Subjects

Accessory Glands, sialic acid content of, male rat (Rajalakshmi & Prasad) 471
Acepromazine, changes in plasma prolactin induced by, sheep (Bryant et al.) 613
Adenohypophysis, mitotic activity in, after pinealectomy, rat (Bindoni & Raffaele) 451
Adenoma, clear cell, of human adrenal, corticosteroid synthesis in (Cameron & Griffiths) 327
Adenyly cyclase, possible role in thyrocalcitonin release, pig (Care & Gitelman) xxi
Adenosine triphosphatase (ATPase), disappearance from blood vessels in decidua during implantation, mouse (Hall) 53
Adrenal Cortex, adrenaline-rich medullary chromaffin cells adjacent to, cat (Rubin et al.) 541
function in normal dog (Rijnberk et al.) 387
Adrenal Gland, clear cell adenoma of human, corticosteroid synthesis in (Cameron & Griffiths) 327
effect of Na deficiency on sensitivity to angiotensin and ACTH, rat (Kinson & Singer) xxvii
human, role of progesterone in synthesis of cortisol in vitro (Cameron et al.) 319
metabolism of [3H]pregnenolone by, newborn adrenocortical infant (Cook) xxi
steroid 11β-hydroxylase and 3β-hydroxysteroid dehydrogenase isomerase in newborn adrenocortical infant (Shawwan et al.) xxv
tissue, comparison of potency of some 11β-hydroxylase inhibitors, rat and man (Sprunt & Hannah) xxi
Adrenaline, adrenocortical control of synthesis of, cat (Rubin et al.) 541
Adrenocortical Steroids, biosynthesis of (Grant) 111
Aldosterone production, regulation in normal and Na deficient rat (Csányki et al.) 179
Allantoic Fluid, hormonal control of volume, ovariectomized sheep (Alexander & Williams) 477
Amniotic fluid, hormonal control of volume, ovariectomized sheep (Alexander & Williams) 477
Anephric Infant, metabolism of [3H]pregnenolone by adrenal of (Cook) xxi
steroid 11β-hydroxylase and 3β-hydroxysteroid dehydrogenase-isomerase in adrenal of (Shawwan et al.) xxv
Angiotensin, effect of Na deficiency on adrenal sensitivity to, rat (Kinson & Singer) xxvii
Antidiuretic Activity in cerebrospinal fluid of rabbit (Heller et al.) 273
Antiphlogistic activity, local, of L-phenylalanine and L-tryptophane, rat (Davis et al.) 603
Antiserum to ovine prolactin, antihormonal activity of, rabbit (Saji & Crighton) 555
Assay, for oestradiol in pregnancy urine, autoclave method, man (Biggs) 611
for urinary 11-deoxy-17-oxosteroids by GLC (Thomas & Walton) 203
of bovine and fish TSH (Sage) xv
of plasma ACTH, intact rat (Purves & Sirett) 491
Behaviour, sexual, effect of neonatal testosterone administration, hamster (Crossley & Swanson) xiii
sexual, effects of s.c. and i.v. oestradiol on, monkey (Michael & Saayman) 231
sexual, ovarian hormones and, monkey (Michael & Welegalla) 407; (Michael et al.) 421
Birds, domestic fowl, effects of gonadal hormones on levels of pituitary LH (Heald et al.) 313
Blastocysts, cultured mouse, effect of oestradiol on implantation of (Moore Smith) 17
Blastocyst, cultured mouse, uptake of tritiated oestradiol by (Moore Smith) 17
Blood, adrenal venous, 21-deoxycortisol and other steroids in, possum (Weiss) 293
vessels, decidual, disappearance of PAS-reactive basement membranes during implantation, mouse (Hall) 53
Body Weight, effect of progesterone on, female rat (Hervey et al.) vi
effect of progesterone on, hamster (Swanson) xiii
Bone Width, in healthy young men, relation to C10 and C11 steroid excretion (Tanner & Gupta) 157
Carcinoma, human breast, paradoenic behaviour of (Adams & Wong) 41
human breast, transformation in vitro of steroids to physiologically active hormones by (Adams & Wong) 41
human endometrial tissue, metabolism of [6,7-3H]oestradiol by (Brush et al.) xii
Castration, cellular hypertrophy in pineal after, rat (Das Gupta) 607
Cat, adrenaline-rich medullary chromaffin cells adjacent to adrenal cortex (Rubin et al.) 541
Cattle, aromatization in vitro of neutral steroids by bovine ovary (Patwardhan & Romanoff) 461
oestradiol biosynthesis in bovine follicular tissue (Oakley et al.) xi
testosterone and dehydroepiandrosterone in semen of (White & Hudson) 291
TSH, assay of bovine (Sage) xv
Cerebral Tissue Fraction, rat, enhancement of gonadotrophin activity by (Hopkins) 345
Cerebrospinal Fluid, antidiuretic activity in, rabbit (Heller et al.) 273
Chloramidone acetate, mechanism of ovulation-inhibiting effect of, rat (Döcke et al.) 353
Chloromethylidimethylsilyl ethers in routine assay of urinary 11-deoxy-17-oxosteroids by GLC (Thomas & Walton) 203
Chromaffin Cells, medullary, adrenaline-rich, adjacent to adrenal cortex, cat (Rubin et al.) 541
Chromaffin tissue, extra-adrenal, effect of corticosterone on methylation of noradrenaline in vitro, neonatal rabbit (Coupland) 487

