian steroids and relaxin on glycogen and enzyme activities in (Hall & Salimi Khaligh) 353

**Homosexuality**, male, induction and prevention by androgen, rat (Dörner & Hinz) 387

**Horse**, immunoassay of gonadotrophic activity of serum from mare in early pregnancy (Allen) iii (T)

**Human chorionic gonadotrophin** (HCG), ovarian response to, pregnant and post-parturient rabbit (Adams) 101  
response of oligospermic men to (de Kretser et al.) 107

**Human pituitary gonadotrophin** (HPG), response of oligospermic men to (de Kretser et al.) 107

11-Hydroxy corticosteroid, plasma, response to insulin, patients with Cushing's disease (James et al.) 15

16a-Hydroxydehydroepiandrosterone (16a-OH-DHA), conversion of pregnenolone to in vitro, by adrenal from anencephalic infant (Shahvan et al.) 29

Hydroxysteroid dehydrogenases, 17β- and 20α-, activity in rabbit (Dennis et al.) 257  
distribution of, pig placenta (Christie) vii, 285  
in placenta, foetal membranes and uterine mucosa, mouse (Botte et al.) 189

Hypophysectomy, discrepancy in weight and blood flow of testes and epididymis, before and after, mouse (Bindon & Waites) 385

Hypophysis, foetal, effects of electrocoagulation of, on growth and development, sheep (Liggins & Kennedy) 371

Hypothalamic lesions, weaning and adult rat, correlation between 'Lee index' and carcass fat content (Bernardis & Patterson) 527

Hypothalamic transplants, effect in super-ovulated immature rat (Hopkins et al.) 363

Hypothyroidism, spontaneous primary, parathyroid function in, man (Adams et al.) 467

Immunooassay, of gonadotrophic activity in early pregnancy serum, mare (Allen) iii (T)

Insulin, concentration in foetal plasma and fluids, sheep (Alexander et al.) 389  
hypoglycaemia, plasma ACTH response to, pig (Donald et al.) v

plasma, during fasts and after glucose, man (Hunter et al.) 297  
response to, Cushing's disease, man (James et al.) 15  
seasonal changes in concentration in plasma, rat (Howland & Nowell) vi
Index

Interrenals, corticosterone 1x-hydroxylase in, elasmobranchs (Truscott & Idler) 516

Ittrich fluorescence reaction, measurement of oestrogens with (Brown et al.) 175

Kober colour reaction, measurement of oestrogens with (Brown et al.) 175

Lactation, oxytocin test to demonstrate initiation and end of, rat (Deia) 133

Lactose, biosynthesis, enzymes of, normal and hormonally stimulated rabbit mammary glands (Heitzman) 81

‘Lee index’, relation to carcass fat content, rat (Bernards & Patterson) 527

Lipid metabolism, effect of oestrogen and gonadotrophins on, toad (Follett & Redshaw) 439

Liver, binding and localization of corticosterone in, rat (Sanyal & Snart) xvi
effect of sex steroids on fine structure of, toad (Nicholls et al.) x
ring A and side-chain reduction of [4-14C]-progesterone in vitro, rat (Shirley & Cooke) 477

Luteinizing hormone (LH), comparison of, in various species, using ventral prostate and ovarian ascorbic acid depletion methods (Hutchinson et al.) 231
effect on carbohydrate metabolism in vitro, prepubertal rat ovary (Major & Armstrong) 73

Lysine-vasopressin, plasma ACTH response to, pig (Donald et al.) v

Mammary gland, hormonally stimulated, enzymes of lactose biosynthesis in, rabbit (Heitzman) 81
milking stimulus and growth of, goat (Cowie et al.) 243

Man, absence of intact GH in urine (Girard & Greenwood) 493
anencephalic infant, adrenal steroid synthesis in vitro (Shahwan et al.) 29
changes in plasma cortisol induced by dexamethasone and/or chloridiazepoxide (Butler et al.) 391
defect of adrenocortical control in Cushing’s disease (Janes et al.) 15
effect of fasting on carbohydrate metabolism (Jackson et al.) 259
effect of metyrapone on oestrogen excretion (Argüelles et al.) 253
evidence for heterogeneity in obesity (Jackson et al.) 259
kinetics of protein-binding of cortisol in plasma (Dixon) 457
male, daily changes in urinary testosterone level (Corker & Exley) 255
metabolism of 17α-ethylnyl-19-nortestosterone and related compounds in (Fotherby et al.) xv
oligospermic, treatment with HPG and HCG (de Kretser et al.) 107