Clomiphene, comparison with FSH for treatment of anovulation (Crocce & Tsapoulis) ii therapy, factors affecting response to, man (Ferriman et al.) i

Corticosteroid synthesis, in clear cell adenoma of human adrenal in vitro (Cameron & Griffiths) 327

Corticosteroids, failure of stilboestrol to stimulate excretion, hypophysectomized guinea-pig (Clark) 297

Corticosterone, effect on methylation of noradrenaline by extra-adrenal chromaffin tissue culture, neonatal rabbit (Coupland) 487 stimulation of RNA and protein formation in mouse mammary cultures (Mayne et al.) 247

Corticotrophin, effect of Na-deficiency on adrenal sensitivity to, rat (Kinson & Singer) xxvii endogenous and exogenous, stability in rat plasma (Purves & Sirett) 491 plasma, immunoassay with charcoal separation (Donald) 499 plasma, response to insulin hypoglycaemia, lysine-vasopressin and metyrapone, pig (Donald et al.) 509

Cortisol, role of progesterone in synthesis, human adrenal tissue (Cameron et al.) 319 synthesis in vitro in clear cell adenoma of human adrenal (Cameron & Griffiths) 327

1,2-3H Cortisol, metabolism in human rheumatoid synovial tissue (Murphy & West) xxvii

Cortisone acetate, effects on length of gestation and survival of foetus, sheep (Halliday & Buttle) 447

Decidua, disappearance of ATPase from blood vessels of, during implantation, mouse (Hall) 53 disappearance of FAS-reactive basement membranes, in blood vessels during implantation, mouse (Hall) 53

Deciduoma, histochernistry of enzymes in uterus during development of, pseudopregnant mouse (Hall) viii in sterile horns of pregnant hamster (Orsini) vii

Dehydroepiandrosterone (DHA), concentration of fluids of mammalian male reproductive tract (White & Hudson) 291

[4-14C] Dehydroepiandrosterone, conjugation to DHA sulphate by human female skin in vitro (Faredin et al.) 295

[7a-3H] Dehydroepiandrosterone sulphate, metabolism in vitro by hilus cell tumour of human ovary (Fahmy et al.) 61

Deoxycorticisol, 11- and 21-, in adrenal venous blood of possum (Weiss) 293

11-Deoxy-17-oxosteroids, urinary, routine assay by GLC (Thomas & Walton) 203

Dexamethasone, mitotic inhibition by, prevention by nandrolone decanoate, mouse ear epithelium in vitro (Bullough et al.) 453

Diethylstilboestrol, and testosterone, effect on vaginal epithelium, rat (Ladinsky et al.) 161

Dimethylenzanthracine (DMBA), uptake of ovarian hormones by rat mammary tumours induced by (Mobbs) 339

Dog, adrenocortical function (Rijnberk et al.) 387 hyperadrenocorticism in (Rijnberk et al.) 397 testosterone and dehydroepiandrosterone in semen of (White & Hudson) 291

Endometrium, carcinoma tissue, metabolism of [6,7-3H] oestradiol by, man (Brush et al.) xii

Enzymes, glucose 6-phosphate metabolizing, hormonal induction of, rabbit mammary gland (Heitzman) xvi in uterus of pseudopregnant mouse during development and regression of deciduomata (Hall) viii steroid 11β-hydroxylase and 3β-hydroxysteroid dehydrogenase-isomerase in newborn anencephalic infant adrenal (Shahwan et al.) xxv