oral test for stimulating GH secretion, children (Jackson & Grant) i
ovary in early pregnancy (Govan) 421
oxytocin-like activity in puerperal blood during sucking (Coch et al.) 137
peripheral plasma, double isotope assay of aldosterone, corticosterone and cortisol in (Fraser & James) 59
placenta, analysis of unconjugated, neutral non-polar steroids of (Chamberlain et al.) 91
plasma insulin and GH during fasts and after glucose (Hunter et al.) 297
primary hypothyroidism, parathyroid function in (Adams et al.) 467
urinary testosterone excretion, measurement of (Moxham & Nabarro) xiv

Melatonin, effect on wheel-running activity of rats (Wong & Whiteside) 383

Methallibure (ICI 33,828), effect on reproductive system, male rat (Hemsworth et al.) 275

Metyrapone, effect of oestrogen excretion, man (Argüelles et al.) 253
plasma ACTH response to, pig (Donald et al.) v

Milk-ejection reflex, effect of test anaesthesia on, rabbit (Findlay) 127
release of oxytocin from neurohypophysis after stimulation of afferent path of, guinea-pig (Tindal et al.) 205

Milking, detection of oxytocin release in response to, cow (Cleverley) ii
stimulus and mammary growth, goat (Cowie et al.) 243

Monkey, (Macaca mulatta), female, sexual behaviour in (Zumpe & Michael) 117
(Macaca radiata), FSH inhibitor in urine of (Sairam et al.) 165

Mouse, hydroxysteroid dehydrogenases in placenta, foetal membranes and uterine mucosa (Botte et al.) 189
pituitary gonadotrophins, starch-gel electrophoresis of (Lloyd et al.) 313
prostate, aged, change in synthesis of RNA in (Mainwaring) xvii
strain differences in adrenal structure (Shire & Spickett) 215
testis and epididymis, discrepancy in weight and blood flow before and after hypophysectomy (Bindon & Waites) 385
transport of ova in oviduct (Humphrey) 267

Neurohypophysis, release of oxytocin from, after electrical stimulation of afferent path of milk-ejection reflex, guinea-pig (Tindal et al.) 205

Newt ( Triturus cristatus carnifex (Laur.), counter-balancing effect of FSH on anti-gonadal effect of prolactin (Mazzi & Vellano) 529

Nidation, mechanism of, hypophysiotomized, progesterone-treated pregnant rat (Varavudhi) 429