Ependymal cells, modified, possible role in hypothalamic regulation of anterior pituitary function (Kumar) xvii

Exophthalmos, effect of metronidazole on, man (Jones) 609

Ferret, pars intermedia, ultrastructure of (Vincent & Kumar) xviii prevention of light-accelerated oestrus by pinealectomy (Herbert) xx

Fibroblast, mouse, GH and insulin interaction in tissue culture of (Foley & Maca) 107

Fish, Poecilia latipinna, prolactin and sodium fluxes in (Ensor & Ball) xvi

Poecilia reticulata, thyroid activity during gestation (Bromage & Sage) 303

TSH, assay of (Sage) xv

Fluorescence measuring technique, new, for ovarian steroids (Cawley) x

Foetus, sheep, effect of cortisone acetate on survival (Halliday & Buttle) 447

Folic acid, effect on superovulation, immature rat (Wilmott et al.) 439

Follicle-stimulating hormone (FSH), comparison with clomiphene for treatment of anovulation (Crocce & Tsapoulis) ii

urinary excretion, patients treated with gonadotrophins (Morell et al.) 571

Fowl, domestic, effects of gonadal hormones on levels of pituitary LH (Heald et al.) 313 domestic, pituitary LH and ovariolytic lapse (Heald et al.) 197

Gas-liquid chromatography (GLC), of urinary 11-deoxy-17-oxosteroids using chloromethyl-dimethylsilyl ethers (Thomas & Walton) 203

Genetic variation in neurohypophysial hormones, mouse (Stewart) xvii

Gestation, effects of cortisone acetate on length, sheep (Halliday & Buttle) 447 thyroid activity during, Poecilia (Bromage & Sage) 303

Glucose 6-phosphate metabolizing enzymes, hormonal induction, rabbit mammary gland (Heitzman) xvi
Index

Goat, pregnant, progesterone metabolism in, compared with sheep (Linzell & Heap) 433

Gonadotrophin activity, enhancement of by rat cerebral tissue fraction (Hopkins) 345

Gonadotrophins, excretion of FSH by patients treated with (Morell et al.) 571

inhibiting properties of tannic acid extracts of human urine (Hipkin) 449

pituitary, biological effects of, mouse, rat (Bell) xiv

Growth hormone (GH), human, and insulin interaction, mouse fibroblasts in vitro (Foley & Maca) 107

Guinea-pig, effect of ovarian autotransplantation on oestrous cycle (Bland & Donovan) 95

follicular development, lack of effect of uterine distension on (Bland) 457

hypophysectomized, failure of stilboestrol to stimulate corticosteroid excretion in (Clark) 297

9α-Halogenated steroids, progestational activity of, ovariecetomized ewe (Holst & Moore) 255

Hamster, body weight, effect of progesterone on (Swanson) xiii

effect of neonatal testosterone on sexual behaviour (Crossley & Swanson) xiii

pregnant, decidualmata in sterile horns of (Orsini) vii

Hilus cell tumour of human ovary, steroid biosynthesis by (Fahmy et al.) 61

Human chorionic gonadotrophin (HCG), effect on induction of ovulation, immature rat (Boll & Lunn) 171

Hydatidiform mole, steroids of (Chamberlain et al.) 289

11β-Hydroxyandrostenedione in adrenal venous blood of possum (Weiss) 293

17-Hydroxycorticosteroids (17-OHCS), fractionation of, human urine (Few) 213

urinary excretion of, dog (Rijnberk et al.) 387

11β-Hydroxylase inhibitors, comparison of potency of, human and rat adrenal tissue (Sprunt & Hannah) xxvi

Hydroxyprogesterone, 11β- and 17α-, in adrenal venous blood of possum (Weiss) 293

Hyperadrenocorticism, spontaneous, dog (Rijnberk et al.) 397

Hypertrophy, cellular, in pineal, castrated rat (Das Gupta) 607

Hypothalamus, radioactivity after injection of [7α-3H]progesterone, rat (Seiki et al.) 109

thyrotrophic area, topographical study (Flament-Durand & Desclin) 531

ventral, modified ependymal cells, regulation of pituitary function by, ferret (Kumar) xvii

Immunoassay, radio, of plasma ACTH, coated charcoal separation method (Donald) 499;