Norethynodrel, effects of, hypo-, hyperthyroid rat (Ward & De Prospo) 263

Nuclear protein, adsorption to oestriadiol by (King & Gordon) 195
Index

Oestradiol, effect on spontaneous and evoked bulbar electrical activity, goldfish (Oshima & Gorbman) 409
isolation of oestradiol receptor from nuclei by adsorption on (King & Gordon) 195
Kober colour and Ittrich fluorescence reactions in measurement of (Brown et al.) 175
Oestradiol receptor, isolation from nuclei by adsorption on oestradiol-17β (King & Gordon) 195
Oestrol, Kober colour and Ittrich fluorescence reactions in measurement of (Brown et al.) 175
Oestrogen, action of progesterone, relaxin and, on glycogen and enzyme activities in hamster uterus (Hall & Salimi Khaligh) 353
biochemical assay of, using rat liver microsomes (Jellinek & Garland) 131
effect of metyrapone on excretion of, man (Argüelles et al.) 253
effect on lipid and protein metabolism, toad (Follett & Redshaw) 459
effect on shedding of zona pellucida by rat blastocyst (Dickmann) 393
effects on thyroid, castrated rat (Bithell & Brown-Grant) 397
Oestrophen, Kober colour and Ittrich fluorescence reactions in measurement of (Brown et al.) 175
Oestrous cycle, progesterone in arterial plasma of guinea-pigs during (Feder et al.) 505
Olfactory bulb EEG, effect of sex hormones on, goldfish (Oshima & Gorbman) 409
Opossum, American, histochemistry of granulosa and theca interna (Guaray) 237
Ovary, function after autotransplanted with uterus to neck, sheep (Harrison et al.) xiii
histochemistry of granulosa and theca interna, opossum (Guaray) 237
in early pregnancy, man (Govan) 421
interactions between FSH and, hamster (Grady & Greenwald) 85
pubertal, effect of LH and TSH on carbohydrate metabolism in vitro, rat (Major & Armstrong) 73
response to HCG, pregnant and post-parturient rabbit (Adams) 101
Ovulation, following vaginal stimulation, rat (Zarrow & Clark) 343
induction with HCG, pregnant and post-parturient rabbit (Adams) 101
Ovum, transport in oviduct, mouse (Humphrey) 267
Oxytocin, detection of release in response to stimuli associated with milking, cow (Cleaverley) ii
release after electrical stimulation of afferent reflex path, guinea-pig (Tindal et al.) 205
repletion of, in posterior lobe of pituitary, rat (Young & Van Dyke) 337
Oxytocin-like activity, estimation in blood of puerperal women during suckling (Coch et al.) 137
Oxytocin test to demonstrate initiation and end of lactation, rat (Deis) 133
Pancreas, delta cells, secretory activity of, young chick and chick embryo (Machinio & Sakuma) 129
Parathyroid, function in spontaneous primary hypothyroidism, man (Adams et al.) 467
Pig, placenta, distribution of hydroxysteroid dehydrogenases (Christie) vii, 285
Pituitary, effects of electrocoagulation of foetal hypophysis on growth, sheep (Liggins & Kennedy) 371
posterior lobe, repletion of vasopressin and oxytocin in, rat (Young & Van Dyke) 337
Pituitary inhibitor, ICI 33,328, effect on reproductive system, male rat (Hemsworth et al.) 275
Pituitary transplants, effect in superovulated immature rat (Hopkins et al.) 363
Placenta, distribution of hydroxysteroid dehydrogenases in, pig (Christie) vii, 285
gas chromatographic analysis of steroids of, man (Chamberlain et al.) 91
hydroxysteroid dehydrogenases in, mouse (Botte et al.) 159
Plasma, ACTH response to insulin hypoglycaemia, lysine-vasopressin and metyrapone, pig (Donald et al.) v
androgen in, developing rat (Resko et al.) 486
arterial, progesterone concentrations in, guinea-pigs during oestrous cycle (Feder et al.) 505
cortisol, changes induced by dexamethasone and/or chlordiazepoxide, man (Butler et al.) 391
foetal, concentration of insulin in, sheep (Alexander et al.) 389
GH response to insulin, patients with Cushing's disease (James et al.) 15
human peripheral, double isotope assay of aldosterone, corticosterone and cortisol in (Fraser & James) 59
11-hydroxxyxorticosteroid response to insulin, patients with Cushing's disease (James et al.) 15
insulin, and GH after glucose loads, man (Hunter et al.) 297
insulin, seasonal changes of concentration, rat (Howland & Nowell) vi
kinetics of exchange between bound and unbound cortisol, man (Dixon) 457
prolactin levels in, goat (Bryant et al.) iv
sugar, response to insulin, patients with Cushing's disease (James et al.) 15
systemic, variation in level of progesterone in, cow (Gupta & Pope) xii
Pregnancy, early, ovary in, man (Govan) 421
Pregnant mare serum (PMS), gonadotrophic activity in, mare in early pregnancy (Allen) iii (T)
Pregnenolone, conversion in vitro to steroid hormones by human adrenal tumour (Griffiths et al.) 49
conversion to progesterone and 16α-OH-DHA in vitro, adrenal from anencephalic infant (Shahwan et al.) 29
sulphate, conversion in vitro to steroid hormones by human adrenal tumour (Griffiths et al.) 49
Index

Progestational steroids, metabolism in man (Fotherby et al.) xv

Progesterone, acidic urinary metabolites of, rabbit (Allen et al.) 153
action of oestrogen, relaxin and, on glycogen and enzyme activities in hamster uterus (Hall & Salimi Khaligh) 353
conversion of pregnenolone to in vitro, adrenal from anephric infant (Shahwan et al.) 29
effect on shedding of zona pellucida by rat blastocyst (Dickmann) 393
effect on spontaneous and evoked bulb electrical activity, goldfish (Oshima & Gorbman) 409
in arterial plasma of female guinea-pig (Feder et al.) 505
labelled, ring A and side-chain reduction of, rat in vitro (Shirley & Cooke) 477
variation in level in systemic plasma, cow (Gupta & Pope) xii