(Donald et al.) 509

Implantation, delayed, recovery from X-ray irradiation, rat (Hooverman et al.) 75

disappearance of ATPase from decidual blood vessels during, mouse (Hall) 53

effect of time of oestrogen injection on, mouse (Moore Smith) 11

oestrogen requirement for, mouse (Moore Smith & Biggers) 1

Insulin, hypoglycaemia, plasma ACTH response to, pig (Donald et al.) 509

interaction with GH, mouse fibroblasts in vitro (Foley & Maca) 107

release from pancreas in vitro, sheep (Hertelendy et al.) 605

stimulation of RNA and protein formation in mouse mammary cultures (Mayne et al.) 247

132Iodide, uptake in congenital thyrotoxicosis (McHardy-Young & Blackburn) 299

Lactation, perphenazine-induced, role of ovaries in, rat (Ben-David) 377

Lactogenic response, local, to ovine prolactin antiserum, rabbit (Saji & Crighton) 555

Liver, reduction in weight, salt-loaded rat (Duchen) 593

Luteinizing hormone ( LH), pituitary, and ovulatory lapse, fowl (Heald et al.) 197

pituitary, effect of mating on, female rabbit (Brown-Grant et al.) 91

pituitary levels, effects of gonadal hormones on, fowl (Heald et al.) 313

Luteotropic activity of ectopic mouse trophoblast (Zeilmaker) 455

Lysine-vasopressin, plasma ACTH response to, pig (Donald et al.) 509

Mammary gland, carcinoma, paraendocrine behaviour of, man (Adams & Wong) 41

DMBA-induced tumour of, uptake of ovarian hormones by, rat (Mobbs) 339

hormonal induction of glucose 6-phosphate metabolizing enzymes, rabbit (Heitzman) xvi

pregnant mouse, hormonal stimulation of RNA and protein formation in vitro (Mayne et al.) 247

Man, adrenal adenoma, corticosteroid synthesis in (Cameron & Griffiths) 327

adrenal tissue, comparison of potency of some 11β-hydroxylase inhibitors (Sprunt & Hannah) xxvi

adrenal tissue, role of progesterone in synthesis of cortisol (Cameron et al.) 319

breast carcinoma, transformation in vitro of steroids to physiologically active hormones by (Adams & Wong) 41

clomiphene and FSH in treatment of anovulation (Croke & Tsapoulis) ii

clomiphene therapy, factors affecting response to (Ferriman et al.) i

comparison of steroids of normal placentae and hydatidiform moles (Chamberlain et al.) 289

genitalial thyrotoxicosis, 131I uptake studies (McHardy-Young & Blackburn) 299

conjugation in vitro of DHA to DHA sulphate, female skin (Faredin et al.) 295

determination of urinary 1-oxygenated steroids (Edwards) ix

endometrial carcinoma tissue, metabolism of [6,7-3H]oestradiol by (Brush et al.) xii
Man, excretion of FSH after treatment of secondary amenorrhoea with gonadotrophins (Morell et al.) 571
exophthalmic, effect of metronidazole on (Jones) 609
hilus cell tumour of ovary, steroid synthesis of (Fahmy et al.) 61
longitudinal study of urinary steroid excretion, children 8–12 yr. old (Tanner & Gupta) 139
metabolism of [4-14C]norethisterone in women (Kamyab et al.) 263
newborn anencephalic infant, metabolism of [3H]pregnenolone by adrenal (Cook) xxiii
newborn anencephalic infant, steroid 11β-hydroxylase and 3β-hydroxysteroid dehydrogenase isomerase in adrenal of (Shahwan et al.) xxv
pregnancy urine, oestriol estimation by autoclave method (Biggs) 611
rheumatoid synovial tissue, metabolism of [1,2,3H]cortisol in (Murphy & West) xxvii
separate estimation of 11-deoxy and 11-oxygenated 17-hydroxycorticosteroids in urine (Few) 213
C19 and C21 steroid excretion and muscle and limb bone widths (Tanner & Gupta) 167
testosterone and dehydroepiandrosterone in semen of (White & Hudson) 291
urine, gonadotrophin-inhibiting properties of tannic acid extracts of (Hipkin) 449
Mating, effect on pituitary LH and thyrotrophic hormone content, female rabbit (Brown-Grant et al.) 91
Melatonin, failure to inhibit ovulation induced with PMS and HCG, rat (Ota & Hisich) 601
Metronidazole, effect on exophthalmos, man (Jones) 609
Metyrapone, plasma ACTH response to, pig (Donald et al.) 509
Mitosis, activity in rat adenohypophysis after pinealectomy (Bindoni & Raffaele) 451
dexamethasone-induced inhibition of, prevention by nandrolone decanoate, mouse ear epidermis in vitro (Bullough et al.) 453
hormonal regulation in epithelial and connective tissue, mouse uterus (Martin & Finn) 365
Monkey, (Macaca mulatta), effects of s.c. and i.v. oestrogen on sexual behaviour (Michael & Saayman) 231
(Macaca mulatta), ovarian hormones and sexual behaviour (Michael & Welegalla) 407; (Michael et al.) 421
rhesus, non-pregnant, method of recording myometrial contractions in vivo (Harry & Pickles) 105
rhesus, possible regulation of anterior pituitary function by modified ependymal cells in ventral hypothalamus (Kumar) xvii
Mouse, biological effects of pituitary gonadotrophins of (Bell) xiv
blastocysts, cultured, effect of oestrogen on implantation of (Moore Smith) 17
CE strain, steroid synthesis by adrenal tumours (Neville et al.) 547
Nandrolone decanoate, prevention of dexamethasone-induced mitotic inhibition by, mouse ear epidermis in vitro (Bullough et al.) 453
Neurohypophysial hormones, genetic variation in, mouse (Stewart) xix
Noradrenaline, effect of corticosterone on methylation of, extra-adrenal chromaffin tissue, neonatal rabbit (Coupland) 487
Norethindrone, effect on ovulation, rat (Mc-Donald) v
[4-14C]Norethisterone, metabolism in women (Kamyab et al.) 263
Oestradiol, effect on sexual behaviour, monkey (Michael & Welegalla) 407; (Michael et al.) 421
Oestradiol-17β, effect on mitosis in mouse uterus (Martin & Finn) 363
Oestradiol-17β, location in mouse vagina (King et al.) 223
uptake and localization after local application, rat uterus (Mobbs) 69
uptake and metabolism by human endometrial carcinoma (Brush et al.) xii
uptake by blastocyst culture, mouse (Moore Smith) 17
uptake, with [14C]progesterone, by DMBA-induced mammary tumours, rat (Mobbs) 339
Oestradiol benzoate, effect on levels of pituitary LH, fowl (Heald et al.) 313
Oestrogen, biosynthesis in bovine follicular tissue (Oakey et al.) xi control of amniotic and allantoic fluid volume by, ovarioectomized sheep (Alexander & Williams) 477 differential effects on behaviour of s.c. and i.v. administration, monkey (Michael & Saayman) 231 effect of time of injection on implantation, mouse (Moore Smith) 11 effect on implantation of cultured mouse blastocysts (Moore Smith) 17 ovarian secretion during oestrous cycle, rat (Barne & et al.) 281 requirement for implantation, mouse (Moore Smith & Biggers) 1