Prolactin, counterbalancing effect of FSH on, newt (Mazzi & Vellano) 529
fish, bioassay of (Ensor & Ball) iii
plasma levels in goat (Bryant et al.) iv

Prostate, aged, change in synthesis of RNA in, mouse (Mainwaring) xvii

Protein metabolism, effect of oestrogen and gonadotrophins on, toad (Follett & Redshaw) 439

Puberty, androstenedione in relation to, male calf (Skinner et al.) 261

Rabbit, effect of teat anaesthesia on milk-ejection reflex (Findlay) 127
enzymes of lactose biosynthesis, hormonally stimulated mammary glands (Hetzman) 81
fertilizing capacity of spermatozoa after cryptorchidism (Cummins & Glover) vii
hydroxysteroid dehydrogenase activity in (Dennis et al.) 257
pregnant and post-parturient, ovarian response to HCG and egg transport (Adams) 101
structure of reaction products of acidic urinary metabolites of progesterone (Allen et al.) 153

Radioimmunoassay, urinary GH, man (Girard & Greenwood) 493

Rat, anterior pituitary hormones and carbohydrate metabolism in vitro, prepubertal rat ovary (Major & Armstrong) 73
blastocyst, dependence of shedding of zona pellucida on ovarian hormones (Dickmann) 393
estradiol, effects of oestrogen on thyroid of (Bithell & Brown-Grant) 397
developing, androgen concentrations in plasma and testis of (Resko et al.) 485
effect of low-lactone diet on cyclic variations of urinary Na:K (Pye & Matty) x
food deprived, effect of melatonin on wheel-running activity (Wong & Whiteside) 383
hypophysectomized, progesterone-treated, pregnant, induction of nidation in by non-specific factors (Varavudhi) 429

hypo- and hyperthyroid, effects of norethynodrel on (Ward & De Prospio) 263
induction and prevention of male homosexuality by androgen (Dörner & Hinz) 387
liver, localization and binding of corticosterone in (Sanyal & Snart) xvi
liver microsomes, biochemical assay of oestrogen using (Jellinok & Garland) 131
liver, ring A and side-chain reduction of [4-14C]-progesterone in vitro (Shirley & Cooke) 477
male, effect of pituitary inhibitor ICI 33,828 on reproductive system (Hemsworth et al.) 275
ovulation following vaginal stimulation (Zarrow & Clark) 343
oxytocin test to demonstrate initiation and end of lactation (Deis) 133
repletion of vasopressin and oxytocin in posterior lobe of (Young & Van Dyke) 337
seasonal changes of plasma insulin concentration (Howland & Nowell) vi
superoovulated immature, effects of transplanted rat pituitary and hypothalamic tissue on (Hopkins et al.) 363
weeping with hypothalamic lesions, correlation between ‘Lee index’ and carcass fat content (Bernardis & Patterson) 627

Relaxin, action of ovarian steroids and, on glyco
gen and enzyme activities in hamster uterus (Hall & Salimi Khaligh) 353
inhibition of spontaneous contractions of hamster uterus in vitro by (Salimi Khaligh) 125

Reproductive system, effect of pituitary inhibitor ICI 33,828 on, male rat (Hemsworth et al.) 275

Reproductive tract, transport of ova in oviduct, mouse (Humphrey) 267

RNA, change in synthesis of, aged prostate of mouse (Mainwaring) xvii

Sexual behaviour, in female rhesus monkey (Zumpe & Michael) 117

Sheep, age and thyrocalcitonin secretion (Care et al.) ix

distribution of corticosterone (Paterson & Harrison) 37
fetal and neonatal, steroid secretion by adrenal of (Alexander et al.) I
fetal hypophysis, effects of electrocoagulation of, on growth (Liggins & Kennedy) 371
insulin concentration in foetal plasma and fluids (Alexander et al.) 389
lysosomal function in corpus luteum (Dingle et al.) 325
ovarian function after autotransplantation of ovary and uterus to neck (Harrison et al.) xiii
prolonged gestation after foetal adrenalectomy (Drost & Holm) 393

Spermatogenesis, effect of pituitary inhibitor ICI 33,828 on, male rat (Hemsworth et al.) 275

Spermatozoa, fertilizing capacity after cryptorchidism, rabbit (Cummins & Glover) vii