Oestrous cycle, effect of autotransplantation of ovaries on, guinea-pig (Bland & Donovan) 95 ovarian secretion of oestrogen during, rat (Barne & et al.) 281
Oestrus, light-accelerated, prevention by pinealectomy, ferret (Herbert) xx
Ovarian follicle, bovine, oestrogen biosynthesis in tissue of (Oakey et al.) xi
Ovary, autotransplantation of, effect on oestrous cycle, guinea-pig (Bland & Donovan) 95 bovine, aromatization in vitro of neutral steroids by (Patwardhan & Romanoff) 461 hilus cell tumour of, steroid biosynthesis by, man (Fahmy et al.) 61 new fluorescence measuring technique for steroids of (Cawley) x role in perphenazine-induced lactation, rat (Ben-David) 377 secretion of oestrogen during oestrous cycle, rat (Barne & et al.) 281
Ovulation, effect of norethindrone on, rat (McDonald) v gonadotrophin-induced, immature rat (Bell & Lunn) 171 induced with PMS and HCG, failure of melatonin to inhibit, rat (Ota & Hesch) 601 mechanism of inhibiting effect of chlormadinone acetate on, rat (Döcke et al.) 353 super, effect of follic acid on, immature rat (Willmott et al.) 439 thyroid function and, rabbit (Brown-Grant) 85
17-Oxosteroids, urinary excretion of, dog (Rijnberk et al.) 387
Oxyten, thyroid function and consumption of, overheated rat (Einhorn et al.) 373
Pancreas, insulin release in vitro, sheep (Hortelundy et al.) 605
Pars intermedia, ultrastructure of, ferret (Vincent & Kumar) xviii
PAS-reactive basement membranes, blood vessels, disappearance in decidua during implantation, mouse (Hall) 53
Perphenazine, ovaries and lactation induced by, rat (Ben-David) 377
Phenelzine derivatives, maintenance of pregnancy, mice (Jaitly et al.) 519
r.-Phenylalanine, local antiphlogistic activity of, rat (Davis et al.) 603
Pig, plasma ACTH, response to insulin hypoglycaemia, lysine-vasopressin and metyrapone (Donald et al.) 509 thyrocalcitonin release, possible role of adenyl cyclase in (Care & Gitelman) xx
Pineal gland, cellular hypertrophy after castration, rat (Das Gupta) 607
Pinealectomy, mitotic activity in adenohypophysis after, rat (Bindoni & Raffaele) 451 prevention of light accelerated oestrus by, ferret (Herbert) xx
Pituitary, anterior, effect of gonadal hormones on levels of LH in, fowl (Heald et al.) 313 anterior, effect of mating on LH and thyrotrophic hormone content of, female rabbit (Brown-Grant et al.) 91 anterior, LH content during ovulatory lapse, fowl (Heald et al.) 197 anterior, possible hypothalamic regulation of function by modified ependymal cells in ventral hypothalamus, monkey (Kumar) xvii effect of salt-loading on volume of lobes of, rat (Duchen) 593 gonadotrophins, biological effects of, mouse, rat (Bell) xiv radioactivity after injection of [7a-3H]progesterone, rat (Seiki et al.) 109
Placenta, normal, comparison of steroids of, with those of hydatidiform moles (Chamberlain et al.) 289
Plasma, ACTH immunoassay with charcoal separation (Donald) 499; (Donald et al.) 509 arterial, progesterone levels in, pre-ovulatory and ovarioectomized rat (Feder et al.) 563 changes in prolactin induced by acepromazine, sheep (Bryant et al.) 613 stability of ACTH in, rat (Purves & Sirett) 491
Poecilia latipinna, prolactin and sodium fluxes in (Ensor & Ball) xvii
Poecilia reticulata, thyroid activity during gestation (Bromage & Sage) 303
Possum (Trichosurus vulpecula), 21-deoxycortisol and other steroids in adrenal venous blood (Weiss) 293
Pregnancy, maintenance with phenelzine derivatives, hypophysectomized or ovarioectomized mouse (Jaitly et al.) 519
Pregnant mare serum gonadotrophin (PMSG), effect on induction of ovulation, immature rat (Bell & Lunn) 171
[4-14C]Progynenolone, metabolism in vitro by hilus cell tumour of human ovari (Fahmy et al.) 61
[3H]Progynenolone, metabolism by adrenal from newborn anencephalic infants (Cooke) xxiii
Progestational activity of 9α-halogenated steroids of sheep (Holst & Moore) 255
Progesterone, control of amniotic and allantoic fluid volume by, ovarioectomized sheep (Alexander & Williams) 477

Index
Index

**Progesterone**, effect on body weight, hamster (Swanson) xiii
effect on levels of pituitary LH, fowl (Heald et al.) 313
effect on mitosis in mouse uterus (Martin & Finn) 363
effect on sexual receptivity, female monkey (Michael et al.) 421
levels in arterial plasma, preovulatory and ovariotomized rat (Feder et al.) 563
metabolism, comparison of in pregnant sheep and goat (Linzell & Heap) 433
role in synthesis of cortisol, human adrenal tissue (Cameron et al.) 319
sources of production and estimated uptake by target organs, pregnant sheep and goat (Linzell & Heap) 433

[14C]**Progesterone**, uptake, with [3H]oestradiol, by DMBA-induced mammary tumours, rat (Mobbs) 339

[7α-3H]**Progesterone**, uptake in hypothalamus and pituitary after injection, rat (Seiki et al.) 109

**PROLACTIN**, ovine, antiserum to, antihormonal activity in rabbit (Saji & Crighton) 555
plasma, changes induced by acpromazine in, sheep (Bryant et al.) 613
sodium fluxes in Pocelitia (Esenor & Ball) xvi
stimulation of RNA and protein formation in mouse mammary cultures (Mayne et al.) 247

**PROPYTHIOuracil**, effect on survival of rat thyroid cells in vivo and in vitro (Speight et al.) 577

**Protein**, formation in mouse mammary cultures, stimulation by hormones (Mayne et al.) 247

**Rabbit, antidiuretic activity in cerebrospinal fluid** (Heller et al.) 273
female, mating and pituitary hormone content (Brown-Grant et al.) 91
mammary gland, hormonal induction of glucose 6-phosphate metabolizing enzymes in (Heitzman) xvi
neonatal, effect of corticosterone on methylation of noradrenaline by extra-adrenal chromaffin tissue in vivo (Coupland) 487
ovulation and thyroid function in (Brown-Grant) 85
prolactin antiserum, ovine, antihormonal activity in rabbit (Saji & Crighton) 555
testosterone and dehydroepiandrosterone in semen of (White & Hudson) 291

**Rat, adrenal, effect of Na-deficiency on sensitivity of, to angiotensin and ACTH (Kinson & Singer) xxvii
adrenal tissue, comparison of potency of some 11β-hydroxysteroid inhibitors (Sprunt & Hannah) xxvi
biological effects of pituitary gonadotrophins of (Bell) xiv
cerebral tissue fraction, gonadotrophin-enhancing effect of (Hopkins) 345
clomiphene and inhibition of ovulation (Döcke et al.) 353

DMBA-induced mammary tumours, uptake of ovarian hormones by (Mobbs) 339
effect of norethindrone on ovulation (McDonald) v
failure of melatonin to inhibit ovulation induced with PMS and HCG (Ota & Hisheh) 601
female, effect of progestational steroids on body weight (Hervey et al.) vi
hypothalamic region with a 'thyrotrophic' action (Flament-Durand & Desclin) 531
hypothyroid, oxygen consumption during over heating (Einhorn et al.) 373
immature, effect of folic acid on superovulation in (Willmott et al.) 439
immature, gonadotrophin-induced ovulation in (Bell & Lunn) 171
local antiphlogistic activity of L-phenylalanine and L-tryptophan (Davis et al.) 603
male, sialic acid in accessory glands of (Rajalakshmi & Prasad) 471
mitotic activity in adenohypophysis after pinealectomy (Bindoni & Raffaele) 451
normal and Na-deficient, regulation of aldosterone production in (Ota et al.) 179
oestrogen-androgen interaction in vaginal epithelium (Ladinsky et al.) 161
ovarian secretion of oestrogen during oestrus cycle (Barnea et al.) 281
pineal, cellular hypertrophy after castration (Das Gupta) 607
plasma, stability of ACTH in (Purves & Sirett) 491
pre-ovulatory and ovariotomized, progesterone levels in arterial plasma (Feder et al.) 563
radioactivity of hypothalamus and pituitary after injection of [7α-3H]progesterone (Seiki et al.) 109
recovery from X-ray irradiation during delayed implantation (Hooverman et al.) 75
role of ovaries in perphenazine-induced lactation (Ben-David) 377
salt-loaded, pituitary lobe volume and weight and water content of organs of (Duchen) 593
thyroid cells, effect of propythiouracil and TSH on survival in vivo and in vitro (Speight et al.) 577
'thyrotoxic', oxygen consumption during over heating (Einhorn et al.) 373
uterus, uptake and localization of oestradiol after local application (Mobbs) 69

**Reproductive tract, male, testosterone and dehydroepiandrosterone concentrations in fluids of** (White & Hudson) 291

**Resin sponge test, uptake of serum T3 using** (Irving & Standeven) 31

**RNA, formation in mouse mammary cultures, stimulation by hormones** (Mayne et al.) 247

**Semen, testosterone and dehydroepiandrosterone in, ram, bull, dog, rabbit, man** (White & Hudson) 291

**Sheep, effects of cortisone acetate on gestation length and survival of foetus** (Halliday & Buttle) 447
### Index

**Uterus, hormones and mitosis in, mouse** (Martin & Finn) 363  
incorporation of uridine in early pregnancy by, mouse (Miller et al.) 189  
lack of effect of distension on follicular development, guinea-pig (Bland) 457  
uptake and localization of oestradiol after local application (Mobbs) 69  

**Vagina, epithelium, oestrogen-androgen interaction in, rat** (Ladinsky et al.) 161  
inclusion of uridine in early pregnancy by, mouse (Miller et al.) 189  
location of tritiated oestradiol-17β in, mouse (King et al.) 223  

**X-ray irradiation, recovery from during delayed implantation, rat** (Hooverman et al.) 75
